Providing detailed commentary of unrivalled quality on the process of civil litigation, this is the only major civil work to adopt a narrative approach based on the chronology of a claim. Written by a team of expert practitioners and academics, it provides authoritative analysis on the process of civil litigation from commencement of a claim to enforcement of judgments, addressing civil procedure in the county courts, the High Court, the Court of Appeal, and the Supreme Court. The book also considers more specialist matters such as insolvency proceedings, sale of goods, and human rights, providing expert analysis on a comprehensive level. Commentary is combined with the text of the Civil Procedure Rules (CPR), Practice Directions (PD), and Pre-Action Protocols and Procedural Checklists, all fully cross-referenced

to the text to ensure ease of use for the busy practitioner. As well as a detailed and user-friendly index the quick-reference guide inside the front cover provides an alternative point of access for those more familiar with the CPR.  The pathway to uncovering and dismantling inequities Educational leaders who work in the district, site, or classroom level know that opportunity gaps have long been a focus of education policy in the United States. Leadership can be a critical lever for advancing policies that oppose racism and confront systemic inequities. In meeting this challenge, educators have found that acknowledging beliefs and behaviors is

critical. Still, deficit-based thinking, especially due to privilege, remains a barrier to equity. Among the most damaging blind spots is the continuation of practices that are grounded in the values of entitled groups. Leading Change Through the Lens of Cultural Proficiency tells the story of a school community in the midwest United States that contended with its approach to teaching and valuing students of diverse backgrounds. Featuring the research-based Cultural Proficiency Framework and Tools, the book provides a clear road map to advancing equity across schools and districts. Designed to support leaders and school communities in developing policies and practices that respond to the needs of all students, this book Guides school leaders in a journey of learning the theory and strategies that improved student achievement and improved the working conditions in this district Features a real-life case study of a school community using the Tools of Cultural Proficiency and the Framework Provides vignettes and data, based on work conducted across an actual school district,

that resulted in improvements in school climate, achievement, mindset, and equitable educational practices. Includes powerful reflection, dialogic, and action activities for use in a variety of community learning modalities. Is grounded in assets-based assumptions with respect to students, families, and the school community. With a focus on engagement, leadership, implementation frameworks, and collaborative learning, the authors demonstrate how to uncover and remedy inequities. Designed for education leaders at all levels of the education system, this is the ideal foundational text for implementing Cultural Proficiency in your setting as you open doors for all students to thrive.

China's Energy Security and Relations With Petrostates Taylor & Francis

The contributions compiled in this issue engage in critical evaluation of China's "New Silk Road initiative" ("Belt and Road Initiative" [BRI]) by focusing on the potential long-term political and economic effects and implications for Sino-European and Sino-African relations. The

authors take the launching of the BRI (October 2013) as a starting point for a general, theory-guided qualitative re-evaluation of the basic patterns of Chinese foreign relations and global interactions under the fifth generation of Chinese political leaders. In 2013, the Chinese state president, Xi Jinping, framed BRI as a global connectivity network consisting of a multitude of overland passages and maritime transportation corridors. Xi Jinping's report to the 19th Party Congress (2017) set the BRI as an anchor concept of China's fine-tuned foreign strategy in the 21st century.

This comprehensive study examines the development and changing characteristics of the judicial system and reform process over the past three decades in China. As the role of courts in society has increased so too has the amount of public complaints about the judiciary. At the same time, political control over the judiciary has retained its tight-grip. The

shortcomings of the contemporary system, such as institutional deficiencies, shocking cases of injustice and cases of serious judicial corruption, are deemed quite appalling by an international audience. Using a combination of traditional modes of legal analysis, case studies, and empirical research, this study reflects upon the complex progress that China has made, and continues to make, towards the modernisation of its judicial system. Li offers a better understanding on how the judicial system has transformed and what challenges lay ahead for further enhancement. This book is unique in providing both the breadth of coverage and yet the substantive details of the most fundamental as well as controversial subjects concerning the operation of the courts in China.

