»Wenn wir wollen, dass es Frieden auf dieser Welt gibt, müssen wir unerschrocken genug sein, die unnachgiebige Starre unseres Herzens zu besänftigen. Es geht darum, den weichen Punkt zu finden und dabei zu bleiben. Das ist wahre Friedenspraxis.« Wir leben in einer von Kriegen und Konflikten beherrschten Welt. Oft stehen wir der Vielzahl von Krisen hilflos gegenüber, und die Frustration führt zu Wut und Hass, auch in uns selbst. Wie durchbricht man diesen Kreis des Unglücks? Die weltberühmte buddhistische Nonne und Autorin Pema Chödrön beleuchtet das Thema aus einer klassisch buddhistischen Perspektive, bleibt dabei aber ganz nah an der Praxis: Denn nur wer Frieden in sich findet und aktiv praktiziert, kann beitragen zu einer friedvolleren Welt. »Wenn niemand damit anfängt, etwas Harmonie zu schaffen, werden wir niemals in der Lage sein, in dieser Welt ein gesundes geistiges Klima zu entfalten.« (Chögyam Trungpa Rinpoche) Zum ersten Mal als Sonderausgabe

Es ist nie zu spät! Bloomsbury Publishing USA

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as “beauty”? The term scarcely ever appears nowadays in a scientific description of living

things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

Hildegard Von Bingen's Physica University of Illinois Press

Mit dem Thema Tod beschäftigt sich Norbert Görg seit seinem Studium und in den letzten zehn Jahren intensiv. Das Ergebnis ist dieses Buch. Es enthält die Grundfragen des Lebens mit einigen Lösungsansätzen: Wie ist unsere Welt entstanden? Gibt es einen Gott oder einen transzendenten Welthintergrund? Und vor allem: Welche Vorstellungen vom Tod und einem möglichen Weiterleben gibt es in der Menschheit und was ist davon zu

halten? Wie gehe ich mit dem Wissen um unsere Sterblichkeit um? Diese und ähnliche Fragen werden anhand der Disziplinen Mythologie, Belletristik, Psychologie, Philosophie, Religion, Esoterik und Naturwissenschaft kritisch beleuchtet. Ein interessanter Aspekt ist, dass sich Wissenschaft und Spiritualität nicht ausschließen müssen. Dass man dem Tod nicht nur mit Angst, sondern auch mit Humor und einer gewissen Gelassenheit begegnen kann, wird ebenfalls thematisiert.

"A brilliant and original exponent of a rare genre, the philosophical essay. Once read, Cioran cannot fail to provoke reaction."—New York Times Book Review

Twelve Years a Slave Profile Books

Immer mehr Bereiche unseres Lebens werden bestimmt von Gewinn-Sucht, Gewalt und Geistlosigkeit, begleitet von einer Ethik des Mehr-Mehr, Billig-Billig, Ich-Ich. Menschen werden in vernutzbare Objekte, Natur in eine leblose Ressource verwandelt. Welche Rolle spielt bei alldem Politik und warum ist Politik so, wie sie ist? Was wäre gute Politik und wie könnte Politik die Welt - wenigstens ein bisschen - besser machen? Die überzeugendsten Antworten auf diese Fragen geben uns Darwin und die Evolutionsbiologie, der Schmetterling der Chaostheorie sowie Laotse und die daoistische Philosophie. Ihr Denken ist radikal, es denkt von der Wurzel des Seins her. Und so zeigen sie uns, dass Politik immer von lebendigen Menschen gemacht wird, die beständig auf der Suche sind nach Sinn; dass Politik an vielen Orten stattfindet, dass das Private politisch ist, dass gute Politik systemisch denkt, dialogisch kommuniziert und achtsam handelt, dass gute Politik sich auf weisen Eigennutz gründet und sich an drei Leitbildern orientiert: Reduzieren, Respektieren, Reflektieren. So macht gute Politik auch ein gutes Leben möglich - ein Leben der Freude, Stille und Lebendigkeit.

Theology and the Philosophy of Science BoD - Books on Demand

Originally published in 1965, this volume presented the only comprehensive bibliography of the writings of the Austrian novelist, journalist, and playwright Stefan Zweig and of the books and articles about his work.

Schopenhauer and Nietzsche BoD - Books on Demand

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Frieden finden in Zeiten des Krieges Skyhorse Publishing Inc.

Kurz nachdem Siddharta Gotama unter dem 'Baum der Weisheit' seine Erleuchtung erfahren hatte, begann er, vor fünf asketischen Gefährten, der frühesten buddhistischen Mönchsgemeinde, seine erste Lehrrede zu halten. Von diesem Tag an zog er aus und sprach 45 Jahre lang vor Menschen aller Gesellschaftsschichten von seinen Erfahrungen, seinem Wissen und seiner Weisheit. Die Lehren wurden noch lange nach Siddhartas Tod von seinen Jüngern mündlich weitergereicht und später aufgezeichnet. Dieser Band enthält eine Auswahl der schönsten Reden und Gleichnisse in der kongenialen Übertragung von Karl Eugen Neumann.

