Downey Individual Will-temperament Test Random House Books
 for Young Readers

A fastidious rabbit and a slovenly bear make a new Odd Couple
 on the NorthSouth list. This book should appeal to fans of other
 classic tales of friendship like Frog & Toad or Ernest & Celestine.

Learning to Teach Mathematics in the Secondary School
 Red Comet Press

"Yoga for Nurses provides the means for nurses to support and
 enhance our ability to care for ourselves. It gives nurses
 information and strategies to deal with the physical and mental
 imperatives found in our daily work life." --Jill Howie Esquivel, RN,
 PhD University of California, San Francisco (From the Foreword)

"The first yoga instruction book directed specifically toward
 nurses....Dr. Kollak...has written a book that assists nurses in
 taking time to care for themselves. The content in this book could
 be easily incorporated into a nursing inservice program as a
 means to prevent on-the-job, stress-related injuries." --Cindy Ann

Howell, RN, MS, CNOR, CMLSO University of Texas, MD Anderson
 Cancer Center Don't let mental stress, chronic pain, and fatigue
 disrupt your professional and personal life any longer. Dr. Ingrid
 Kollak's Yoga for Nurses offers a tested therapy, proven to
 alleviate physical and mental pain, stress, and fatigue. As a yoga
 expert and a registered nurse herself, Dr. Kollak can show you
 how yoga is able to prevent and cure common ailments such as
 chronic neck and back pain, headaches, sore eyes, and lack of
 sleep. With this book, you'll learn how yoga works physically to
 reduce pain by stretching and strengthening muscles made tense
 from your normal, repetitive work routine. Kollak also shows you
 how yoga works on a mental level to provide an exceptional anti-
 stress program. This book, written by a nurse for nurses, presents
 a series of yoga exercises and practices that will allow you to
 regain your strength, reduce your physical pain, revitalize your
 mind, and transform your entire work experience. Key Features:
 Author is both a yoga expert and registered nurse Includes large
 print photos, detailing how each exercise should be done
 Contains different levels of yoga exercises, from easy-to-learn to
 advanced Exercises can be used both at work and in the home A
 fun, rewarding read!

Grazer Montags-Zeitung Imprint Academic

It's the Christmas holiday, the presents have been opened, and a six-year-old girl is drinking cocoa and playing with her grandfather. The doorbell rings, and the old man gets up. The next time the girl sees her grandfather, he is lying by the barn, his skull broken; his face a red pulp against the white snow. From that time on, she does not speak a single word. Along with Detective Superintendent Ludwig Kovacs, Raffael Horn, the psychiatrist engaged to treat the silent child, reluctantly becomes involved in solving the murder. Their parallel researches sweep through the town: a young mother who believes her new-born child is the devil; a Benedictine monk who uses his iPod to drown the voices in his head; a high-spending teenager who tortures cats. With his background as a child psychiatrist, Hochgatterer draws back the veil of normality and presents a disconcerting portrait of a winter-held town filled with unsavory inhabitants. *Modelling and Applications in Mathematics Education* Springer Nature

Do you know your own feelings? Sometimes, we're happy, so we laugh and shout with glee. Other times, we're angry, and want to rage and roar. It is not easy to deal with our many contradictory emotions. To recognize our own feelings and deal with them responsibly is an important learning process for children, and a trial of limits. This vibrantly and expressively illustrated book invites children to talk about feelings. It takes readers through a range of potential emotions without ever calling them "good" or "bad," allowing children to recognize and examine their own emotional world.

Godly Play MacLehose Press

Roger Baker's ground-breaking book, based on the research of his medical team, presents a new way of understanding emotions and new insights into handling emotional pressures, and is illustrated throughout with examples from patients in psychological therapy and from everyday life. The book is divided into 4 parts: 1) The Secret Life of Emotions: introduces the theme of the book and shows how emotional and rational lives are equally valid, 2) Dissolving Distress: looks at our second immune system, emotional processing, which helps us to absorb and break-down emotional hurts and strains, 3) Healing through Feeling: the expression of emotions for good health and well-being, 4) How to Sabotage Emotional Processing: a manual of bad practice.

The Great Big Book of Families Melbourne Univ. Publishing
Yoga and Breast Cancer is a practical how to guide to using yoga to manage stress, relieve pain, and gain the strength necessary to make it through this illness. It follows the authors' own research in the subject that has shown a proven correlation between yoga practice and better health and outcomes after a breast cancer diagnosis. More than simply an exercise guide, the book is a deeply soothing form of moving meditation and physical activity that is a safe way to rebuild strength, stamina, and flexibility both during and following cancer treatments. It is intended to support women during the critical phases of their disease as well as during times of secondary prevention and rehabilitation. It shows how yoga ameliorates difficulties after breast cancer therapy, improves a woman's awareness of her body, thoughts and feelings, and guides towards leading a healthier life.

