Protecting Motherhood Edward Elgar

"Law in Modern Society" is a
comparative study of the place of law in
societies as well as a criticism of social
theory. Under what conditions do
different kinds of law emerge? What are

the bases of the rule of law ideal that
marks advanced liberal, capitalist
societies? What can the study of law
teach us about social hierarchy and
moral vision in these societies, and,
indeed, about the specificity of Western
civilization? Why do we find it necessary
to struggle for the rule of law and
impossible to achieve it? What political
possibilities are closed or opened by
present-day changes in the established

styles of legality and legal thought? Unger deals with these questions in a broad range of historical settings. But he also relates them to the central issues of social theory: the method of explanation, the conditions of social order, and the nature of 'modern' society. The book argues that to resolve its own internal dilemmas the science of society must once again become both metaphysical and political.

This volume collects the insights of the Management Symposium on "Effectiveness, Efficiency and Accountability in Philanthropy - What Lessons can be Learned from the Corporate World?" which was held in spring 2005. It both includes

contributions by individual speakers as well as an edited summary essay of the argument made. The contributions explore the role of foundations in society and their interaction with other sectors, strategic marketing and planning, entrepreneurial approaches, controlling and quality management, as well as evaluation and sustainability considerations. This book offers thoughts and tools for high-impact philanthropy and shows that management in philanthropy can indeed learn from the corporate world, the lack of a bottom line notwithstanding. However, the corporate world can learn from philanthropy how to manage under conditions of uncertainty and nontransparent "markets". Whatever philanthropic institutions do, they will be

held accountable in public for effective contributions to the public good.

Die Arbeit untersucht die Frage, ob der Güterstand der Zugewinnngemeinschaft in seiner durch das Reformgesetz vom 1.9.2009 geänderten Fassung eine adäquate und befriedigende Regelung für den Großteil der Ehen bereithält. Nach einer kritischen Betrachtung der Reformgesetzgebung werden unter Berücksichtigung der jüngeren Geschichte des deutschen Ehegüterrechts und im Vergleich mit entsprechenden Regelungen des französischen und des schweizerischen Rechts konkrete Vorschläge für eine künftige Gestaltung ausgearbeitet. In einem Anhang ist sodann der Wortlaut

der §§ 1353 - 1390 BGB mit den vorgeschlagenen Änderungen wiedergegeben.

The book provides rule-by-rule commentaries on European contract law (general contract law, consumer contract law, the law of sale and related services), dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades, and for an assessment of the current situation. In particular, the production of a bewildering number of reference texts has contributed to a complex picture of European contract

laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts (from the CISG to the Draft Common European Sales Law) are critically examined and compared with each other. As far as the *acquis commun* (ie the traditional private law as laid down in the national codifications) is concerned, the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have, however, been complemented with some chapters, sections, and individual provisions drawn from other sources, primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In addition, the book ties

the discussion concerning the reference texts back to the pertinent historical and comparative background; and it thus investigates whether, and to what extent, these texts can be taken to be genuinely European in nature, ie to constitute a manifestation of a common core of European contract law. Where this is not the case, the question is asked whether, and for what reasons, they should be seen as points of departure for the further development of European contract law.

Family Policies in the Context of Family Change Oxford University Press
This book combines a theoretical and empirical cross-national perspective to examine how societal transformations in European welfare states affect patterns of solidarity between men and women,

and across generations. The authors' research has highlighted substantial discrepancies in various countries between the assumptions made at the macro-level of social policy on family issues and the reality of women's and men's contributions at home. In countries where social policy relies on family solidarity as the main source of support, this may result in growing social inequality. Finally, the chapters reveal the crucial role of women in the transformation of family life and welfare state policy. These conclusions could have important ramifications for European welfare policy. The cross-national perspective allows for a detailed understanding of the similarities and differences between the various European countries and their policies.

Solidarity Between the Sexes and the Generations will appeal to scholars and researchers of social policy, sociology and welfare as well as women and gender studies. Because of its comparative perspective the book is also of interest to those involved in developing social policy in European countries.

