#### Advanced Materials for Solid State Lighting

Taylor & Francis

This book provides reflections on the butterfly effect on how Turfloop brought in the Age of Barack Obama. What is the Age of Barack Obama? To paraphrase Dr Ineke Van Kessel, a prominent historian at the Leiden University in the Netherlands: The University of the North also known as Turfloop, played a vital role as the center of communication, coordination, ideological direction... the engine of bringing the new South Africa was University of the North We approached this book like detectives. Fortunately in our detective work, we were not concerned with a particular agenda; we were not trying to prove that a certain method of thinking was right or wrong. We didn't want this book to be filled with personal opinions and biases. We wanted this book to be juice and accessible to every person who reads it in

whatever corner of the world. We have to back up our story with facts, of course, and get other people to do practical analysis and later, we added our own perspectives. When we completed writing this book, we passed it around amongst critical people spread across the globe. Most of them said that the book is somehow highbrow and, at the same time all together lowbrow, which came as a compliment. A lot of people are somewhere in between. We want this book to embody that, because there are many people there... we want them to appreciate this book.

[The South African Journal of Physiotherapy](#) BRILL  
Black Student Politics, Higher Education and Apartheid examines two black national student political organisations - the South African National Students' Congress (SANSCO) and the South African Students' Organisation (SASO), popularly associated with Black Consciousness. It analyses the ideologies, politics and organisation of SASO and SANSCO and their intellectual, political

and social determinants. It also analyses their role in the educational, political and social spheres, and the factors that shaped their activities. Finally, it assesses their contributions to the popular struggle against apartheid education as well as against race, class and gender oppression. *Bantoe-onderwysblad* IGI  
Global  
Implementation of guidelines in the health system is a major undertaking, especially in developing countries. An important constraint in guideline development in developing countries is that the guideline recommendations must suit local conditions and must make use of available resources. This is a challenge because the health systems of developing countries have a high burden of disease and little resources; therefore, guidelines must rely on cost-effective healthcare interventions. The BACIS program study was initiated to address some of these challenges in the dissemination and utilization of maternal health guidelines. The BACIS program was

piloted, and the results showed that the BACIS program could assist in improving compliance of nurses with the national maternity care guidelines. This is an impressive finding and step forward for maternal healthcare in developing countries. *Developing Maternal Health Decision Support Systems in Developing Countries* discusses public health aspects of the design and implementation of clinical decision support systems in developing country contexts. Specifically, it focuses largely on the design and evaluation of the BACIS program in South Africa. This is supplemented with a conversation on the possible future research directions in the BACIS program study along with the outlook for clinical decision support systems in developing country contexts in general. This book is ideal for e-health system designers and implementers, managers and policymakers in the area of e-health in developing countries, personnel from NPOs and donor agencies, government officials, IT consultants, medical professionals, practitioners, stakeholders, researchers,

academicians, and students who are interested in how decision support systems such as BACIS are being used to improve maternal health in developing countries. *Study Abroad 2006-2007* CRC Press  
*Reflections of South African Student Leaders 1994-2017* brings together the reflections of twelve former SRC leaders from across the landscape of South African universities. Reviews of the previous volume, 1981-2014 suggested that it contributed significantly to a better understanding of the stringent demands of visionary and transformative leadership required by university leaders in the fastchanging and increasingly complex public higher education sector. This volume is based on comprehensive interviews with former student leaders, each of whom provided a personal account in their own words of their experience in the position of student leadership. The interviewees are from different backgrounds and of diverse political persuasions. The book is important for current and future leaders of higher education institutions as it provides insights into the

thinking, aspirations, desires, fears and modus operandi of student leaders. Such insight can contribute to developing and implementing appropriate strategies for achieving meaningful and constructive engagement with current and future student leaders.

*The Practicalities of Using Nevirapine for PMTCT in Under-resourced Settings* African Books Collective  
 Teacher education is a known variable that impacts the quality of teaching and schooling, yet while research on practices in teaching and teacher education abound in other contexts, there seems to be no comprehensive reference work on teaching and teacher education in Africa. With Africa and the diaspora boasting rich, diverse political and educational contexts and practices, this gap in knowledge requires that attention be focused on investigating issues that shape the pace, course, and direction of teaching and teacher education in these contexts. *Practices and Perspectives of Teaching and Teacher Education in Africa* facilitates scholarly discussions among scholars and practitioners about practices,

innovations, and future possibilities for educating the next generation of competent students and teachers in Africa.

Covering topics such as educational reforms, equity, career progression, and curriculum development, this major reference work is ideal for administrators, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.

SAMJ IGI Global

Past, present, and future is what this book documents and reveals about higher education in South Africa. Because place and space have contextual effects, the story of university education is told through the experiences of two schools - the University of Fort Hare and the University of the North; they are both similar and different.