Tales of Two Species Dogwise Publishing

What is a family? Once, it was said to be a father, mother, boy, girl, cat and dog living in a house with a garden. But as times have changed, families have changed too, and now there are almost as many kinds of families as colours of the rainbow - from a mum and dad or single parent to two mums or two dads, from a mixed-race family to children with different mums and dads, to families with a disabled member. Mary Hoffman takes a look

through children's eyes at the wide varieties of family life: from homes, food, ways of celebrating, schools and holidays to getting around, jobs and housework, from extended families, languages and hobbies to pets and family trees - and she concludes that, for most people, their own family is the best one of all! With Ros Asquith's delightful pictures, this book takes a fresh, optimistic look at families of today.

Igbo People National Geographic Books

This book proposes a new approach to the study of ancient Greek and Mesopotamian literature. Ranging from Homer and Gilgamesh to Herodotus and the Babylonian-Greek author Berossos, it paints a picture of two literary cultures that, over the course of time, became profoundly entwined. Along the way, the book addresses many questions that are of interest to the student of the ancient world: how did the literature of Greece relate to that of its eastern neighbours? What did ancient readers from different cultures think it meant to be human? Who invented the writing of universal history as we know it? How did the Greeks come to divide the world into Greeks and 'barbarians', and what happened when they came to live alongside those 'barbarians' after the conquests of Alexander the Great? In addressing these questions, the book draws on cutting-edge research in comparative literature, postcolonial studies and archive theory.

The Most Important Thing Cambridge University Press

A complete orchestral and vocal score for Beethoven's only opera, *Fidelio*, composed between 1803 and 1815. The opera is a Singspiel, with both singing and spoken dialogue, effectively using melodrama (action or dialogue accompanied by music) to create the proper mood for somber scenes. The lyrics and text in this edition are only in German."

Ungarischer Lloyd Teachers College Press

Have you ever caught yourself wondering just what your dog is thinking when he suddenly drops to the ground and rolls around in ecstasy on his back? What about when he lowers his head and slinks away after a stranger walks up to him and pats him on the head? Join best-selling author Patricia McConnell in looking at the behavioral interactions of dogs and people and how the similarities and differences between us impact our relationships.

Bayerischer Kurier CRC Press

Dedicated to the life and work of Heinz Von Foerster, this is a double issue of the journal "Cybernetics and Human Knowing".

Design Ethnography Gecko Press USA

Kvasz's book is a contribution to the history and philosophy of mathematics, or, as one might say, the historical approach to the philosophy of mathematics. This approach is for mathematics what the history and philosophy of science is for science. Yet the historical approach to the philosophy of science appeared much earlier than the historical approach to the philosophy of mathematics. The first significant work in the history and philosophy of science is perhaps William Whewell's *Philosophy of the Inductive Sciences*, founded upon their History. This was originally published in 1840, a second, enlarged edition appeared in 1847, and the third edition appeared as three separate works published between 1858 and 1860. Ernst Mach's *The Science of Mechanics: A Critical and Historical Account of Its Development* is certainly a work of history and philosophy of science. It first appeared in 1883, and had six further editions in Mach's lifetime (1888, 1897, 1901, 1904, 1908, and 1912). Duhem's *Aim and Structure of Physical Theory* appeared in 1906 and had a second enlarged edition in 1914. So we can say that history and philosophy of science was a well-established field by the end of the 19 and the beginning of the 20 century. By contrast the first significant work in the history and philosophy of mathematics is Lakatos's *Proofs and Refutations*, which was published as a series of papers in the years 1963 and 1964.

Denken und Träumen Springer Science & Business Media
 Named "Man of the Millennium" in 1999, Johannes Gutenberg was the creator of one of the most influential and revolutionary inventions in Europe's history: a printing press with mechanical movable type. This development sparked the printing revolution, which is regarded as the milestone of the second millennium and represents one of the central contributions in the turn to modernity. His printing press came to play a key role in the development of the Renaissance, the Reformation, and the Age of Enlightenment, providing the material foundation for the modern knowledge-based economy and the spread of learning to the masses. His invention revolutionized the way that information is shared and broadened the boundaries of who has access to written knowledge. Paving the way for bibliophiles of today, the Gutenberg Bible of 1454 remains one of the most famous books in history. Gutenberg's technical innovations remained unrivalled for almost 350 years, until industrialization of the printing industry and the digital revolution built on the advances that he began, increasing the rate at which information is spread. Despite his significance in forming the world as we know it, there has not yet been a rigorous and accessible biography of Gutenberg published in English. Written by the leading expert on Gutenberg, Füssel's biography brings together high academic standards and thorough historical details in a highly readable text that conveys everything you need to know about the man who changed printing forever.

