The Dissertation Journey Cambridge University Press

"A textual mentor like *During the Dissertation* can fill a void in writers' lives at a time of solitude, uncertainty, and anxiety. Keep it under your pillow." This volume is a sequel to Casanave's popular *Before the Dissertation*. Like that

volume, this book is designed as a companion for doctoral dissertation writers of qualitative or mixed methods work in fields related to language education. It could also benefit those writing master's theses and those writing in other social science fields. It is meant to be consulted once the writing has begun—once students have settled on a topic, designed the project, or collected the data—because this is the time when they are analyzing, drafting, revising, polishing, and probably fretting, deleting, reconstructing, and even losing sleep. Also, like its predecessor, it is not designed to teach anyone how to write a dissertation as there are plenty of those available elsewhere. For most doctoral students, writing will happen at different stages of the project. Strategies for timing of these kinds of writing differ across students, and also across supervisors and advisers. If dissertation writers do not know by the time they start writing which strategies and issues pertain to them, this book can help them craft some approaches to suit their own personalities, preferred practices, and individual goals and visions, as well as help them figure out how dissertation writing might fit into the real-life intrusions of work and family. Issues covered in the book are: starting to write, envisioning the project as a whole, relationships with supervisors, perfectionism and other maladies, health, low- and high-IQ days, loneliness

and isolation, distractions and interruptions, revising, and knowing when to stop.
