emergency lights are in good working condition. This template can be used by maintenance teams to document and report any defects identified. The template has been built to guide the inspector to perform the following: Best 3 Emergency Light Testing Templates [Free Download] Periodic Inspection Report issued. Where applicable and where visible, the serial number and/or date of the most recent report should be recorded in the space provided. 2) Full duration tests involve discharging the batteries,

so the emergency lighting system will not be fully functional until the batteries have had time to recharge for this reason, always carry out testing.

EMERGENCY LIGHTING PERIODIC INSPECTION AND TESTING CERTIFICATE

Fixed Wire Testing (also referred to as Periodic Inspection Report) is a procedure that's undertaken to evaluate and report on the condition of an electrical installation to help ensure its safety. Therefore, the Health and Safety Executive (HSE) recommend periodic electrical inspections and testing should be undertaken at all places of work.

Electrical Installation Condition Report, EICR (Periodic ...)

Frequently, inspectors find that emergency lighting units have been installed and subsequently forgotten. Most emergency lighting units use batteries, which have a limited life span, and are subject to failure without warning. The "charging" light may be lit on the units, but this does not guarantee the lights will come on when the power fails.