My Feelings and Me Europa Editions Inc.

Meaningful, lasting learning comes from childlike curiosity and play. The approach of this book is to make religious instruction fun, spontaneous and deeply spiritual. Godly Play is a practical yet innovative approach to religious education--becoming childlike in order to teach children.

Abwehr Beacon Press

Computer games have become ubiquitous in today's society. Many scholars have speculated on the reasons for their massive success. Yet we haven't considered the most basic questions: Why do computer games exist? What specific circumstances led to the creation of this entirely new type of game? What sorts of knowledge facilitated the requisite technological and institutional transformations? With *Computer Game Worlds*, Claus Pias sets out to answer these questions. Tracing computer games from their earliest forms to the unstoppable commercial and cultural phenomena they have become today, Pias then provides a careful epistemological reconstruction of the process of playing games, both at computers and by computers themselves. The book makes a valuable theoretical contribution to the ongoing discussion about computer games.

Illustrierte Zeitung Frances Lincoln Children's Books

This open access book describes methods for research on and research through design. It posits that ethnography is an appropriate method for design research because it constantly orients itself, like design projects, towards social realities. In research processes, designers acquire project-specific knowledge, which happens mostly intuitively in practice. When this knowledge becomes the subject of reflection and explication, it strengthens the discipline of design and makes it more open to interdisciplinary dialogue. Through the use of the ethnographic method in design, this book shows how design researchers can question the certainties of the everyday world, deconstruct reality into singular aesthetic and semantic phenomena, and

reconfigure them into new contexts of signification. It shows that design ethnography is a process in which the epistemic and creative elements flow into one another in iterative loops. The goal of design ethnography is not to colonize the discipline of design with a positivist and objectivist scientific ethos, but rather to reinforce and reflect upon the explorative and searching methods that are inherent to it. This innovative book is of interest to design researchers and professionals, including graphic artists, ethnographers, visual anthropologists and others involved with creative arts/media.

Fidelio Macmillan

In this vivid, biographical piece, provocative director Barrie Kosky explores the feelings of intense joy and delight, as well as the power and terror, that is ecstasy.

Gutenberg Lion Books

Learning to Teach Mathematics in the Secondary School covers a wide range of issues in the teaching of mathematics and gives supporting activities to students to enable them to translate theory into practice. Topics covered include: mathematics in the National Curriculum different teaching approaches using ICT mathematics education for pupils with special needs in mathematics assessment and public examinations teaching mathematics post-16 professional development.

The Sweetness of Life Augsburg Books

The book aims at showing the state-of-the-art in the field of modeling and applications in mathematics education. This is the first volume to do this. The book deals with the question of how key competencies of applications and modeling at the heart of mathematical literacy may be developed; with the roles that applications and modeling may play in mathematics teaching, making mathematics more relevant for students.

Computer Game Worlds Demos Medical Publishing

The long-anticipated new version of the internationally recognized Early Childhood Environment Rating Scale®, ECERS-3, focuses on the full range of needs of preschool- and kindergarten-aged children. This widely used, comprehensive assessment tool measures both environmental provisions and teacher-child interactions that affect the broad developmental needs of young children, including: Cognitive Social-emotional Physical Health and safety ECERS-3 also includes additional Items assessing developmentally appropriate literacy and math activities. Designed for preschool, kindergarten, and child care classrooms serving children 3 through 5 years of age, ECERS-3: Provides a smooth transition for those already using ECERS-R. Emphasizes the role of the teacher in creating an environment conducive to developmental gains. Is designed to predict child outcomes more accurately and with greater precision. Provides a stronger method of distinguishing between good and truly excellent programs. Offers a complete training program with ongoing support available at the Environment Rating Scales Institute (ERSI) website (www.ersi.info). ECERS-3 is appropriate for state and district-wide QRIS and continuous improvement; program evaluation by directors and supervisors; teacher self-evaluation; monitoring by agency staff; and teacher education. The established reliability and long term evidence of validity of the ERS family of instruments make this new version of ECERS particularly useful for RTTT-ELC accountability and research. Suitable for use in inclusive and culturally diverse programs, ECERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Literacy Learning Activities Interaction Program Structure
