Africa's Geography presents a comprehensive exploration of the world's second largest and most culturally diverse continent. Author Benjamin Ofori-Amoah challenges common misconceptions and misrepresentations of Africa from a geographical perspective, harnessing the power of modern geographic mapping technology to explore this unique continent. This text provides thorough coverage of the historical, cultural, economic, and political forces that continue to shape Africa, applying geographic context to relevant past and contemporary issues. Coverage of economic development, climate and biogeography, transportation and communication, manufacturing and commerce, and mining and agriculture provides foundational knowledge of this vast and complex continent. Ideally suited for multiple areas of classroom study, this text offers an effective and flexible pedagogical framework. Coverage of the entirety of Africa enables students to develop a cohesive portrait of the continent as a whole and identify the dynamism of its nations, cultures, and economies. Engaging and accessible narrative strengthens comprehension, while examples of historical and contemporary events increase student interest. Innovative and unique, Africa's Geography is an essential resource for cross-disciplinary investigation of this fascinating part of the world.

[National Geographic Almanac of Geography](#) Univ of California Press

Presents a geographical reference text of the world, with maps, charts, and photographs.

[The National Geographic Desk Reference](#) John Wiley & Sons

A geographical almanac, discussing historical, physical and human geography.

[The World Factbook](#) Elsevier

Records the life histories of three of the author's African students during her tenure as director of an education program in Africa. The collection allows Tanzanian youth to speak for themselves and provides glimpses into their home and school life.

What is mathematics, and what aspects of it should be taught in schools? How and to whom should it be taught, and how should its understanding be assessed? These questions continue to drive curriculum development, school organization, teaching methods, and research agendas. No one today doubts that mathematics should be taught in our schools, but this was not always so. Mathematics Education Across Time and Place aims to help mathematics teachers, teacher educators, and anyone else interested in mathematics education appreciate the path this discipline has taken through the ages. To understand the historical and social context for schools and the place of mathematics within them, we meet a variety of mathematics educators from different times and places. Though fictional, their lives and social circumstances are based on historical documents and professional sources. They range from ancient Greece to modern Zimbabwe; from Persia to British Columbia; from Islamic Baghdad to revolutionary Paris; from Elizabethan England to twentieth-century New York; and from the rural one-room schools of North America to the modern comprehensive secondary school. By sharing the teachers' lives, we come to understand how they developed their love for teaching mathematics, and how their work fit into the larger social context of their time.

In Growing up with Tanzania. Karim Hirji, a renowned Professor of Medical Statistics and Fellow of the Tanzania Academy of Science, presents a multi-faceted, evocative portrait of his joyous but conflicted passage to adulthood during colonial and early-Uhuru Tanzania. His smooth style engages the reader with absorbing true tales, cultural currents, critical commentary and progressive possibilities. By vibrantly contrasting the hope-filled sixties with the cynical modern era, he also lays bare the paradoxes of personal life and society, past and present.

Some Basic Facts about Education in Tanzania African Books Collective

The growth of global urbanization places great strains on energy, transportation, housing and public spaces needs. As such, transport and land use are inextricably linked. Urban Form and Accessibility: Social, Economic, and Environment Impacts consolidates key insights from multidisciplinary perspectives on the relationship between urban form and transportation planning. Synthesizing the latest cutting-edge research, the book translates academic evidence into practice. Starting with an overview of the key concepts relevant to each discipline, the book covers critical elements such as governance, travel behavior, and technological disruption, showing how to move towards a more sustainable society for all city inhabitants. Draws on evidence-based success stories from countries around the globe Gathers global leading thinkers to provide the state-of-the-art on the topic Examines social, economic, and environmental impacts within each chapter Each chapter's content will have the same structure for easier discoverability

Drawing on a wide range of oral and written sources, this book tells the story of Tanzania's socialist experiment: the ujamaa villagization initiative of 1967–75. Inaugurated shortly after independence, ujamaa ('familyhood' in Swahili) both invoked established socialist themes and departed from the existing global repertoire of development policy, seeking to reorganize the Tanzanian countryside into communal villages to achieve national development. Priya Lal investigates how Tanzanian leaders and rural people creatively envisioned ujamaa and documents how villagization unfolded on the ground, without affixing the project to a trajectory of inevitable failure. By forging an empirically rich and conceptually nuanced account of ujamaa, African Socialism in Postcolonial Tanzania restores a sense of possibility and process to the early years of African independence, refines prevailing

theories of nation building and development, and expands our understanding of the 1960s and 70s world.

