Yemen is a country that is critical to U.S. security and our political  
 interests, yet most Americans know virtually nothing about it.  
 This book unlocks its secrets and explains its complexities in  
 simple yet compelling language. • Supplies a deep examination  
 of a country that most policy experts only possess a superficial  
 knowledge of • Provides insights into why tribes have been  
 crucial throughout Yemen's history and even to the modern day •  
 Reveals why characterizations of Yemen as "a weak state,"  
 "lawless," or "lacking a rule of law" are inaccurate and simplistic

A worldwide survey on the place that philosophy occupies in education and culture, based on a large number of documents from dozens of countries and proposals put forward in various international fora. Its main conclusion: although the teaching of philosophy is highly praised in principle, it is neglected in practice. But in an increasingly interdependent and fragmented world, a sound philosophical education is inseparably linked to the issue of freedom. *Public egalement en francais: Philosophie et democratie dans le monde Publicado tambien en espanol: Filosofia y democracia en el mundo*

Television's impact on children is the focus of this document, which includes a review of the research on the subject, a master bibliography containing 3,000 items written between 1955 and the present, and 13 specialized bibliographies. Specific topics addressed include violence and its effects, prosocial television, socialization, television advertising, role portrayals, educational television and cognitive development, audience patterns, viewing processes, and public policy and private action. A bibliography of bibliographies is also included, as well as a listing of materials written since 1975. The items listed in the master bibliography are presented with full bibliographic information and a key line indicating the specialized bibliographies under which that item will be found. Only three of the specialized bibliographies, however, include full bibliographic citations; the rest include only the author and date of publication in order to conserve space. (LLS)

**An International View of Theory and Practice** London : Aslib  
Ready or Not made its mark in 2007 by boldly calling for a field-wide response to the question: "What defines and bounds early care and education as a field of practice?" A dozen years later, this question remains pivotal to the field's understanding of its present and its aspirations for the future. In this updated and expanded edition, Goffin and Washington reunite to examine the major issues that must still be addressed if children are to be given more and better opportunities. This second edition will help everyone whose work impacts the ECE workforce, including those working directly with children, to deepen their commitment to adaptive and systems work and to develop the leadership capacity needed to become change agents. Ready or not, early

childhood education needs to tackle its adaptive challenges. Nothing less will enable it to shift the field's developmental trajectory, fulfill its potential, and satisfy its obligations to children, families, and society. "The second edition of Ready or Not is a reflective self-examination of the field of early care and education. It is a must-read book." —Marquita Furness Davis, Bill & Melinda Gates Foundation "Goffin and Washington boldly identify the barriers and opportunities we face." —Anne Douglass, University of Massachusetts Boston "A must-read for those that are invested in early care and education." —Tracy Ehlert, State Representative for Iowa House District 70, Cedar Rapids, IA "A must-read for everyone who is committed to the field's success." —Ariel Ford, Office of Early Learning, City of Chattanooga

Government Publications: Key Papers is a compilation of papers that covers various topics related to government publications. The book presents materials drawn from a variety of sources, such as public domains, book chapters, and periodicals from different countries. The text contains 61 chapters organized into 15 parts; each part covers a specific area, such as sorting and labeling of publications, library systems, reference services, and municipal and state publications. The book dedicates several parts to British, Canadian, and Australian publications. This book will be of great value to individuals who have an interest in government information.