Blackstone's Civil Practice 2013: The Commentary

Techniques in the investigative interviewing and interrogation of victims, witnesses and suspects of crime vary around the world, according to a country's individual legal system, religion and culture. Whereas some countries have developed certain interview protocols for witnesses (such as the ABE Guidelines and the NICHD protocol when interviewing children) and the PEACE model of interviewing suspects, other countries continue to use physical coercion and other questionable tactics to elicit information. Until now, there has been very little empirical information about the overall interview and interrogation practices in non-western countries, especially the Middle and Far East. This book addresses this gap, bringing together international experts from over 25 countries and providing in-depth coverage of the various interview and interrogation techniques used across the globe. Volume 1 focuses on the

interviewing of victims and witnesses, aiming to provide the necessary information for an understanding of how law enforcement agencies around the world gain valuable information from victims and witnesses in criminal cases. Together, the chapters that make up this volume and the accompanying volume on interviewing suspects, draw on specific national case studies and practices, examine contemporary challenges and identify best practice to enable readers to develop an international, as well as a comparative, perspective of developments worldwide in this important area of criminal investigation. This book will be an essential resource for academics and students engaged in the study of policing, criminal investigation, forensic psychology and criminal law. It will also be of great interest to practitioners, legal professionals and policymakers around the world.

Taking an applied, practical approach, it surveys the process from beginning to end. Pre-trial, trial, post-trial, questions of evidence and remedies are all clearly addressed. The authors, two acknowledged experts in the field, also explore the role of more general rule of law/standards of law questions that are currently impacting on the law and its interpretation. This book examines the development of bilateral energy relations between China and the two oil-rich countries, Kazakhstan and Russia. Challenging conventional assumptions about energy politics and China's global quest for oil, this book examines the interplay of politics and sociocultural contexts. It shows how energy resources become ideas and how these ideas are mobilized in the realm of international relations. China's relations with Kazakhstan and Russia are simultaneously enabled and constrained by the discursive politics of oil. It is argued that to build collaborative and constructive energy relations with China, its partners in Kazakhstan, Russia, and elsewhere must consider not only the material realities of China's energy industry and the institutional settings of China's energy policy but also the multiple symbolic meanings that energy resources and, particularly, oil acquire in China. China's Energy Security and Relations with Petrostates offers a

nuanced understanding of China's bilateral energy relations with Kazakhstan and Russia, raising essential questions about the social logic of international energy politics. It will appeal to students and scholars of international relations, energy security, Chinese and post-Soviet studies, along with researchers working in the fields of energy policy and environmental sustainability.

The phenomenon of "Cultural Reverse" (文化反哺) emerged in the 1980s after China's reform and opening up. In this era of rapid social change, the older generation started to learn from the younger generation across many fields, in a way that is markedly similar to the biological phenomenon of "The old crow that keeps barking, fed by their children" from ancient Chinese poetry. In this book, the author discusses this new academic concept and other aspects of Chinese inter-generational relations. In the first volume, the author explains some popular social science theories about generations, traces the history of Chinese intergenerational relationships, and through focus group interviews with 77 families in mainland China, comprehensively discusses the younger generation's values, attitudes, behavior patterns and the ways which differ from their

ancestors'. Following on from the first volume, this second volume further analyzes the multiple causes of cultural reverse, including rapid social change, the influence of peer groups, and the impact of the media.

Then, in a broader context, the author discusses the complex interdependence of and conflict among the state, society and youth. He tells a story of the transformation of Chinese youth over the past hundred years, and names this "one-place" (fast-changing China) and "one-time only" (unrepeatable) phenomenon "China feeling". The book will be a valuable resource for scholars of Chinese sociology, and also general readers interested in contemporary Chinese society.

Materials Principles and Practice deals with materials science in the technological context of making and using materials. Topics covered include the nature of materials such as crystals, an atomic view of solids, temperature effects on materials, and the

mechanical and chemical properties of materials. This book is comprised of seven chapters and begins with an overview of the properties of different kinds of material, the ways in which materials can be shaped, and the uses to which they can be put. The next chapter describes the state of matter as a balance between the tendencies of atoms to stick together (by chemical bonding) or rattle apart (by thermal agitation), paying particular attention to ionic bonds and ionic crystals, the structure and properties of polymers, and transition metals. The reader is also introduced to how the structure of materials, especially microstructure, can be manipulated to give desired properties via thermal, mechanical, and chemical agents of change. This text concludes by describing the chemistry of processing and service of various materials. Exercises and self-assessment questions with answers are given at the end of each chapter, together with a set of objectives. This monograph will be a valuable resource for students of materials

science and the physical sciences.