Developing Maternal Health Decision Support Systems in Developing Countries Ediciones

Mundi-Prensa

The book focuses on smart computing for crowdfunding usage, looking at the crowdfunding landscape, e.g., reward-, donation-, equity-, P2P-based and the crowdfunding

ecosystem, e.g., regulator, asker, backer, investor, and operator. The increased complexity of fund raising scenario, driven by the broad economic environment as well as the need for using alternative funding sources, has sparked research in smart computing techniques. Covering a wide range of detailed topics, the authors of this book offer an outstanding overview of the current state of the art; providing deep insights into smart computing methods, tools, and their applications in crowdfunding; exploring the importance of smart analysis, prediction, and decision-making within the fintech industry. This book is intended to be an authoritative and valuable resource for professional practitioners and researchers alike, as well as finance engineering, and computer science students who are interested in crowdfunding and other emerging fintech topics. Leadership HSRC Press This book examines the intersections between education, identity formation, and language in post-apartheid South Africa with specific attention to higher

education. It does so against the backdrop of the core argument that the sector plays a critical role in shaping, (re)producing and perpetuating sectoral, class, sub-national and national identities, which in turn, in the peculiar South African setting, are almost invariably analogous with the historical fault lines determined and dictated by language as a marker of ethnic and racial identity. The chapters in the book grapple with the nuances related to these intersections in the understanding that higher education language policies - overt and/or covert - largely structure institutional cultures, or what has been described as curriculum in higher education institutions. Together, the chapters examine the roles played by higher education, by language policies, and by the intersections of these policies and ethnolinguistic identities in either constructing and perpetuating, or deconstructing ethnolinguistic identities upon which the sector was founded. The introductory chapter lays out the background to the entire book with an emphasis on the policy

and practice perspectives on the intersections. The middle chapters describe the so-called “White Universities”, “Black Universities” and “Middle-Man Minorities Universities”. The final chapter maps out future directions of the discourses on language and identity formation in South Africa’s higher education.

This is the authoritative guide to implementing COIL Virtual Exchange, conceived, and co-edited by one of the originators of this innovative approach to internationalization, Jon Rubin. COIL, the acronym for Collaborative Online International Learning, is a central modality of what has come to be known as virtual exchange. Since its first iteration in 2002, it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research. COIL Virtual Exchange at its most essential is a bi-lateral online exchange involving the integration of existing courses across two, or sometimes more, institutions that are geographically and/or culturally distinct. To

launch a COIL VE course, the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country. Together, their students engage and develop joint projects, usually over a continuous five to eight-week period. Compared to the limited number of students worldwide who can engage in study abroad, COIL VE potentially opens up more equitable and inclusive participation in international education and intercultural experiences to all students, involves them in rigorous disciplinary and interdisciplinary studies, and promotes close and constructive engagement with students with different cultural perspectives. While many COIL courses are launched by individual instructors, based on their research connections and online outreach, they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development. This comprehensive guide covers COIL VE pedagogy, provides examples of what takes place in the

COIL classroom, and explores what instructors and staff need to know to facilitate and support a variety of COIL courses across the curriculum. It addresses how institutional stakeholders, especially those in leadership positions, can develop and embed a successful COIL initiative at their institution. It offers varied perspectives of COIL viewed from different institutional and cultural vantage points -- from research universities, community and technical colleges, and university systems -- and describes how COIL VE is developing in five different world regions, presenting eleven case studies. The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE. Additionally, the book provides links to the COIL Connect for Virtual Exchange website (<https://coilconnect.org>) which includes an updated directory of organizations, an expanding database of faculty and institutions participating in COIL and looking for partners, course templates, survey data, and case studies. This book offers faculty and administrators

across the world -- whether formally involved in international education, in service-learning and community engagement, or wanting to incorporate a cross-cultural perspective in their disciplinary courses -- theoretical foundations, guidance on effective collaboration, and the strategic and pedagogical considerations to develop robust COIL VE courses and programs.

Wiley & Sons Study Abroad 2006-2007 contains some 2,900 entries concerning post-secondary education and training in all academic and professional fields in countries throughout the world. Key features include information on: Study opportunities and financial assistance available to students wishing to study in a foreign country; National systems of higher education; Open and distance learning (ODL) opportunities; Validation

of foreign qualifications; How to search for quality institutions of higher education including warnings about bogus institutions. This is a trilingual edition: French/English/Spanish.

*The Origin and Growth of Geography as a discipline at South Africa*

Universities State University of New York Press

Transforming Universities in South Africa: Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post-apartheid experience and assess where South Africa's higher education stands across the continent and globally, particularly within the country's efforts to overcome decades of socio-economic imbalances.

