Breatheology Hueber Verlag
Included in the 2018 summer reading list by New York Times Books A modern-day glimpse into the surprising reality of life in

Iran. Iran: A destination that is seldom seen by westerners yet often misunderstood. A country that simultaneously “enchants and enrages” those who visit it. A place where leading a double life has become the norm. In Couchsurfing in Iran, award-winning author Stephan Orth spends sixty-two days on the road in this mysterious Islamic republic to provide a revealing, behind-the-scenes look at life in one of the world’s most closed societies. Through the unsurpassed hospitality of twenty-two hosts, he skips the guidebooks and tourist attractions and travels from Persian carpet to bed to cot, covering more than 8,400 kilometers to recount “this world’s hidden

doings.” Experiencing daily what he calls the “two Irans” that coexist side by side—the “theocracy, where people mourn their martyrs” in mausoleums, and the “hide-and-seek-ocracy, where people hold secret parties and seek worldly thrills instead of spiritual bliss”—he learns that Iranians have become experts in navigating around their country’s strict laws. Though couchsurfing is officially prohibited in Iran—the state fears spies would be able to travel undetected through the country—more than a hundred thousand Iranians are registered with online couchsurfing portals. And thanks to these hospitable, English-speaking strangers, Orth gets up close and

personal with locals, peering behind closed doors and blank windows to uncover the inner workings of a country where public show and private reality are strikingly opposed.

Charley's Web Greenwood Books Ltd Postwar Europe and the Eurovision Song Contest examines how the Eurovision Song Contest has reflected and become intertwined with the history of postwar Europe from a political perspective. Established in 1956, the Eurovision Song Contest is the world's largest popular music event and one of the most popular television programmes in Europe, currently attracting a global audience of around 200 million people. Eurovision is often mocked as cultural kitsch because of its over-the-top performances and frivolous song lyrics. Yet there is no cultural medium that connects Europeans more than popular music, the development of which has always been tied to cultural, economic, political, social and technological change - making Eurovision the ideal tool to explain the history of Europe in the last sixty years. This book uses Eurovision as a vehicle to address topics ranging from the Cold War,

liberal democracy and communism to nationalism, European integration, economic prosperity and human rights. It analyses these subjects through their cultural, political and social relationships with Eurovision entries as expressed through lyrics and music, as well as by examining public debates that have accompanied the selection of the entries and the organisation of the contest itself. Postwar Europe and the Eurovision Song Contest also considers how states have used Eurovision to define their identities in a European context, be it to assert their national distinctiveness, highlight political issues or affirm their Europeanism or Euroscepticism in the context of European integration. Based on original sources, including hitherto unpublished archival documents from international broadcasting organisations, this is a novel historical study of interest to anyone keen to know more about the postwar history of Europe and its cultural history in particular.

Crystal Skulls Waxmann Verlag Gmbh Through a series of close, fascinating examinations of writing on drugs via, among others, Coleridge on opium, Freud

on cocaine, Michaux on mescaline, and Burroughs on all of them, *Writing on Drugs* combines literary criticism with both socio-cultural history and pharmacological science to show how and why drugs have so thoroughly invaded modernity in ways precise and various, profound and unique. Right or wrong, safe or dangerous, Plant illustrates that narcotics, stimulants, and hallucinogens have actually been integral to the cultural life of modern times. They have shaped some of the era's most fundamental philosophies and provided much of its economic wealth. They have even exposed the neurochemistry of the human brain, which, like society itself, has never been drug-free. *Writing on Drugs* fully and compellingly explores the pervasive and ongoing influence of drugs on contemporary thought, word, and deed. *Deutsche Bibliographie* Bloomsbury Academic

"Most of us breathe inefficiently. Life is often lived in the fast lane, and especially when we are stressed, we tend to use only the upper part of our lungs. We forget to breathe deep down into the stomach and thereby lose out on a lot of energy. Only when you become aware of your breathing

and how to train it, you will be able to learn to breathe properly. Your body will immediately absorb more oxygen and after a short time you will have more energy and gain greater mental calmness. Advantages of efficient breathing: Gain more energy in your daily life Become better at managing stress Optimize your work and sport performances Avoid illnesses and get well faster Minimize chronic or transient pain Become happier and more positive Live a healthier and longer life."--Publisher description.

