 So You Think You're Ready for Life is a compilation of true short stories that chronicle different situations throughout the life of the author. Many are comical and several are serious, but all are told in a captivating and enticing way that draws you into the events as they happen. These events leave you with life lessons at the end of each story to assist you in your journey through life. Hard to put down once you have started and even harder to not go out and want to experience more of what life has to offer once you have finished, regardless of your age. This is the perfect book for learning what you were never taught in school and opening your mind to a completely different way of thinking. Something for everyone and extremely helpful, a must read, for young adults making the leap into adulthood.

So You Think You Might Like to Teach: 23 Fictional Teachers (For Real!) Model How to Become and Remain a Successful Teacher AuthorHouse

I began teaching in 1964 and am still at it. Thanks to the values of my parents and my maternal grandmother (Beba), as well as to their high expectations for me, I learned at a young age that no matter how old I got, I would always be a student. Later I learned that I would always be a teacher. Not only is that combination of student and teacher an unbeatable one, it is a necessary one if by a "successful" teacher we mean a person whose humanity is expressed through what is both a calling and a career. (Geoffrey Chaucer put it more poetically in *The Canterbury Tales*: "And gladly would he learn, and gladly teach.") This is a book about answering the call to become a teacher and working to be an effective one (whatever your subject but generally on the secondary school level). *So You Think You Might Like to Teach* features the classroom experiences of 23 fictional teachers and the practical lessons they learned from their successes and failures about what happens of value on both sides of the teachers desk. This book's 23 "novel" role models (from contemporary and classic works of literature) may not be actual but they are quite real (flaws and all); and although some of them may be larger than life, all are true to life both in and out of the classroom. I've chosen these particular fictional teachers for you to learn from because "you think you might like to teach." I suspect, and hope, that you want to become the best possible teacher you can be and never have to worry about burnout. Your joy in your career and your students' joy in your joy will depend on it. And so I wish you the best should you decide to profoundly affect the lives of, let's say, 151 very special human beings in the

next school year: 150 students and you, their teacher. Robert Eidelberg

 50 musings on the self-appointed cool kids taking over your towns. Skinny jeans? Check. Thrift-store clothing? Check. Non-essential prescription glasses? Check. Beanie hat balanced artfully on the back of your skull? Check. These items have become the uniform for a new breed of young people—hipsters—determined to take over cities with their "alternative" ways while overloading on irony and striving to be original and creative. *So You Think You're a Hipster?* examines what it takes to become one of this ever-growing tribe of young urbanites, just as desperate to be accepted by their peers as they are to receive the next rent check from mom and dad. A series of hilarious case studies will identify typical examples of the subculture, helping you to avoid any future encounters with them. Take the vintage store worker who, at 35, still works selling worn sneakers and threadbare t-shirts for extortionate amounts and still dreams of one day getting his latest album reviewed on Pitchfork. Or the aspiring author who lugs around an old-fashioned typewriter to write down her inspirational musings at a moment's notice. Then there's the bearded urban hunter dressed head to toe in workwear and outdoor gear despite the fact it's the middle of summer. Basically there are nearly as many hipsters featured here as you would find at an LCD Soundsystem concert.

 The attitudes and idiosyncracies of 50 different skateboarders considered and classified. From humble beginnings through to the modern day multi-million dollar industry it has become, skateboarding has been dragged from its outsider roots into the mainstream world. While the grizzled 80s skate veterans are up in arms that you can now buy a skateboard from nearly every mall or high street in nearly every town from LA to NYC, the fact of the matter is the skateboarding community has snowballed from counter-culture activity into a sport that appeals just as much to the underground as it does to the average kid on the street. Now you're just as likely to see a skater sneaking into a local school as you are live on ESPN. With so many different strains of the skate family tree, it's hard to keep track of all the different tribes out there, and that's where *So You Think You're a Skateboarder* comes in. Fifty examples from the contemporary skate scene are examined in an attempt to unravel what makes skaters tick. Skaters include the Pushy Parent spending every Sunday at the local park trying to convince his kid to love skating in the same way he did. Or the "friendly" Local, who's been determinedly skating the same spot for the last 10 years and will be damned if he's going to share it with any newcomers. The Wannabe

Gangster spends as much time trying to nail bigspins as he does trying to emulate Biggie, and the *Piss Drunk* has spent the last four hours eyeballing shots of tequila and is about to attempt to boardslide the next handrail he can find.

