Andalas International Nursing Conference (AINiC) is a dedicated conference aimed at researchers in nursing, public health and other health sciences topics. The 1st AINiC 2017 was held in Padang, West Sumatra, Indonesia, from 25-27 September 2017. The conference theme was "Strengthening Research Capacity and Disseminating New Findings in Nursing and Public Health". This event was successful in bringing together experts, researchers, healthcare professionals, and students worldwide. It was an inspiring occasion for most of the participants and was a great opportunity for research development learning, especially with regard to disseminating new findings in nursing and to stimulate networking of nursing professionals, researchers and educators. The research topics that were presented during the conference have clearly indicated the need for literature development and guidance of clinical practice decisions. We hope this conference has provided ample opportunities for participants to gain a more in-depth understanding of knowledge and renewed perspectives. All these aspects have been acknowledged by the participants during the conference. The 1st AINiC was a rewarding event and we look forward to your attendance and participation in the next AINiC conference that will also provide stimulating research developments, networking and

cooperation.

Lifestyle medicine is an evidence-based approach to helping individuals and families adopt and sustain healthy behaviors in preventing, treating, and oftentimes, reversing chronic diseases. This fast-growing specialty operates off six main principles including nutrition, physical activity, stress resilience, cessation or risk reduction of substance use, quality sleep, and social connectivity. Nurses are the primary providers of hospital-based patient care and deliver most of the nation's long-term care. Within healthcare, nurses are often tasked with educating patients and families and are thereby well-positioned to address lifestyle intervention with patients. Lifestyle Nursing examines the concepts of lifestyle medicine and nursing practice, it is specifically designed to help nurses introduce the concepts of lifestyle medicine to readers while also encouraging them to focus on their own wellness. This book features nutritional guidelines and supplemental materials operationalizing this basic nutrition knowledge into personal and patient wellness. It addresses evidence-based findings of chronic diseases including heart diseases and stroke, type 2 diabetes, and cancers, which can often be prevented by lifestyle interventions. Drawing from nursing and medical literature, this volume in the Lifestyle Medicine series encourages incorporation of lifestyle principles into nursing practices professionally and personally which will lead to overall improved patient outcomes and happier, healthier nurses.