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and

songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a "sexual selection" distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the

topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

Laughter Down the Centuries Springer-Verlag

The Great Recession, triggered by the collapse of financial markets in 2008, struck with such ferocity that millions of people began to question the rationality of our capitalist economic system. And as scholars, journalists, and activists tried to comprehend what was happening, they were forced to look deeply into the nature of capitalism—inevitably leading them to the work of Karl Marx. Now, Marx is enjoying a worldwide rediscovery and resurrection, and his masterwork, *Capital*, has found its way back into college classrooms, labor unions, the Occupy movement, study groups, and into the hands of disillusioned young people. Reading *Capital* can be a daunting endeavor and most readers need guidance when tackling this complex work. *PolyluxMarx* provides such guidance.

Developed by scholars and political activists associated with the Rosa Luxemburg Stiftung (Foundation), one of the leading political education institutions in Germany, this book has been field tested with groups studying Marx's masterpiece over several years. It consists of a large set of PowerPoint presentations, combined with detailed annotations and suggestions for ways to discuss the material. Each page illustrates a central argument from Capital, provides helpful introductory texts, and supplies notes on methodology and teaching tips. *PolyluxMarx* is an ingeniously devised illustrated workbook that will help readers grasp the key arguments of Capital. It will prove invaluable to the curious reader of all ages, as well as to students, teachers, workers, activists, and study groups. *The Sculpture of William Turnbull* New York Review of Books Winner of the 2003 Gradiva Award and the 2003 Goethe Award for Psychoanalytic Scholarship Arguing for the importance of attachment and emotionality in the developing human consciousness, four prominent analysts explore and refine the concepts of mentalization and affect

regulation. Their bold, energetic, and encouraging vision for psychoanalytic treatment combines elements of developmental psychology, attachment theory, and psychoanalytic technique. Drawing extensively on case studies and recent analytic literature to illustrate their ideas, Fonagy, Gergely, Jurist, and Target offer models of psychotherapy practice that can enable the gradual development of mentalization and affect regulation even in patients with long histories of violence or neglect.

A Companion to Tacitus brings much needed clarity and accessibility to the notoriously difficult language and yet

indispensable historical accounts of Tacitus. The companion provides both a broad introduction and showcases new theoretical approaches that enrich our understanding of this complex author. Tacitus is one of the most important Roman historians of his time, as well as a great literary stylist, whose work is characterized by his philosophy of human nature Encourages interdisciplinary discussion intended to engage scholars beyond Classics including philosophy, cultural studies, political science, and literature Showcases new theoretical approaches that enrich our understanding of this complex author Clarifies and explains the notoriously difficult language of Tacitus Written and designed to prepare a new generation of scholars to examine for themselves the richness of Tacitean thought Includes contributions from a broad range of established international scholars and rising stars in the field *Animal Beauty* Springer New York Times bestselling and award-winning author Joy Fielding tells the story of an ambitious journalist whose foray into the mind of a killer puts her own family in jeopardy. Charley Webb is a beautiful

single mother who writes a successful and controversial column for the Palm Beach Post. She's spent years building an emotional wall against scathing critics, snooty neighbors, and her disapproving family. But when she receives a letter from Jill Rohmer, a young woman serving time on death row for the murders of three small children, her boundaries slowly begin to fade. Jill wants Charley to write her biography so that she can share the many hidden truths about the case that failed to surface during her trial. Seeing this as a once-in-a-lifetime opportunity, Charley begins her journey into the mind of this deeply troubled woman. Her path takes a twisted turn, however, when the anonymous letters she's recently received from an angry reader evolve into threats, targeting her son and daughter. As Charley races against time to save her family, she begins to understand the value of her seemingly intrusive neighbors, friends, and relatives. As she discovers, this network of flawed but loving people might just be her only hope of getting out alive. Filled with complex characters and a plot rich with intrigue, Charley's Web is Joy Fielding at her heart-skipping,

mesmerizing best.

