The articles in this volume have been written in memory of the feminist biblical scholar, Fokkelien van Dijk-Hemmes, who died at the early age of 50. The authors endeavour to continue and advance the dialogue with her by evaluating and interacting with her scholarly legacy. Their concern is with various aspects of her work on the Hebrew Bible, and they respond in particular to the feminist hermeneutics she developed for reading biblical texts. Several articles test her method in application to specific prophetic texts. Other contributions focus on aspects of the role of women in the cults of Ancient Israel. A third group of essays confronts Fokkelien van Dijk-Hemmes' approach with more traditional ways of biblical interpretation. This book is an important contribution to the ongoing debate on feminist insights into aspects of the literature, culture and religion of Ancient Israel.

Nature is in many different ways a pool for the productive human being, but also a counterpoint to his/her own work. This book offers a richly illustrated overview of the history of nature in architecture, civil engineering and art.

"In novels written at the end of the long nineteenth century, women in Germany and Austria engaged with some of the most pressing social questions of the modern age. Charlotte Woodford analyses a wide range of such works, many of them largely forgotten, in the context of the contemporary cultural discourses that informed their creation, such as writings on pacifism and socialism, prostitution, birth control and sexually transmitted diseases. Women's experience of contemporary medicine as patients and doctors is a fascinating theme, treated here by several authors. Through a close reading of works by Marie von Ebner-Eschenbach, Minna Kautsky, Gabriele Reuter, Helene Bohlau, Ilse Frapan, Hedwig Dohm, Lou Andreas-Salome, and others, this study shows how writers' determination to validate women's experience of the problems of

modernity informed the aesthetic development of the novel by women."

Presents diverse, international, in-depth case studies. While there are many books showcasing graphic design work, few present in-depth projects, exploring concept, designerAEs strategy, visual problem-solving, and specifics, illustrating the concrete use of design principles to achieve intended communication goals. As a result, readers are often left with only a surface understanding of how a project might have evolved or how the visual aspects of its design are brought together to convey its intended message. The case studies in Design Evolutioncomprehensively demonstrate the real-world application of visual principles discussed in a more formal, educational context. Readers will understand how the principles for image, layout, type, and color explored in volume 1, Design Elements, work in combination, to execute the overall solutions showcased in this volume. The depth and range of content presented in these case studies distinguishes this book from all others in the design showcase genre -- offering readers a chance to not only be inspired by the quality and innovation of showcased projects, but to

understand how they were realized.

Bislang gab es nur eine schmale Auswahl aus dem dichterischen Werk des genialen walisischen Rimbaud. Mit dieser Ausgabe wird zum ersten Mal das ganze Panorama der ungestümen Begabung von Dylan Thomas sichtbar: die Mythologie seines Selbst und der Landschaft, deren Märchen und Mythen der Stoff seiner Gedichte sind. Klaus Martens setzt den Grundton für eine Übersetzerische Vielstimmigkeit, die überraschend viele neue Töne zur Sprache bringt.

Opera After the Zero Hour: The Problem of Tradition and the Possibility of Renewal in Postwar West Germany presents opera as a site for the renegotiation of tradition in a politically fraught era of rebuilding. Though the "Zero Hour" put a rhetorical caesura between National Socialism and postwar West Germany, the postwar era was characterized by significant cultural continuity with the past. With nearly all of the major opera houses destroyed and a complex relationship to the competing ethics of modernism and restoration, opera was a richly contested art form, and the genre's reputed conservatism was remarkably multi-faceted. Author Emily Richmond Pollock explores how composers developed different strategies to make new opera "new" while still deferring to historical conventions, all of which carried cultural resonances of their own. Diverse approaches to operatic tradition are exemplified through five case studies in works by Boris Blacher, Hans Werner Henze, Carl Orff, Bernd Alois Zimmermann, and Werner Egk. Each opera

alludes to a distinct cultural or musical past, from Greek tragedy to Dada, bel canto to Berg.

Pollock's discussions of these pieces draw on source studies, close readings, unpublished correspondence, institutional history, and critical commentary to illuminate the politicized artistic environment that influenced these operas' creation and reception. The result is new insight into how the particular opposition between a conservative genre and the idea of the "Zero Hour" motivated the development of opera's social, aesthetic, and political value after World War II.
