"It's mind-blowing to me how utterly far gone Steve-O was, and how he looks back on it in this book with such intelligence, humor, and searing honesty. What a truly unbelievable life." --Johnny Knoxville From his early days videotaping crazy skateboard stunts to starring in the Jackass movies, there was little that Stephen "Steve-O" Glover wouldn't do. Whether it was stapling his nutsack to his leg or diving into a pool full of elephant crap, almost nothing was out of bounds. As the stunts got crazier, his life kept pace. He developed a crippling addiction to drugs and alcohol, and an obsession with his own celebrity that proved nearly as dangerous. Only an intervention and a visit to a psychiatric ward saved his life. Today he has been clean and sober for more than three years. Professional Idiot recounts the lunacy, the debauchery, the stunts, the drug addiction, and the path to recovery with bravado, humor, and heart. "A great book to read before you get on the roller coaster to hell, if you plan on surviving to tell about it like Steve-O did." --Nikki Sixx, author of The Heroin Diaries "This is the perfect book for people who hate reading." --Tommy Lee, author of Tommyland The feedback I've gotten on Facebook and Twitter from those of you who've read this book has been fascinating, heartwarming, and hilarious. I'm happy to keep answering your questions on there, and I encourage more of you to join in the discussion. Hope to hear from you soon, and thank you all so much. Love, Steve-O

Prose fiction, although not always associated with classical antiquity, flourished in the early Roman Empire, not only in realistic Latin novels but also and indeed principally in the Greek ideal romance of love and adventure. Enormously popular in the Renaissance, these stories have been less familiar in later centuries. Translations of the Greek stories were not readily available in English before B.P. Reardon's first appeared in 1989. Nine complete stories are included here as well as ten others, encompassing the whole range of classical themes: romance, travel, adventure, historical fiction, and comic parody. A foreword by J.R. Morgan examines the enormous impact this groundbreaking collection has had on our understanding of classical thought and our concept of the novel.

In *Wild*, Cheryl Strayed writes of *The Ten Thousand Things*: "Each of Dermoût's sentences came at me like a soft knowing dagger, depicting a far-off land that felt to me like the blood of all the places I used to love." And it's true, *The Ten Thousand Things* is at once novel of shimmering strangeness—and familiarity. It is the story of Felicia, who returns with her baby son from Holland to the Spice Islands of Indonesia, to the house and garden that were her birthplace, over which her powerful grandmother still presides. There Felicia finds herself wedded to an uncanny and dangerous world, full of mystery and violence, where objects tell tales, the dead come and go, and the past is as potent as the present. First published in Holland in 1955, Maria Dermoût's novel was immediately recognized as a magical work, like nothing else Dutch—or European—literature had seen before. *The Ten Thousand Things* is an entranced vision of a far-off place that is as convincingly real and intimate as it is exotic, a book that is at once a lament and an ecstatic ode to nature and life.

Winner of the Kiriya Pacific Rim Book Prize A New York Times Notable Book of the Year Winner of the Whiting Writers' Award A Seattle Post-Intelligencer Best Book of the Year *Catfish and Mandala* is the story of an American odyssey--a solo bicycle voyage around the Pacific Rim to Vietnam--made by a young Vietnamese-American man in pursuit of both his adopted homeland and his forsaken fatherland. Andrew X. Pham was born in Vietnam and raised in California. His father had been a POW of the Vietcong; his family came to America as "boat people." Following the suicide of his sister, Pham quit his job, sold all of his possessions, and embarked on a year-long bicycle journey that took him through the Mexican desert, around a thousand-mile loop from Narita to Kyoto in Japan; and, after five months and 2,357 miles, to Saigon, where he finds "nothing familiar in the bombed-out darkness." In Vietnam, he's taken for Japanese or Korean by his countrymen, except, of course, by his relatives, who doubt that as a Vietnamese he has the stamina to complete his journey ("Only Westerners can do it"); and in the United States he's considered anything but American. A vibrant, picaresque memoir written with narrative flair and an eye-opening sense of adventure, *Catfish and Mandala* is an unforgettable search for cultural identity.

Some of the finest architectural structures in India are to be found below ground: these are its ancient stepwells. Stepwells are unique to India; the earliest rudimentary wells date from about the 4th century CE, and eventually they were built throughout the country, particularly in the arid western regions. Stepwell construction evolved so that, by the 11th century, they were amazingly complex feats of architecture and engineering, not only providing water all year round but also serving as gathering places, refuges and retreats. The journalist Victoria Lautman first encountered stepwells three decades ago, and this book - now available in paperback for the first time - is a testament to her determined efforts over several years to document these fascinating but largely unknown structures before they disappear. Of the thousands of stepwells that proliferated across India, most were abandoned as a result of modernization and the depletion of water tables. Frequently commissioned by royal or wealthy patrons, the wells vary greatly in scale and design. Some also functioned as subterranean Hindu temples, featuring columned pavilions and elaborate stone carvings. Islamic wells were generally less flamboyant, but often incorporated shady loggias and small chambers in which to relax and escape the stifling heat. Today, few stepwells are in use. The majority have been left to silt up, fill with rubbish and crumble into disrepair. Gradually, however, the Indian government and heritage organizations are recognizing the need to preserve these architectural wonders. In 2014 India's grandest and best-known stepwell, the Rani ki Vav in Patan, Gujarat, became a UNESCO World Heritage site. In her introduction, Lautman discusses why and where the stepwells were built. She reflects on the reasons they became derelict and considers how the appreciation of stepwells is changing with the work of organizations and individuals who aim to protect and restore them. The main part of the book is arranged in a broadly chronological order, with up to four pages devoted to each of c. 70 stepwells, every one unique in design and engineering. The name, location (including GPS coordinates) and approximate date of each well accompany colour photographs and a concise commentary by Lautman on the history and architecture of the well and her experience of visiting it. While many of the stepwells are rather decrepit, their magnificent engineering and great beauty never fail to impress.