The Manufacture and Sale of St Einstein - I Anaconda Verlag

Endo Anacondas legendäre Kolumnen erzählen von der Welt im neuen Jahrtausend. Hemmungslos, poetisch, treffsicher und mit lustvoller Selbstironie beschreibt er die unendliche Schwierigkeit der menschlichen Existenz - vor allem der eigenen -, ganz egal ob in Salzburg, Berlin oder Bern. Das Sofa wird zum magischen Schiff, mit dem wir zu den letzten wirklichen Abenteuern schweben, zum fliegenden Teppich. Endlich wieder lieferbar - überarbeitet und mit einem neuen Vorwort.

Poetry and Tales Anaconda Verlag

Anticipating contemporary deconstructive readings of philosophical texts, Georg Simmel pits the two German masters of philosophy of life against each other in a play of opposition and supplementation. This first English translation of Simmel's work includes an extensive introduction, providing the reader with ready access to the text by mapping its discursive strategies.

The Drunken Song Inner Traditions / Bear & Co

Filmalized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Society After Money OUP Oxford

New Visions of the Zhuangzi is a collection of thirteen essays on the ancient Daoist philosophical work, presenting new angles and approaches. It overcomes the traditional division of schools in favor of topics, sheds new light on key philosophical notions, examines Zhuangzi's use of language,

and explores issues of his use of language. In addition, it also applies modern neuroscience to its instructions, explores its vision of the ideal mind, and connects Zhuangzi's teachings to issues of education and community relevant in contemporary society.

Animal Beauty MIT Press

Achtsamkeit ist in aller Munde - sie hat sich als Schlüssel zu einem glücklichen, sinnerfüllten Leben bewährt, seit Jahrtausenden und inzwischen auch wissenschaftlich nachgewiesen. Der Erfolgsautor Dr. Matthias Ennenbach hat in seinem neuen Buch auf den Punkt gebracht, worauf es bei der Achtsamkeit ankommt. Ausgehend von der Frage, wie wir Achtsamkeit wirklich im Alltag verwurzeln können, hat Ennenbach daraus ein kompaktes System zur Achtsamen Selbststeuerung (ASST) entwickelt. Es lässt uns immer wieder im Körper ankommen - bis aus einer neuen Gewohnheit eine Haltung erwächst, die uns zunehmende Gelassenheit schenkt. Kommt die "innere Schneekugel" einmal zur Ruhe, können wir klarer erkennen, welche Ego-Anteile in uns momentan das Ruder übernehmen wollen - und sind in der Lage, uns neu zu justieren. Je mehr wir zu dem Menschen werden, der als Potenzial bereits in uns angelegt ist, desto weniger können Ablenkungen uns aus dem Gleichgewicht bringen.

Buddha - Die großen Reden Windpferd

Mit diesem Band der jährlichen Buchreihe "Schriften zur Sprache und Literatur / Dil ve Edebiyat Yazıları" möchten wir einerseits die Arbeiten von erfahrenen Wissenschaftlern bzw. Lehrkräften erreichbar machen, andererseits zielen wir darauf ab, NachwuchswissenschaftlerInnen zur Hervorbringung wissenschaftlicher Texte zu inspirieren. In diesem Sinne möchten wir besonders die Beiträge der Masterstudenten und Doktoranden hervorheben, die ihre in den Lehrveranstaltungen und Seminaren erworbenen Kenntnisse mit ihrer Erzeugungskraft verbunden und veranschaulicht haben. Die Arbeiten anderer, an verschiedenen Universitäten tätiger Lehrkräfte sind für solche, die sich mit verschiedenen Disziplinen wie Linguistik, Literatur, Literaturwissenschaft, Übersetzungswissenschaft, Kulturwissenschaft, Soziolinguistik, Psycholinguistik und Fremdsprachendidaktik beschäftigen, wegweisend. Wegweisend in dem Sinne, dass sie vielfältig sind und eine reiche Palette neuer Gesichts- bzw. Standpunkte aufweisen. Die Beiträge stammen nicht nur aus dem Bereich der Germanistik im weitesten Sinne; unser Band enthält auch Arbeiten, die sich - wenn auch indirekt - auf die Anglistik, Arabistik und Turkologie beziehen. Durch diese Vielfalt wird ein großer Leserkreis erreicht, der eine lange Reise in wissenschaftliche Nachbardisziplinen unternehmen und somit mehrere Themen abschmecken kann.

