NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.

The archaeological assemblage from the Hyde Park Barracks is one of the largest, most comprehensive and best preserved collections of artefacts from any 19th-century institution in the world. Concealed for up to 160 years in the cavities between floorboards and ceilings, the assemblage is a unique archaeological record of institutional confinement, especially of women. The underfloor assemblage dates to the period 1848 to 1886, during which a female Immigration Depot and a Government Asylum for Infirm and Destitute Women occupied the second and third floors of the Barracks. Over the years the women discarded and swept beneath the floor thousands of clothing and textile fragments, tobacco pipes, religious items, sewing equipment, paper scraps and numerous other objects, many of which rarely occur in typical archaeological deposits. These items are presented in detail in this book, and provide unique insight into the private lives of young female migrants and elderly destitute women, most of whom will never be known from historical records.

In 1995, Texas Historical Commission underwater archaeologists discovered the wreck of La Salle’s La Belle, remnant of an ill-fated French attempt to establish a colony at the mouth of the Mississippi River that landed instead along today’s Matagorda Bay in Texas. During 1996-1997, the Commission uncovered the ship’s remains under the direction of archaeologist James E. Bruseth and employing a team of archaeologists and volunteers. Amid the shallow waters of Matagorda Bay, a steel cofferdam was constructed around the site, creating one of the most complex nautical archaeological excavations ever attempted in North America and allowing the archaeologists to excavate the sunken wreck much as if it were located on dry land. The ship’s hold was discovered full of everything the would-be colonists would need to establish themselves in the New World; more than 1.8 million artifacts were recovered from the site. More than two decades in the making, due to the

immensity of the find and the complexity of cataloging and conserving the artifacts, this book thoroughly documents one of the most significant North American archaeological discoveries of the twentieth century.

In the spring of 1905, members of an exclusive club of crime enthusiasts known as Our Society were taken on a guided excursion through Whitechapel, one of London's most notorious districts, by Dr. Frederick Gordon Brown, the chief police surgeon for the City of London. But this was no ordinary sightseeing tour. The focus of the outing was Jack the Ripper's reputed murder sites, and among the guests that day was Sir Arthur Conan Doyle, creator of the world's greatest detective, Sherlock Holmes. Here, now, in *The Strange Case of Dr. Doyle* by first-time son/father writing team Daniel Friedman, MD, and Eugene Friedman, MD, you are cordially invited to join a recreation of that tour. This expedition, however, will differ from the original in one very important way: It will be led by celebrated author Sir Arthur Conan Doyle himself. As you stroll beside Doyle and his other guests, you will travel to the location of each of the five canonical Ripper murders. Thanks to your guide's observations and opinions, all of which are based on actual historical accounts, you will learn as much about the district of Whitechapel as you will the terrible Ripper killings that occurred there. After each stop on the tour, you will also become acquainted with the life of Arthur Conan Doyle, from his earliest days in Edinburgh to his first taste of success as a writer. You will observe Arthur's hardships at home, his experiences at boarding school, his adventures at sea, his university education, and his days as a working medical doctor. You will be granted a picture of the man as few have ever seen him. As you alternate between biography and tour, you will become a Holmes-like detective, unearthing facts, discovering details, and piecing together information about both Jack the Ripper and Sir Arthur Conan Doyle. If you maintain a sharp mind and a keen eye, at the end of your journey, you may just uncover a truth you never expected to find.

Samplers were embroidered pictures made by girls, and occasionally boys, as part of their education. Scottish samplers are unique with regard to the amount of information that can be gathered from them. They often include the initials of extended family members as well as details of buildings, places and events, leading to the identification of almost all of these young embroiderers. Leslie Durst, an American with a passion for Scotland, has a collection of over 500 samplers dating from the early 18th to the late 19th century; a small section of them will be exhibited at the National Museum of Scotland. This book showcases these and reveals the stories behind many of them - embroidered records of two centuries of Scottish social history. Exhibition: National Museum of Scotland, Edinburgh, UK (26.10.2018 - 21.4.2019). --

Mary C. Beaudry mines archaeological findings of sewing and needlework to discover what these small traces of female experience reveal about the societies and cultures in which they were used. Beaudry's geographical and chronological scope is broad: she examines sites in the United States and Great Britain, as well as Australia and Canada, and she ranges from the Middle Ages through the Industrial Revolution. The author describes the social and cultural significance of "findings": pins, needles, thimbles, scissors, and other sewing accessories and tools. Through the fascinating stories that grow out of these findings, Beaudry shows the extent to which such "small things" were deeply entrenched in the construction of gender, personal identity, and social class.
