 The essential companion and general handbook for the Mediterranean, the Imray Mediterranean Almanac 2019/20 is published in full colour. All the harbour plans appear in the familiar Imray livery which adds clarity to their use. There are the usual detailed revisions throughout this edition, plus many new harbour plans. The Imray Mediterranean Almanac is the ideal compendium of information for yachts on passage through the Mediterranean.

The Economics of Defense Industry Bloomsbury Publishing
 This book on the economics of defence industry assesses a series

of historical and contemporary case studies that consistently demonstrate the need for governments to recognise, and thereafter factor, the financial needs of a narrow industrial sector that is capital intensive, technologically advanced and that requires a highly skilled labour force. Since the end of the cold war, Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation. In all cases, government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand. The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions. Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments. The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short-term financial efficiencies, inevitably results in limited, expensive, and long delays in increased production in times of international crisis. This book serves as an essential guide for academics, researchers and students interested in defence economics, industrial economics, international relations, and industrial policy. The chapters in this book were originally published in various issues of Defense & Security Analysis.

Brown's Nautical Almanac Simon and Schuster
Founded in 1971 by Elizabeth Pepper, the art director of Gourmet magazine for many years, *The Witches' Almanac* is a witty, literate, and sophisticated publication that appeals to general reads as well as hard-core Wiccans. At one level, it is a pop reference that will fascinate anyone interested in folklore, mythology and culture, but at another, it is the most sophisticated and wide-ranging annual guide available today for the mystic enthusiast. Modeled after the *Old Farmers' Almanac*, it includes information related to the annual Moon Calendar (weather forecasts and horoscopes), as well as legends, rituals, herbal secrets, mystic incantations, interviews and many a curious tale of good and evil. Although it is an annual publication, much of the content is both current and timeless - not specific to the date range of each issue. The theme of Issue 39 (Spring 2020 - Spring 2021) is *Stones - the Foundation of Earth*. Also included are articles on: *Celestial Powers: Lightning Gods, Bolts from the Blue; Gargoyles: How to work with the Spirits of the Land; The Art of Embodying Godforms in Ritual; Holy Stones; Borges Beasts* and much more.

Reeds Channel Almanac 2020 Bloomsbury Publishing
The Reeds Eastern Almanac covers the UK east coast from Ramsgate to Cape Wrath including the Shetland and Orkney Islands, and from Nieuport to Delfzijl and Helgoland. It is the complete guide for North Sea mariners, offering ready access to essential navigation information by virtue of its clear layout and user friendly format. Completely updated for 2020, topics include seamanship, pilotage, tide tables, safety procedures, navigation tips, radio, lights, waypoints, weather forecast information around UK and European waters, communications, Mayday and distress procedures. The spiral binding allows the Almanac to be opened flat on the chart table and the large type and clear layout makes information easy to read even in adverse conditions. This handy volume is ideal for anyone cruising the North Sea. Includes a free Reeds Marina Guide. Mediterranean Almanac 2019-20 Simon and Schuster
Now celebrating its eleventh edition, *Ionian* has once again been thoroughly updated with new photos and plans. Covering the coast and islands southwards from Corfu to Finakounda and eastwards to Mesolongion, this much-loved guide contains more detail of many of the smaller anchorages and harbours than are comprehensively covered in *Rod Heikell's Greek Waters Pilot*. Like its companions *West Aegean* and *East Aegean*, *Ionian* is ideal for charterers and flotilla sailors who are onboard for a relatively short time, but also for longer term cruisers on their own yachts who are looking for additional pilotage and background information for this popular cruising ground. As with all the Heikell guides, *Ionian* not only gives all the essential information you need but also exudes the charm and flavour of this corner of the Mediterranean. "Heikell's style is easy to digest and gives pleasure in the details of the history, geography and social circumstances of the places described as well as the essential sailing information." *The Little Ship* "This book, as well as being a practical manual on *Ionian* cruising, seems to have absorbed much of the author's personal feelings regarding the charm which draws him back to it, and any reader who has had a whiff of the magic spell of the Greek islands will sense this, and inevitably renew the resolve to return and experience it once again in greater measure." *Nautical Magazine* "Rod Heikell nowadays is to the Mediterranean as gin is to tonic. It is difficult to imagine sailing there without one of his guides. Clear pilot notes, chartlets and plentiful illustrations, with entertaining commentaries on each place. Up-to-date observations on local and national regulations. The new edition does not disappoint. If one must choose, I would have no hesitation in recommending Heikell." *Cruising Association* "Rod has a knack for dropping in snippets of interest and colour to give the reader a feel for the atmosphere of each port or bay." *Yachting Monthly* "Like all Rod Heikell's pilots, it is also a travel guide in its own right." *Ionian Magazine* "The sailing directions are particularly useful when entering the smaller anchorages and harbours, for which little information is to be found on charts, and include excellent harbour plans and top quality aerial photographs." *Flying Fish Magazine* (*Ocean Cruising Club*)

The expanded third edition of this popular cruising guide encompasses the Greek Dodecanese islands and the Turkish coast eastwards from the Samos Strait to Kas and Kekova. Fully illustrated with up to date plans and numerous new photographs, it is packed with all the essential information for getting to the area, formalities and sailing these beautiful cruising grounds. There is a level of further detail to this coverage in terms of anchorages and other destinations than is found in the Heikell's Greek Waters Pilot and Turkish Waters and Cyprus Pilot. This handy guide also whets the appetite for the local cuisine and culture and gives some historic context to exploration ashore. The fantastic background information with historical and mythological anecdotes gives ... a richness too often missing from bald pilot guides. Royal Cruising Club ... no East Med cruiser will want to sail without a copy. *Yachting Monthly*

For over 150 years the United States Nautical Almanac Office has published *The Nautical Almanac*, first as part of the *American Ephemeris and Nautical Almanac*, and then on its own, to provide the US Navy with a convenient form of the astronomical data used for celestial navigation. This book is still the standard resource for marine celestial navigation for the U.S. Navy. The book is produced in collaboration with Her Majesty's Nautical Almanac Office, part of the U.K. Hydrographic Office. That Office maintains the copyright on the material it produces. *The Nautical Almanac* contains the following data tabulated at hourly intervals to a precision of 0.1 arcminute: the Greenwich hour angle and declination of the Sun, Moon, and navigational planets; the Greenwich hour angle of Aries; positions of the navigational stars; rise and set times of the Sun and Moon for a range of latitudes; and other data. Each edition also contains a sight reduction table; sight reduction formulas; and various correction tables for sight reduction. There is a useful concise sight reduction form at the back of the book. *The Nautical Almanac* is available several months in advance of its edition date.