*Service Learning in Higher Education*

ScholarlyEditions b"Application of Nanotechnology in Mining Processes Nanotechnology has revolutionized processes in many industries but its application in the mining industry has not been widely discussed. This unique book provides an overview of the successful implementation of nanotechnology in some

of the key environmental and beneficiation mining processes. This book explores extensively the potential of nanotechnology to revolutionize the mining industry which has been relying for a very long on processes with limited efficiencies. The nine specialized chapters focus on applying nanoflotation to improve mineral processing, effective extraction of metals from leachates or pregnant solutions using nanoscale supramolecular hosts, and development of nano-adsorbents or nano-based strategies for the remediation or valorization of AMD. The application of nanotechnology in mining has so far received little attention from the industry and researchers and this groundbreaking book features critical issues so far under-reported in the literature: Application of nanotechnology in mineral processing for the enhancement of froth flotation Development of smart nanomaterials and application for the treatment of acid mine drainage Recovery of values from pregnant solutions using nanoadsorbents Valorization of AMD

through formation of multipurpose nanoproducts. Audience Industrial interest will be from mining plant operators, environmental managers, water treatment plants managers, and operators. Researchers in nanotechnology, environmental science, mining, and metallurgy engineering will find the book valuable, as will government entities such as regulatory bodies officers and environmentalists. The Burden of Educational Exclusion Rodopi Service-Learning has proved to be a powerful and practical methodology and tool with far-reaching implications. Benefits have included increased civic engagement, enhanced sense of purpose, greater feeling of fulfillment, nurtured creativity, and promotion of problem-solving skills and social responsibility as traditional classrooms have moved to the communities and students have become service providers and learners. The papers in this book span a good part of the globe and cover a wide application spectrum, from health care, business administration, nursing,

occupational therapy, and speech and language therapy to gerontology and food service. Extended models and prototypes explored include community engaged learning, long-distance learning, and the bridge between older and younger students. In addition to current perspectives and numerous revealing case studies with local communities and international service-learning projects, thirty chapters and a reflection paper are devoted to documenting lessons learning, assessing service-learning programs, identifying new challenges, and tapping into the emerging paradigms in service-learning.

### **Doctors in a Divided Society** IGI Global

"Many of the goals of South Africa's new democracy depend on the production of professionals who have not only the knowledge and skills to make our country globally competitive, but also a commitment to working and living here. Despite numerous reforms, the South African health system, ten years into democracy, remains divided: first world private

care that ranks with middle income countries internationally at the one end, and at the other extreme, in the rural public sector in particular, conditions that are superior only to the poorest of African countries. Much work has been done to change medical school curricula in line with the primary health-care focus of government policy, and international trends towards problem-based learning. The student profile in medical schools is now not only more representative of the demographics of South Africa, but also reveals a significant increase in female students. Whether these students will stay in the country after graduating, and serve where they are needed most, remains to be seen."--Publisher's website.

Reflections of South African Student Leaders: 1994 to 2017

ScholarlyEditions  
Ongoing advancements in modern technology have led to significant developments in artificial intelligence. With the numerous applications available, it becomes imperative to conduct research and make further progress in this

field. Artificial Intelligence: Concepts, Methodologies, Tools, and Applications provides a comprehensive overview of the latest breakthroughs and recent progress in artificial intelligence. Highlighting relevant technologies, uses, and techniques across various industries and settings, this publication is a pivotal reference source for researchers, professionals, academics, upper-level students, and practitioners interested in emerging perspectives in the field of artificial intelligence.

**Advances in Communicable Disease Control Research and Application: 2013**

**Edition** ScholarlyEditions  
This volume casts light on mergers and alliances in higher education by examining developments of this type in different countries. It combines the direct experiences of those at the heart of such transformations, university leaders and senior officials responsible for higher education policy, with expert analysts of the systems concerned. Higher education in Europe faces a series of major challenges. The economic crisis has accelerated

expectations of an increased role in addressing economic and societal challenges while at the same time putting pressure on available finances. Broader trends such as shifting student demographics and expectations, globalisation and mobility and new ways of working with business have contributed to these increased pressures. In the light of these trends there have been moves, both from national or regional agencies and from individual institutions to respond by combining resources, either through collaborative arrangements or more fundamentally through mergers between two or more universities. After an introductory chapter by the editors which establishes the context for mergers and alliances, the book falls into two main parts. Part 1 takes a national or regional perspective to give some sense of the historical context, the wider drivers and the importance of these developments in these cases. Included are both systemic accounts (for countries as France, Sweden, Romania, Russia, Wales and England), and specific cross-cutting in

initiatives including a major facility at Magurele in Romania and a Spanish programme for promoting international campuses of excellence. Part 2 is built from specific cases of universities, either in mergers or alliances, with examples from different countries (such as France, UK, Romania, Spain, Germany, Denmark, Finland, Switzerland). A concluding chapter by the editors assesses these experiences and indicates the implications and future needs for understanding in this domain.
