In this book a homophone is a word which sounds the same as another word but has a different spelling or meaning. An emphasis on reading helps students learn homophones in context. To correct chronic mistakes, some reinforcement in the form of grammar exercises may be necessary, to which end, several short drills are included in this book. The text also contains a number of homophone stories to provide practice in familiarising students with many of the homophones lurking in the English language. These are arranged in order of progressing difficulty, depending on factors of length, number of corrections and subject matter. This collection of ready-to-use, reproducible pencil-to-paper worksheets are ideal for enrichment or for use as reinforcement. Perfect for use at school or as homework, this packet contains several fun activities that will give your students practice with synonyms, antonyms, homophones, and rhymes. *Teaching Kids about Homophones and Homographs* Learn on the Go Practice Books Kids still need to know homophones, since spelling checkers don't differentiate between words like "deer" and "dear". This book will help children learn the spelling and meaning of various homophones, while at the same time, improving their reading and thinking skills. Each of the five sections of the book, takes thirteen to twenty-one homophone pairs or triplets, with seven activity sheets per section. The first activity in each section asks children to look up each homophone on the list, and write the word and its' definition. The second activity is a matching activity, in which homophones are matched from two columns, and written together on the lines. Having to write the words together will help children learn these homophone relationships. The third activity is a pairing activity, where the children are to read a group of two or three sentences, and underline the common homophones. This activity will help them recognize the homophones, from context, and improve reading skills. The fourth activity is a series of riddle and context clues that requires them to learn the correct spelling for the intended word. This will improve spelling and analytical skills. The fifth activity is a choosing activity. The children have the opportunity to choose the correct homophone, from the words in parentheses, and write it in the blank space provided in each sentence. The sixth activity is crossword puzzles. Again, analytical skills will be practiced, and since it is necessary to fit the answers into a certain amount of spaces, spelling skills should be improved. The seventh activity is a story or letter, in which the most logical homophone will be written into each blank. This is probably the most difficult activity, but children should be familiar enough with

the homophone groups to complete these pages. I've programmed each section, from the easiest to hardest activities, which should help promote gradual learning, building block style. If children learn these homophones well, they will provide an important part of the foundation for their written communication skills.

Teaching Kids about Homophones and Homographs is a resource by Habakkuk Educational Materials meant to help students learn the difference between the words homonyms, homophones, homographs, and heteronyms. Through the use of colorful illustrations and sentences where the key words are used in context, students will learn to differentiate between homophones like rain, reign, and rein and two, too, and to. Reproducible worksheets are also available for individual practice and to assess student learning, and an answer key is available at the back of the book. Kids will discover that homophone words are a type of homonym but that not all homonyms are spelled differently. For example, ruler is also a homonym, pronounced \rū-ler\, because it can refer to either a measuring tool or to a leader. In addition, they will learn that not all words that are spelled alike have the same meaning or pronunciation, as in the homographs (heteronyms) dove, referring to a bird, and dove, the past tense of dive. The definitions on the following page summarize the differences between the words homonym, homophone, homograph, and heteronym.
