BARTLETT BENJAMIN

A Treatise of the Relative Rights and Duties of Belligerent and Neutral Powers. ... Reprinted from the Original Edition, with a Preface by Lord Stanley of Alderley, and an Appendix Oxford University Press, USA
Against an ever-expanding and diversifying 'rights talk', this book re-opens the question of obligation from not only legal but also ethical, sociological and political perspectives. Its premise is that obligation has a primacy ahead of rights, because rights attach to practices and modes of being that are already saturated with obligations. Obligations thus lie at the core not just of law but of community. Yet the distinctive meanings, range and situations of obligation have tended to remain under-theorised in legal scholarship. In response, this book examines the sense in which we are multiply 'bound beings', to law and legal institutions, as much as we are to place, community, memory and the various social institutions that give shape to collective life. Sharing this set of concerns, each of the international group of scholars contributing to this volume traces the specificity of the binding force of obligations, their techniques and modes of expression, as well as their centrally important role in giving form to lawful relations. Together they provide an innovative and challenging contribution to legal scholarship: one that will also be of relevance to those working in politics, philosophy and social theory.

This book provides a comprehensive analysis of the content, scope, and function of due diligence across various areas of international law. Looking at current tendancies towards proceduralisation and more proactive risk management, it reveals the promises and limits of due diligence as a concept for enhancing accountability and compliance.
Status of Forces: Criminal Jurisdiction over Military Personnel Abroad State University of New York Press
This book examines the notion of a law of obligations as a conceptual category in itself; and, in doing this, it presents the foundational material in a context that draws on some comparative and theoretical ideas while, at the same time, emphasising the special characteristics of the common law. The book is specifically designed to act as an introduction to the legal research skills of reasoning and method. It also looks at the foundations of civil liability in a way that emphasises the interrelationship of source materials, problem solving and conceptual analysis and justification.
Due Diligence in the International Legal Order Routledge
The Association Henri Capitant des Amis de la Culture Juridique Française and the Société de législation comparée joined the academic network on European Contract Law in 2005 to work on the elaboration of a "common terminology" and on "guiding principles" as well as to propose a revised version of the Principles of European Contract Law (PECL). The results of this work were sent to the European Commission and have already been published in French. The English translation is now being published by sellier.elp. This work could contribute to the wider European project. The part on the guiding principles could be a component of the CFR, in the form of "black letter" model rules or recitals. The part on terminology is, in itself, useful for the elaboration of the final various linguistic versions of the CFR. It finds its place within the materials which will accompany the model rules. Last but by no means least, the revised version of the PECL should be considered by the European institutions as an alternative set of model rules on contract law.

This comprehensive book provides a comparative overview of legal institutions that intersect with everyday life: contracts, unilateral legal transactions, torts, negotiorum gestio and unjust enrichment. These institutions form the core of the Law of Obligations, which is examined in this book from the perspective of all major legal traditions including Civil, Common, Islamic and Chinese law.
Multiple Nationality And International Law Walter de Gruyter
The 2005 Avant-projet de réforme du droit des obligations et de la prescription, also dubbed the Avant-projet Catala, suggests the most far-reaching reform of the French Civil code since it came into force in 1804. It reviews central aspects of contract law, the law of delict and the law of unjustified enrichment. There is currently a very lively debate in France as to the merits or the demerits of both the particular draft provisions and the general idea of recodification as such. This volume is the first publication to introduce the reform proposals to an English speaking audience. It contains the official English translation of the text, and distinguished private lawyers from both England and France analyse and assess particularly interesting aspects of the substantive draft provisions in a comparative perspective. Topics covered include negotiation and renegotiation of contracts, la cause, the enforcement of contractual obligations, termination of contract and its consequences, the effects of contracts on third parties, the definition of la faute, the quantification of damages, and the law of prescription. The volume also contains an overall assessment of the draft provisions by one of the most senior French judges who chaired the Working Party on the Avant-projet, established by the French Supreme Court, the Cour de cassation. The book is indispensable for comparative private lawyers and lawyers with a particular interest in French law. It is also of use to all private lawyers (both academics and practitioners) looking for information on recent international and European trends in contract and tort.