 From *The Book Thief* and *The Binger* to *The Scholar* and *The Sci-Fi Lover*—read all about over 20 different types of bookworm. Ever find yourself mainlining coffee at work in an effort to stay awake after a late night with a page-turner you just couldn't put down? Does the thought of being stuck on a train/plane/bus without a book fill you with more existential angst than a Camus novel? Were you too traumatized to leave your bed for days after finishing *The Time Traveler's Wife*? If any of these scenarios sound familiar, then chances are you're a book lover, but what kind of bibliophile are you? Perhaps you're *The Cryer*, who doesn't enjoy a story until at least a pint of real tears have been shed. Or maybe you're *The Adulterer*, who struggles to commit and never has less than four books on the go, or *The Abuser*, whose "treat 'em mean" attitude leads to turned-down corners, broken spines, and water-damaged pages. With over 20 hilarious bookworm profiles, you're sure to spot a good few character traits that any member of the literati will recognize. While we won't claim it's as funny as a Philip Roth novel, *So You Think You're a Bookworm?* will definitely raise a smile or two.

 Ekina was made in America with African parts, but unfortunately this has never made him indestructible. Precocious at ten years old, Ekina knows that physical strength won't help him fend off his overbearing parents, cruel teachers, and one-sided romance. It won't help him save his baby sister from their traditionally-misogynist father or protect his little brother from their mother's expectations either, although it might've helped him master an adagio—if he hadn't quit ballet class. Nigerian boys don't wear pointe shoes, and anyway, who does he think he is...an American? *"So You Think You're American"* is a novel about growing up in that world between foreign and native cultures. Poignant, funny, and sometimes hopelessly heartbreaking, *"So You Think You're American"* will evoke profound emotions, tears or laughter, in even the most stoic of readers.

A cornucopia of spelling challenges—from the deceptively simple to the truly vexing—for good, better, and exceptional spellers (or those who want to be). *So You Think You Can Spell?* is a handy way to go one on one, pencil to paper, against hard, harder, and heartless words. The challenges vary from three- and five-word mini-quizzes to fifty-words, from tests of quite familiar (but ever misspelled) words to those rife with vowel, consonant, or silent-letter booby traps. This unique volume also tests one's spelling

smarts in the arts and sciences, international cuisine, and geography. All in all, this is a book to settle the ultimate question: Just how good a speller are you?

It seems all too many of us choose to live our lives without God. Modesty and morality are no longer important. Get as much pleasure, accumulate as many material objects, value no one other than ourselves, and live as though death has no hold on us. Whats the big deal if we saturate our minds with porno morning, noon, and night? Whom are we hurting if we engage in illicit sex, as long as our partner is willing? If the female gets pregnant just go to the local suck clinic and have the kid aborted. Its no big deal. Weve got all these freedoms, you see. The law says its okay. Important people are our spokespersons, telling us that its our right to decide certain life and death issues for ourselves. Hey, life is good. If anyone tries to give us any static about what we say or do, weve got some gutless politicians to straighten things out. One day all of us will discover that mans law is not Gods law. And then our asses have had it. Were going to be judged on everything we ever thought, said, or did. And then it will be time to pay the price for the way we chose to live our lives. We rejected God, and now Hell have nothing to do with us. Hell is for eternity!

Bad days are just part of life. But for the characters highlighted in Matthew Bragas short story collection, their bad days are just a little bit worse. A husband who wants nothing more than to reconnect with his wife after realizing their marriage is in a slump finally finishes a long-awaited backyard project, only to discover that no matter how much he thinks he knows, sometimes he is not in charge or in control of anything. When a wife is ill in bed, her husband quietly creeps around the house hoping not to disturb her, but after they have a disastrous meeting in the bathroom, he heads outside where something unanticipated comes downright on her prized flower garden. When a couple moves into a new house, a stray cat soon makes it known that he is smarter than humans. Finally, a little boy who struggles with his difference discovers that he can do anything he wants if he has friends and a good dream. *So You Think You're Having a Bad Day?* is a lighthearted collection of humorous vignettes with an important message that even the worst of days are survivable.

