TORRES MELISSA

Cars & Parts Taylor & Francis

This book comprehensively covers the interplay between cultural and legal globalization and the impact this has on contract law, with a particular focus on state contracts within the MENA region. The book discusses the roles assumed by Supreme Courts in Egypt and MENA countries in creating unified principles of international contract law in states' contracts which are consistent with international commercial contracts' principles. It makes a powerful argument for further harmonization of contract law in the area, and how this can be achieved. The book forms a case study of how international harmonization can be achieved through a number of routes, such as codification, digitalization of processes and contracts, private-public arbitration, and further use of international instruments. It also considers the implications of comparative European law, convention law, and other legal domains, particularly international standards, on contract law in

the MENA region. The book suggests how international legal standards can be integrated within contract law, and how a harmonious contract law framework can thus be achieved. Through analyzing ICSID case law, the book argues that unification of contract law principles in the MENA region is a considerable step towards achieving legitimate expectations of foreign investors. It argues, further, that global contract law is underway. The book will be of interest to students and scholars in the field of international contract law, public law, and international law in Egypt and MENA countries.

Casebook to accompany Foundations of Financial Management Taylor & Francis

This book constitutes the refereed proceedings of the fourth Asian Semantic Web Conference, ASWC 2009, held in Shanghai, China, in December 2009. The 35 revised full papers presented were carefully reviewed and selected from 63 submissions. These submissions cover a broad range of topics including, query languages and optimization, rule and logics, scalable reasoning, semantic content generation, database and semantics, semantic web services, eSemantics (e.g., e-Business, e-Science, e-Learning, e-Culture, e-Health), social web and semantics, semantic graph

mining, security for semantic web, ontology modeling, ontology management, to name a few. [M.T.A. Official Journal](#) Copyright Office, Library of Congress
 These 29 cases, written by the authors, are ideal for in-depth analysis and facilitate an integrated understanding of the topics presented in the book.
Statutes and Decisions Pertaining to the Federal Trade Commission McGraw-Hill/Irwin
 The Annual Asian Semantic Web Conference is one of the largest regional events in Asia with focused topics related to the Semantic Web. With the decade-round endeavor of Semantic Web believers, researchers and practitioners, the Semantic Web has made remarkable progress recently. It has raised significant attention from US and UK governments, as well as the European Commission who are willing to deploy Semantic Web technologies to enhance the transparency of eGovernment. The Linked Open Data initiative is on its way to convert the current document Web into a data Web and to further enabling various data and service mashups. The fast adoption of Semantic Web technologies in medical and life sciences has created impressive showcases to the world. All these efforts are a crucial step toward enabling the take-off and the success of the

Semantic Web. The First Asian Semantic Web Conference was successfully held in China in 2006. With the following editions in Korea in 2007 and Thailand in 2008, it fostered a regional forum for connecting researchers and triggering innovations. This year, the 4th Asian Semantic Web Conference was held in Shanghai, China. We received 63 submissions from Asia, Europe, and North America, and 25 papers were accepted (the acceptance rate is around 40%). Each submission was reviewed by at least three members of the Program Committee. The Chairs moderated the discussion of conflict reviews or invited external reviewers to reach the final decisions.

Casebook for Use with Foundations of Financial Management BPB Publications

Presenting readers with all the need-to-know information on complex construction projects within a single publication, this book expertly focuses on practical issues whilst also providing insights on the law applying to construction projects. As well as exploring individual subjects such as the negotiation of a contract, the evaluation of a claim or assistance in relation to contractual disputes, the book also creates an overarching understanding of the entire life of a project. It presents an inside view on the various stages of complex projects, from the moment they are conceived to the end of the contractual relation between employer and contractor, including any disputes between the parties. The reader will become familiar with the terminology used in the construction industry, the various phases of complex construction projects, the law applying to each phase and the various deliverables produced by the parties throughout the project. While including sections on the law applying to each phase, the book's primary focus is on the practical aspects faced on a daily basis by practitioners working in the construction industry. This book is important reading for professionals involved in construction law at every level, including relevant academics, government employees and lawyers. It will also serve as a useful book for students, providing a comprehensive overview of the many factors and phases of a complex construction project.