Dieses Buch zeigt auf unterhaltsame Weise auch dem bisher Unerfahrenen, wie eine Präsentation pragmatisch vorbereitet und mit medialer Unterstützung durchgeführt werden kann. Behandelt werden graphische Gestaltung, Lern- und Arbeitstechniken sowie Gesprächsführung und Rhetorik. Berücksichtigt werden dabei Aspekte der Disziplinen Arbeitswissenschaft und Psychologie. Aber auch Kenntnisse wissenschaftlichen Arbeitens, z.B. Quellensuche, Quellenbewertung und Zitieren, sowie statistische Grundkenntnisse gehören zu einer Präsentation, insbesondere in wissenschaftlichen Bereichen. Die Fähigkeit, professionell zu präsentieren, ist nicht nur in der Praxis, sondern auch in der Wissenschaft grundlegend. Der Autor ist überzeugt: Mit dem richtigen Handwerkszeug kann jeder lernen zu präsentieren - und das kann sogar Spaß machen. Die zweite Auflage wurde überarbeitet und erweitert.

The Dove Flyer tells the story of the last

years of the Jewish community in Baghdad, before their expulsion in 1950 and settlement in Israel. The young narrator, Kabi, watches as the members of his extended family each develop different dreams and a different sets of fears throughout these tumultuous, transitional times: his mother wants to move out of the new Jewish quarter and back to their old Muslim neighborhood where she felt safer; his father wants to emigrate to the promised land, the new State of Israel, where he will farm and grow rice; his uncle Hizkel, a Zionist, is arrested and taken off to prison to await trial and a possible death sentence; his headmaster, Salim, believes in the equality of Arabs and Jews; and his uncle Edouard just wants to hang out on the rooftop with his doves. Meanwhile, as World War II draws closer and Israeli statehood seems more assured, a noose begins to tighten around Jewish Iraqis. Houses are appropriated, Jews are beaten in the streets and hung in public, and young Kabi watches as the storied legacy of the Jewish community in Baghdad is dismantled piecemeal and finally decimated. As for the land of milk and honey, there is neither milk, nor

honey. It is a desert, a place as barren and coarse as the community Kabi and his family left behind was vibrant, bountiful, and dreamy.

Neuroscience, Consciousness and Spirituality presents a variety of perspectives by leading thinkers on contemporary research into the brain, the mind and the spirit. This volume aims at combining knowledge from neuroscience with approaches from the experiential perspective of the first person singular in order to arrive at an integrated understanding of consciousness. Individual chapters discuss new areas of research, such as near death studies and neuroscience research into spiritual experiences, and report on significant new theoretical advances. From Harald

Walach's introductory essay, "Neuroscience, Consciousness, Spirituality – Questions, Problems and Potential Solutions," to the concluding chapter by Robert K. C. Foreman entitled "An Emerging New Model for Consciousness: The Consciousness Field Model," this book represents a milestone in the progress towards an integrated understanding of spirituality, neuroscience and consciousness. It is the first in a series of books that are dedicated to this topic. *Spring Floods* Random House (NY) At the art of motion Academy, we are excited to offer you this comprehensive manual for embodied learning. Am Ende des 19. und am Anfang des 20. Jahrhunderts war Albanien ein Land, das es zu entdecken galt. Das ewig unruhige Balkanland gehörte noch zu dem in Zerfall begriffenen, großen Osmanischen Reich und war für europäische Reisende nicht einfach zugänglich. Dennoch strömten viele europäische Forscher und Reisende nach Albanien, um den letzten weißen

Fleck auf der Karte Europas zu erkunden. Unter ihnen spielte der österreichische Ingenieur Karl Steinmetz eine besondere Rolle. Im Gegensatz zu den meisten Entdeckern und Reisenden war er auf seine Expeditionen gut vorbereitet. Er lernte albanisch, scheinbar gut, und war dadurch in die Lage versetzt, selbstständig kreuz und quer durch die bis dahin schwer zugänglichen Berge zu reisen und mit den

angeblich so schießwütigen Einheimischen umzugehen. Diese Ausgabe umfasst die drei Reiseschilderungen des abenteuerlustigen Karl Steinmetz aus den Jahre 1903, 1904 und 1905.