The author's intent is to call into question the validity of a belief about human nature that enjoys almost universal acceptance. He contends that there is a huge difference between the "good" people we think we are, and what we're really like. He hopes this book will challenge us to evaluate ourselves and our core values. This book is about us—our humanity and our inhumanity, our selflessness and our self-centeredness, our compassion and our indifference. It is about the age old question of what we're really like in the depths of our being. Most assume that, "basically, we're good people." Isn't that just the way it is? Isn't that what everybody thinks? If someone feels like their self-image, integrity or reputation is being threatened, we often hear

them say, "I'm a good person!" It would be pretty hard to live with yourself if you weren't able to maintain some semblance of self-worth. We've taken it for granted that, "basically, we're good people." Something we've just assumed to be a given has been elevated to the status of truth. The reader will be asked to do some soul searching as to the validity of this widely held belief. Two key factors in making any assessment of whether or not we're "good people" are the standard by which we measure ourselves with respect to charitable giving and volunteerism. The reader is challenged to reevaluate their standard of what a good person is. Furthermore, this book asks the reader to take action based on their understanding of what it means to be a good person. Do you want to go with the flow, or start struggling against the strong cultural currents of ethics, morals and values that seek to pull us along with everyone else? His reason for writing is that he hurts for and is concerned about those who are less fortunate, those dying from starvation or disease and those living in conditions that make it difficult to maintain any semblance of dignity and hope. He challenges the reader to use their potential to help the suffering, the abandoned and the destitute. The book addresses many current high-visibility issues that are relevant and part of today's conversation: income inequality and the wealth gap, the fading of the American Dream and the decline of the middle-class, government regulation and the Volcker rule, bank penalties for actions taken during the mortgage crisis and the anniversary of Lyndon Johnson's declaration of a War on Poverty, Congressional gridlock and, most of all, Pope Francis' emphasis on the need to care for the poor and the marginalized. The dynamics involved in these issues demonstrate the author's belief about the nature of man, reflected in lives that are characterized by self-interest, greed and indifference. We have this tendency to look out not just for the needs of ourselves and our own, but also our wants, at the expense of the unmet needs of others - many of whom are living in misery and despair. This book gives his perspective on how all of these issues fit into the big picture of the meaning of life.

So You Think You're in a Relationship Dog n Bone

My motive for writing this book is to restore the unity of the African-American family. There are values that we have strayed away from. So many African-Americans are not getting married because they fear that it will not work out. For those that do get married, fewer and fewer of those marriages are lasting. A great number of people get married with the mindset that if it doesn't work out they will just get a divorce. By having that mindset they are going into the marriage with an attitude of defeat. As I look around our nation, I see so many families breaking apart, thereby destroying future generations. We do what looks good, feels good, and whatever makes us happy as individuals. We are molding our next generation into self-centered out of control individuals going nowhere fast. The morals and values of our ancestors are almost extinct. The desire of my heart is for us to stop hurting and

damaging one another. Its a catastrophic domino effect that seems like a never ending nightmare! We have to take the time to sit back and realize our selfishness only preps the next person for the same, or preps them to feel there's no way out of being nice and loving people and getting hurt, being someone's doormat! I wish to help restore the worth of our men and women; to revive the black community, putting things into proper perspective so that people who get married can STAY married, and for those that aren't married and are afraid of the marriage failing, to break free of that fear and fulfill their desire to be married. We don't have to accept a dysfunctional family as the norm! In order to establish and maintain a healthy family, our perspective on life has to be positive, with one main ingredient: love. It is the responsibility of each individual to do what's necessary to build a strong foundation that will solidify a successful relationship and/or marriage, even while you are still single. It breaks my heart to see so many unhappy people. Whether they are unhappily married or unhappily single, many are miserable and have no clue as to why. In this book I will lay out some things very clearly, step by step, to help you understand why marriages fail, relationships crumb, and fear so gruesomely imprisons us.