Diversified Secondary Education and Development National Geographic Society

International NGOs are increasingly important players within the new aid architecture but their geographic choices remain uncharted territory. This book focuses on patterns of development assistance, mapping, while analysing and assessing the country choices of the largest international NGOs. Koch's approach is interdisciplinary and uses qualitative, quantitative and experimental methods to provide a clear insight in the determinants of country choices of international NGOs. The book aims to discover the country choices of international NGOs, how they are determined and how they could be improved. This work, which uses a dataset created specifically for the research, comes to the conclusion that international NGOs do not target the poorest and most difficult countries. They are shown to be focussing mostly on those countries where their back donors are active. Additionally, it was discovered that they tend to cluster their activities, for example, international NGOs also have their donor darlings and their donor orphans. Their clustering is explained by adapting theories that explain concentration in for-profit actors to the non-profit context. The book is the first on the geographic choices of international NGOs, and is therefore of considerable academic interest, especially for those focusing on development aid and third sector research. Furthermore, the book provides specific policy suggestions for more thought-out geographic decisions of international NGOs and their back donors. *Dictionary Catalog of the Map Division* National Geographic Society

Education in East and Central Africa is a comprehensive critical reference guide to education in the region. With chapters written by an international team of leading regional education experts, the book explores the education systems of Djibouti, Eritrea, Ethiopia, Kenya, Somalia, South Sudan, Tanzania, Uganda, Zambia, Angola, Burundi, the Central African Republic, the Democratic Republic of Congo, Equatorial Guinea and Sao Tome, Gabon, the Republic of Congo and Rwanda. The book critically examines the regional development of education provision in each country as well as recent reforms and global contexts. Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets, this handbook is an essential reference for researchers, scholars, international agencies and policy-makers at all levels.

Arbetsrapport Syracuse University Press

This text provides a systematic, thematic approach to the multifaceted aspects of the physical and human geography of Sub-Saharan Africa. Designed to fill the void between the available synoptic and descriptive volumes and highly-specialized texts that are customized for specific topics on Africa, it presents a variety of geographic concepts and theories in clear language - and uses significant detail, case studies, and examples to show how they relate to real-world situations in Sub-Saharan Africa.

*Offers a systematic, thematic approach: - Begins with a general overview of Sub-Saharan Africa's physical environment, its colonial history, and its people and cultures. - Then examines a variety of themes - all with a development emphasis - associated with the regions human geography: e.g., its population geography, medical geography, urban geography, gender inequality, agricultural and industrial development, and political geography.

*Provides self-contained chapters - each presenting key definitions and basic geographic principles, and then discussing the relevant geographic themes, concepts, and issues within the context of Sub-Saharan Africa. *Features comprehensive coverage on re

Journal of the Geographical Association of Tanzania African Books Collective

A Son of Two Countries is a story of struggle for education. Born in 1946 in Rwanda under Belgian colonial rule, the author recounts his early education in Rwanda and later as a refugee in Tanzania. He was naturalized as a Tanzanian citizen in 1980 while doing his undergraduate studies at the University of Dar es Salaam. As he struggled to get education, the author was also grappling with his refugee status, with all the challenges that it entailed. The book gives insights into the contradictions of colonial and post-colonial education, as well as the authors reflections on education in Tanzania, given his long experience in the education sector in that country. Finally, we get some glimpses into the dual identity of the author as a Tanzanian citizen of Rwandan origin and how this shaped his relationship with the two countries he calls home. As he aptly puts it, Rwanda gave me my heart; Tanzania gave me my brain. I find it difficult to choose between my heart and my brain.

Geography of Sub-Saharan Africa Infobase Publishing

This volume seeks to provide a sense of purpose and order to the study of political geography. The editors devise a conceptual structure for the field, bringing political geography into line with trends in contemporary geography as a whole and with other social sciences. Not only do the selections contain a wide variety

of contributions from other fields, but the introductory essays and annotated bibliographies suggest related research. The structure of the book enjoys close parallels in other social sciences. The organization of the book reflects the editors' definitions and structuring of political geography. Part I, "Heritage," includes works that have contributed to the theoretical development of the field. Part II, "Structure," comprises the concern to which political geographers have devoted most of their past attention. Parts III and IV, "Process" and "Behavior," form the subject where much future theoretical and practical effort is needed. Part V, "Environment," provides the context in which spatial structure, process, and behavior occur. The Structure of Political Geography includes selections from sociobiology, history, international relations, political economy, political science, social psychology, and sociology. The classics in the field are an essential inclusion since the book would be incomplete without them. The selections in the volume, originally published in 1971, remain useful and pertinent to political geographers of diverse persuasion and to social scientists interested in geographical approaches. The fact that there is a clear focus and conceptual interdependence in political geography is the volume's greatest contribution.

Growing Up With Tanzania Crown

The State of the African Cities 2010 goes above and beyond the first report, which provided a general overview of housing and urban management issues in Africa. With the subtitle: Governance, inequity and urban land markets, the report uncovers critical urban issues and challenges in African cities, using social and urban geography as the overall entry points. While examining poverty, slum incidence and governance, the report sheds more light on inequity in African cities, and in this respect follows the main theme of the global State of the World's Cities 2010 report. Through a regional analysis, the report delves deeper into the main urban challenges facing African cities, while provoking dialogue and discussion on the role of African cities in improving national, regional and local economies through sustainable and equitable development. The report has been drafted in cooperation with Urban Land Mark. Through an analytical survey of several African cities, the report examines urban growth, social conditions in slums, environmental and energy issues and, especially, the role of urban land markets in accessing land and housing.