Seit der Reform der Juristenausbildung im Jahr 2003 sind anwaltsbezogene Problemstellungen vermehrt Prüfungsstoff im schriftlichen und mündlichen Teil des Zweiten Juristischen Staatsexamens. Ziel ist die Stärkung anwaltlicher Bezüge in der Ausbildung, zumal der überwiegende Teil der Examenskandidaten den Anwaltsberuf ergreift. Den Bänden Anwaltsrecht I und II liegen in der 5. Auflage die aktuellen Pflichtstoffkataloge der Landesjustizverwaltungen und der Lehrplan der Bundesrechtsanwaltskammer zugrunde.

Sie bereiten deshalb optimal auf die Anwaltsstation im Referendariat und die Anwaltsklausuren im 2. Examen vor. "Anwaltsrecht II" behandelt die examensrelevanten Rechtsgebiete des materiellen und formellen Rechts, wobei die Vermittlung anwaltlicher Strategien sowie die Formulierung sachgerechter Anträge und Begründungen im Vordergrund stehen. Die Themen im Einzelnen: - Der Anwalt als Mediator und Schlichter - Der Anwalt im Zivilprozess und im Verkehrszivilrecht - Die Zwangsvollstreckung in der anwaltlichen Praxis - Die Vertragsgestaltung in der anwaltlichen Praxis - Der Anwalt im Familien- und Erbrecht - Der Anwalt im Arbeitsrecht - Der Anwalt als Strafverteidiger - Der Anwalt im Verwaltungsverfahren und

Verwaltungsprozess - Die Steuern bei der Anwaltstätigkeit Die Prüfungsrelevanz des Inhalts und die Qualität der beiden Skripten werden dadurch gewährleistet, dass die Autoren auch Dozenten der von den Rechtsanwaltskammern organisierten Anwaltskurse und teilweise Prüfer im 2. Staatsexamen sind. Die anschauliche Darstellung, zahlreiche Beispielfälle mit Lösungen, Checklisten und einprägsame Klausurtipps sowie examensorientierte Formulierungsvorschläge machen die beiden Bände zu wertvollen Begleitern in der Anwaltsstation und zu zuverlässigen Arbeitsgrundlagen für die Examensvorbereitung.

This work focuses on a specific aspect of

the enforcement of maritime claims, namely judicial sales of ships, a procedure creditors typically resort to in the event of an irreversible default situation. A substantial part of the book approaches the topic from a comparative perspective, the goal being to assess the similarities and differences of the judicial sale procedure between three specific jurisdictions: Belgium, the Netherlands, and England & Wales. In this study, the comparison is used to further analyse the impacts of these differences on the effectiveness and reliability of the judicial sale procedure in each jurisdiction and also forms the basis for assessing the feasibility of harmonising judicial sale procedures and fostering their acceptance. Considering the international character typical of

judicial sales of ships, conflict-of-law questions are very likely to arise during these procedures. Accordingly, the comparative study, where appropriate, is viewed against a private international law background.

The 1950s have passed into the history books as the period of the Federal Republic of Germany's so-called "economic miracle"; yet attention to women's roles in economic reconstruction has until now been negligible. In this book, Erica Carter explores how the development of a "social market economy" after 1949 gave a new centrality to consumers as key players in the economic life of the nation, and, in that process, gave women a new public significance. Public

attention focused in particular on the nation's housewives, who were to train the populace for entry into a new world of consumer prosperity. Carter investigates this focus from two perspectives: in part 1, she tackles the political economy of postwar West German consumption, and in part 2, she looks at representations of the consuming woman across a range of popular cultural forms. Since visual imagery is discussed at length, the book is lavishly illustrated with advertisements, fashion photographs, film stills, and documentary photography from the period. *How German Is She?* also makes a distinctive contribution to questions of national identity. While many historians agree that nationalism was a spent force after 1945, Carter

argues that concepts of nationhood survived in the rhetorics of public policy and in popular culture of the period. In this context, national and efficient consumption became a housewife's duty, not just to husband and family, but to the postwar "nation." The book will be of primary interest to scholars and students in German studies, women's studies, and cultural studies. Erica Carter is Research Fellow in German Studies, University of Warwick.