The Gravediggers Shambhala Publications

This work is a complete English translation of the Latin Etymologies of Isidore, Bishop of Seville (c.560-636). Isidore compiled the work between c.615 and the early 630s and it takes the form of an encyclopedia, arranged by subject matter. It contains much lore of the late classical world beginning with the Seven Liberal Arts, including Rhetoric, and touches on thousands of topics ranging from the names of God, the terminology of the Law, the technologies of fabrics, ships and agriculture to the names of cities and rivers, the theatrical arts, and cooking utensils. Isidore provides etymologies for most of the terms he explains, finding in the causes of words the underlying key to their meaning. This book offers a highly readable translation of the twenty books of the Etymologies, one of the most widely known texts for a thousand years from Isidore's time.

Achtsamkeit und Politik Yale University Press

Racist physicist Albert Einstein became internationally famous in 1919 when newspapers around the world reported that he had correctly predicted that the gravitational field of the sun would deflect rays of light. The press promoted the virulently racist and segregationist Zionist, Albert Einstein, as if he were the world's greatest mind, a mind that had surpassed the genius of Copernicus, Galileo and Newton. In April of 1921, Albert Einstein took advantage of his newly found fame and traveled to America. He promoted racist Zionism to the Jews of America, while raising money for the Eastern European Zionists who had made him famous. Einstein championed the racist doctrine of Theodor Herzl, that Jews were a distinct race of human beings, who could not assimilate into any Gentile society and therefore ought to segregate themselves and form a nation in Palestine. Einstein also believed that there ought to be a world government. However, Einstein thought that Israel ought to be a distinct nation. Though he described himself as non-religious, Einstein's racist views, and his concurrent call for a world government and a segregated "Jewish State" mirrored Jewish Messianic prophecies. Einstein raised money in America for the Hebrew University in Jerusalem. He also tried to popularize the racist Zionist cause. The news media enthusiastically covered his trip to the United States. Mainstream news media claimed that all of Einstein's critics were anti-Semites, but did not criticize Einstein for his rabid racism or his segregationist politics. Prof. Arvid Reuter Dahl of St. Thomas College, in St. Paul, Minnesota, responded to Einstein's aggressive self-promotion. With reference to the notorious circus promoter P. T. Barnum, Prof. Reuter Dahl dubbed Albert Einstein the "Barnum of the Scientific World". He publicly challenged Einstein to a debate over the merits of the theory of relativity and publicly accused Einstein of plagiarism. Einstein refused to debate Reuter Dahl. Einstein stated that his sole purpose for coming to America was to raise money for the Hebrew University in Jerusalem and that he could not be bothered with issues related to "his" theories. Even before coming to America, Einstein had earned an international reputation for hiding from his critics. His favorite tactic to avoid debate was to accuse his critics of being "anti-Semites", while refusing to address their legitimate accusations of his, Einstein's, irrationality and plagiarism. Like most bullies by bluff, Einstein was a coward, who hid behind the power of the racist Jews who attempted to shield him from criticism through well-orchestrated smear campaigns in the international press.

Overcoming School Refusal Shambhala

Experience the powerful and evocative words of Friedrich Nietzsche's Zarathustra in this masterful translation by Oskar Fried. The Drunken Song (Das Trunkne Lied) is a haunting and poetic piece that delves deep into the complexities of human nature and the human experience. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Klein y Wagner Lulu.com

Design and Operation of heat Exchangers and Their Networks presents a comprehensive and detailed analysis on the thermal design methods for the

most common types of heat exchangers, with a focus on their networks, simulation procedures for their operations, and measurement of their thermal performances. The book addresses the fundamental theories and principles of heat transfer performance of heat exchangers and their applications and then applies them to the use of modern computing technology. Topics discussed include cell methods for condensers and evaporators, dispersion models for heat exchangers, experimental methods for the evaluation of heat exchanger performance, and thermal calculation algorithms for multi-stream heat exchangers and heat exchanger networks. Includes MATLAB codes to illustrate how the technologies and methods discussed can be easily applied and developed. Analyses a range of different models, applications, and case studies in order to reveal more advanced solutions for industrial applications. Maintains a strong focus on the fundamental theories and principles of the heat transfer performance of heat exchangers and their applications for complex flow arrangement.

In Ghostly Japan Australian Academic Press

Collection of reports from men and women who have taken mystical journeys in an altered state of consciousness.

Die Pfeiler der Einsicht - Reden und Gleichnisse Legare Street Press

November 1932. With the German economy in ruins and street battles raging between political factions, the Weimar Republic is in its death throes. Its elderly president Paul von Hindenburg floats above the fray, inscrutably haunting the halls of the Reichstag. In the shadows, would-be saviours of the nation vie for control. The great rivals are the chancellors Franz von Papen and Kurt von Schleicher. Both are tarnished by the republic's all-too-evident failures. Each man believes he can steal a march on the other by harnessing the increasingly popular National Socialists - while reining in their most alarming elements, naturally. Adolf Hitler has ideas of his own. But if he can't impose discipline on his own rebellious foot-soldiers, what chance does he have of seizing power?