The current controversy over the teaching of values and the role of religion in our public schools is an important and much discussed topic. Stock-Morton's work represents not only a valuable historical investigation, but a useful resource for the review and consideration of our present-day dilemma. France is the only country which has attempted to teach an official secular morality and Stock-Morton's is the first study to describe and trace the development of that effort. During the nineteenth century, the impetus for a practical, secular moral teaching arose, primarily through the concern of those who sought the liberalization of French society and politics. The educational dilemma faced at that time arose from the opposition of the Catholic Church to liberal government. Gradually liberals and radical reached a consensus on the necessity of teaching ethics in the schools while eliminating the presence of the clergy. Their solution and its philosophical basis were anchored in the Enlightenment and the Revolution, but developed in the context of nineteenth-century political and philosophical change. In the 1880s, when the republicans were able to inaugurate universal, free, and secular education, secular ethics became a required course for all. The history of morale laique is significant at a time when our own country is rife with controversy over the role of religion and the teaching of values in the schools. Stock-Morton's thoughtful study represents an important contribution to the literature for those concerned with these significant issues.

Many important economic and political debates today refer to the nature and the role of the State: should governments intervene in the economy and interfere with the operation of markets? In which occasions, and how? In order to better understand these questions and the controversies they have raised, this book re-considers the debates crucial for the issues at stake, the most important schools of thought, and the central concepts in an historical perspective. After a tribute to Sir Alan Peacock and the first publication of two hitherto unpublished papers written in the 1950s, the chapters focus on important developments that occurred in Europe during the 19th and early 20th centuries. The final part includes contributions on public economics after World War II, focusing on concepts such as merit goods, externalities and the “Coase theorem”. This book was originally published as a special issue of The European Journal of the History of Economic Thought.

The focus of this edited volume is the often-overlooked importance of secondary rules of international law. Secondary rules of international law-such as attribution, causality, and the standard and burden of proof-have often been neglected in scholarly literature and have seen fragmented application in international legal practice. Yet the systemic nature of international law entails that coherent and consistent application of such rules is a key element in reinforcing the legitimacy of decisions of international courts and tribunals. Accelerated development of international law and international litigation, coupled with the fragmented nature of the adjudicatory terrain calls for theoretical scrutiny and systemic analysis of the developments in the judicial treatment of secondary rules. This publication makes three important contributions to the study of secondary rules. First, it offers a comprehensive, expert doctrinal analysis of how standard of review, causation, evidentiary rules, and attribution operate in the case law of international courts or tribunals in fields spanning human rights, trade, investment, and humanitarian law. Second, it comparatively evaluates the divergent layers of meanings and normative expectations attached to secondary rules in international law scholarship as well as in the judicial practice of international courts and tribunals. Finally, the book investigates the role that secondary rules play in the development of the primary rules in international law and for the legitimacy of the decisions of international courts and tribunals. Earlier scholarly works have not problematized the role of secondary rules of international law in adjudication thoroughly. Secondary Rules of Primary Importance in International Law seeks to fill this gap by emphasizing the consequential nature of these secondary rules and argues that the outcome of litigation is fundamentally shaped by the exact standard of proof, standard of review, or attribution basis that is chosen by adjudicators. As such, the book offers an important resource for the study and practice of international law against the backdrop of the wide-ranging and fragmented nature of international adjudication.