Uwe Kischel's comprehensive treatise on comparative law offers a critical introduction to the central tenets of comparative legal scholarship. The first part of the book is dedicated to general aspects of comparative law. The

controversial question of methods, in particular, is addressed by explaining and discussing different approaches, and by developing a contextual approach that seeks to engage with real-world issues and takes a practical perspective on contemporary comparative legal scholarship. The second part of the book offers a detailed treatment of the major legal contexts across the globe, including common law, civil law systems (based on Germany and France, and extended to Eastern Europe, Scandinavia, and Latin America, among others), the African context (with an emphasis on customary law), different contexts in Asia, Islamic law and law in Islamic countries (plus a brief treatment of Jewish law and canon law), and transnational contexts (public

international law, European Union law, and lex mercatoria). The book offers a coherent treatment of global legal systems that aims not only to describe their varying norms and legal institutions but to propose a better way of seeking to understand how the overall context of legal systems influences legal thinking and legal practice.

Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic

Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the

preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

Applications of Gene-Based Technologies for Improving Animal Production and Health in Developing Countries University of Michigan Press

In the past few decades, scientists of human nature—including experimental and cognitive psychologists,

neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations.

He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Making Peace provides a fresh context for understanding gender relations in interwar Britain, seeing in the emergence of a powerful ideology of motherhood and a reemphasis on separate spheres for men and women a corollary to the political and economic restructuring designed to reestablish social order after World War I. The war had often been explained and justified to

the British public by means of images that portrayed women as hostile or frightening—or as victims of sexual assault, as in the Belgian atrocity stories. These sexualized interpretations of war then shaped postwar understandings of gender, as psychiatrists, psychologists, and sexologists drew on metaphors of war to talk about relationships between men and women, likening any conflict between the sexes to the terrible chaos of the war years. Drawing on materials from posters to popular songs, from government reports to journalistic accounts, from memoirs and novels to diaries and letters, *Making Peace* is a penetrating analysis of how gendered and sexualized depictions of wartime experiences compelled many Britons to seek in traditional gender arrangements

the key to postwar order and security. In the interwar period, many feminists compromised their earlier positions in an effort to contribute to postwar recovery, and justified their demands—for birth control and family endowment, for example—in conservative terms that ultimately hampered their movement. Susan Kingsley Kent is Associate Professor of History at the University of Colorado at Boulder. She is also the author of *Sex and Suffrage in Britain, 1860-1914* (Princeton). From amassing sacred relics to collecting celebrity memorabilia, the impulse to hoard has gripped humankind throughout the centuries. But what is it

that drives people to possess objects that have no conceivable use? To Have and To Hold is a captivating tour of collectors and their treasures from medieval times to the present, from a cabinet containing unicorn horns and a Tsar's collection of teeth to the macabre art of embalmer Dr. Frederick Ruysch, the fabled castle of William Randolph Hearst, and the truly preoccupied men who stockpile food wrappers and plastic cups. An engrossing story of the collector as bridegroom, deliriously, obsessively happy, wed to his possessions, till death do us part.

Judicial Review of Commercial Contracts

This is the first systematic comparative study into how consumer ADR systems (usually ombudsmen and médiateurs) work, the differing national architectures within which they operate and how they can be improved. It describes ADR schemes in Belgium, France, Germany, Lithuania, the Netherlands, Poland, Slovenia, Spain, Sweden and the United Kingdom as well as emerging pan-EU dispute resolution schemes. Use of the techniques of mediation, conciliation and adjudication are noted. It also covers EU measures on consumer ADR, and 2011 proposals for legislation on ADR and ODR. Data on volumes, cost and duration of ADR schemes are compared,

both between different systems and with courts. The authors' findings underpin EU and national developments, and outline options for future policy. Findings and proposals are included for the functions, scope, performance, essential requirements, architecture and operation of ADR systems. The relationships between ADR, courts and regulators are discussed, and need for reforms are noted. This is a ground-breaking work that will have a major impact on European legal systems.

The break-up of BAA and the blocked takeover of Bratislava airport by the competing Vienna airport have brought the issue of airport competition to the top of the agenda for air transport policy in Europe. Airport Competition reviews the current state of the debate and asks whether airport competition is strong enough to effectively limit market power. It provides evidence on how travellers chose an airport, thereby altering its competitive position, and on how airports compete in different regions and markets. The book also discusses the main policy implications of mergers and subsidies.
