Topographical Bibliography of Ancient Egyptian Hieroglyphic Texts, Reliefs, and Paintings: Upper Egypt, chief temples (1st ed. 1939. Reissued 1970) Rizzoli Publications

Un livre pour découvrir l'Égypte antique, longer les rives du Nil, suivre le rythme des saisons, saluer Pharaon, percer les secrets de la momification...

Up the Nile Clarkson Potter

This stunning volume presents Egypt as it is rarely seen--from the air. Vivid photographs reveal the pyramids and the Sphinx, ancient temples of the pharaohs, the desert monasteries of early Christians, the mosques and palaces of caliphs, sultans, khedives, kings, and presidents. Bibliography; index. 178 full-color photographs.

Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971 Onomatopée

1001 years as a continuous settlement, 100 years as a modern city, Cairo in the 1970s is a complex metropolis. Janet Abu-Lughod traces the social and demographic history of Cairo, demonstrating the continuities and transformations that underlie the organization of today's city. Originally published in 1971. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Visual Plague Leuven University Press

How epidemic photography during a global pandemic of bubonic plague contributed to the development of modern epidemiology and our concept of the "pandemic." In *Visual Plague*, Christos Lynteris examines the emergence of epidemic photography

during the third plague pandemic (1894-1959), a global pandemic of bubonic plague that led to over twelve million deaths. Unlike medical photography, epidemic photography was not exclusively, or even primarily, concerned with exposing the patient's body or medical examinations and operations. Instead, it played a key role in reconceptualizing infectious diseases by visualizing the "pandemic" as a new concept and structure of experience—one that frames and responds to the smallest local outbreak of an infectious disease as an event of global importance and consequence. As the third plague pandemic struck more and more countries, the international circulation of plague photographs in the press generated an unprecedented spectacle of imminent global threat. Nothing contributed to this sense of global interconnectedness, anticipation, and fear more than photography. Exploring the impact of epidemic photography at the time of its emergence, Lynteris highlights its entanglement with colonial politics, epistemologies, and aesthetics, as well as with major shifts in epidemiological thinking and public health practice. He explores the characteristics, uses, and impact of epidemic photography and how it differs from the general corpus of medical photography. The new photography was used not simply to visualize or illustrate a pandemic, but to articulate, respond to, and unsettle key questions of epidemiology and epidemic control, as well as to foster the notion of the "pandemic," which continues to affect our lives today.

Description de L'Égypte Les Éditions de l'Opportun

This is a photographic portrait of Egypt, that avoids the well-known history and popular views, and focuses instead on life as it is lived by its people. Three main oppositions are the focus of this book : noise and silence, spirit and movement, past and future. Also included are interviews with Egyptians and non-Egyptians,

both the famous and the not so famous, giving a further feeling of the real Egypt, an insight beyond the pyramids, temples, and tombs.

L'ÉGYPTE EN 1000 PHOTOS American Univ in Cairo Press

As wealthy tourists descended upon Egypt in the early-twentieth-century, a well-heeled jet set emerged in Cairo and Alexandria. Period photographs celebrate the glamour: a Bugatti at the foot of the pyramids, high tea served in jasmine-draped gardens. . .

Aujourd'hui L'Égypte Harry N. Abrams

Egypt is a country of visual and visceral powers, from the cities of the Nile Valley, where Egyptians live a life that blends modern and traditional ways, to the awe-inspiring landscape of the desert. An expert team of authors takes readers on a tour of the land, covering Egypt's ancient monuments, natural resources, and ethnic communities. 180 photos.

The New World-wide Postage Stamp Catalog Bloomsbury Publishing

This is a wonderful collection of 99 high-quality amazing images produced by a series of today's top professional photographers. Enjoy and be inspired!

The story of Francis Frith's pioneering Nile journeys made between 1857 and 1860. Includes Frith's original text and photo captions. Illustrated with 130 period photographs plus 30 modern colour photographs to show comparisons.

Netherlandish Fifteenth and Sixteenth Century Paintings in the

National Gallery of Ireland Copyright Office, Library of Congress
The most enduring testament to the Mamluk Sultanate is its architecture. Not only do Mamluk buildings embody one of the most outstanding medieval architectural traditions, Mamluk architecture is actually a key to the social history of the period. Analysing Mamluk constructions as a form of communication and documentation as well as a cultural index, "Mamluk History Through Architecture" shows how the buildings mirror the complex - and historically unique - military, political, social and financial structures of Mamluk society. With this original and authoritative study, Nasser Rabbat offers an innovative approach to the history of the Mamluks - through readings of the

spectacular architecture of the period. Drawing on examples from throughout both Egypt and Syria, from the Citadel and Al-Azhar Mosque of Cairo to the Mausoleum of al-Zahir Baybars in Damascus, Rabbat demonstrates how Mamluk architecture served to reinforce visually the spirit of the counter-Crusade, when the Muslim world rebounded from the setbacks of the First Crusade. Both holistically and in case studies, Rabbat demonstrates how history is inscribed into and reflected by a culture's artefacts. This is a groundbreaking work in the study of architecture and social history in the Middle East and beyond. *Mamluk History through Architecture* Big Book of Photos Xavier Roy's breathtaking photographs of Egypt offer us a haunting vision of a country and its people. Roy draws us into Egypt's mystique, its scintillating waters, bucolic vistas, ruins, and places of worship. We observe the correspondences of shape and texture, perspective and repetition, light and shadow, and the vitality in the mundane and commonplace. A photograph of an acacia tree is juxtaposed with one of birds in flight, their formation and movement echoing the outline and feather-like aspect of the tree. The sea, both formless and metallic, can be an expression of the emotions of the woman who looks at it, or an image of ambivalence and uncertainty, of life and death.

Toute les promesses de découverte qu'offre l'un des berceaux de l'humanité, de l'antiquité à nos jours.

Calotypes of Egypt

Redécouverte au XIXe siècle par les archéologues, l'Égypte qui attire chaque année des millions de voyageurs est un pays qui fait rêver. Civilisation plusieurs fois millénaire, magnifique par ses hiéroglyphes et la richesse de sa mythologie, elle est au cœur de l'histoire de l'humanité. Aux symboles éternels que sont les pyramides, le sphinx, le trésor de Toutankhamon, les étranges dieux à tête d'animaux, Ramsès II... Il faut y ajouter la magie du Nil, la richesse de l'architecture islamique, la beauté des fonds de la mer Rouge, l'animation des souks et l'intimité des cafés, sans oublier, bien sûr, le peuple égyptien, fier descendant des pharaons. Les 1001 photos de cet ouvrage sont le reflet des 1001 facettes de ce pays fascinant. Une source inépuisable de découvertes et d'émerveillement dont ce livre rend compte avec passion et d'authenticité.

[Catalog of the Oriental Institute Library, University of Chicago](#)

The work of Félix Teynard (1817-1892) essentially consists in a set of 160 photographic plates titled *Egypt and Nubia* printed in 1853-1854 by the firm of H. Fonteny in Paris. Teynard's goal was to create a collection of photographs that would complement *Description of Egypt* (1809-1828), a series of volumes documenting Napoleon's expedition to Egypt using maps, texts and engravings which were thought to be inadequate. Trained as a civil engineer, Félix Teynard produced a unique body of work through balanced compositions and a keen observation of monuments and architecture. Going beyond temples and well-known sites, he was also interested in vegetation, landscapes and more modest buildings, showing an openness in his choice of

subjects. Since the invention of photography in 1839, traveller-photographers have swarmed to the distant and mythical East. The CCA Collection includes a large number of albums and photographs produced on Egypt, from the nineteenth century up to the present.