Professor David Pugsley is a man of many talents as well as a paradox. Although he may appear to some to be typically English, this is to overlook his cosmopolitan side. David Pugsley is a well known English Romanist and comparative lawyer who taught for many years at Exeter University, as well as in many other places in the world. In this book, specially dedicated to him, his friends and colleagues pay tribute through a series of papers on comparative law and the history of law. Le Professeur David Pugsley, homme aux multiples talents, incarne un paradoxe. Pur produit de l’intelligentia britannique, de prime abord, on le découvre farouchement cosmopolite. David Pugsley est bien connu comme un spécialiste anglais du droit romain; il est aussi un juriste renommé en droit comparé. Il a enseigné durant de nombreuses années à l’Université d’Exeter, ainsi qu’en de nombreux endroits dans le monde. Dans cet ouvrage, ses amis et collègues lui rendent hommage, au travers d’une série de contributions dans les domaines du droit comparé et de l’histoire du droit qui lui sont particulièrement chers. This book brings into focus the legal status of armed forced on foreign territory within, inter alia, the context of multi-national exercises and a variety of so-called crisis management operations. When it comes to criminal offences committed by military personnel while abroad it is important to know whether such offences fall under the criminal jurisdiction of the Sending State or that of the Host State. The book analyses this question from two different perspectives, namely traditional public international law and military operational law. Taking his readership through two hundred years of international practice the author arrives at the current practice of laying down the status of forces deployed abroad in so-called Status of Forces Agreements (SOFAs). Having looked at SOFAs from the two different law perspectives the author proposes the development of a “Status of Forces Compendium” to serve as a kind of guideline for future SOFAs. The author’s intention in proposing this idea is to instigate further discussion on the subject in public international law and criminal law circles and among armed forces’ legal advisors. Joop Voetelink is an Associate Professor of Military Law at the Netherlands Defence Academy.

This book is a comprehensive overview of multiple nationality in international law, and contains a survey of current State practice covering over 75 countries. It examines the topic in light of the historical treatment of multiple nationality by States, international bodies and commentators, setting out the general trends in international law and relations that have influenced nationality. While the book's purpose is not to debate the merits of multiple nationality, but to present actual state practice, it does survey arguments for and against multiple nationality, and considers States' motivations in adopting a particular attitude toward the topic. As a reference work, the volume includes a detailed examination of the nature of nationality under international law and the concepts of nationality and citizenship under municipal law. The survey of State practice also constitutes a valuable resource for practitioners.

The book is an adaptation of part of the author's PhD thesis, which won the international prize Prémio FIBE, and was voted one of the three best in Brazil, in the field of Law, in 2023. It deals with the history of the notion of abuse of rights, in its two traditions: the Franco-Belgian (abus de droit) and the German (unzulässige Rechtsausübung). It also presents the discourse of abuse of rights with a 'shortcut' function. Finally, it places the scientific formulation of groups of cases as necessary for the proper use of the abuse of rights discourse. Drawing on literary theory and canonical French literature, Reading Unruly examines unruliness as both an aesthetic category and a mode of reading conceived as ethical response. Zahi Zalloua argues that when faced with an unruly work of art, readers confront an ethical double bind, hesitating then between the two conflicting injunctions of either thematizing (making sense) of the literary work, or attending to its aesthetic alterity or unreadability. Creatively hesitating between incommensurable demands (to interpret but not to translate back into familiar terms), ethical readers are invited to cultivate an appreciation for the unruly, to curb the desire for hermeneutic mastery without simultaneously renouncing meaning or the interpretive endeavor as such. Examining French texts from Montaigneês sixteenth-century Essays to Diderotês fictional dialogue Rameauês Nephew and Baudelaireês prose poems The Spleen of Paris, to the more recent works of

Jean-Paul Sartreês Nausea, Alain Robbe-Grilletês Jealousy, and Marguerite Durasês The Ravishing of Lol Stein, Reading Unruly demonstrates that in such an approach to literature and theory, reading itself becomes a desire for more, an ethical and aesthetic desire to prolong rather than to arrest the act of interpretation. ¾

This book provides a reappraisal of the role of nationality in international law, taking into account recent trends and developments. The book features contributions from a range of experts offering a variety of approaches to the topic. Within public international law the book explores nationality in relation to a number of key topics including: nationality as a human right; statelessness in the context of state succession; diplomatic protection and trade in services. While most of the contributions address public international law the book also considers the evolving role of nationality in private international law as well as issues surrounding nationality and regional integration.
