This paper describes a new cross-country database on the importance of small and medium enterprises (SMEs). This database is unique in that it presents consistent and comparable information on the contribution of the SME sector to total employment and GDP across different countries. The dataset improves on existing publicly available datasets on several grounds. First, it extends coverage to a broader set of developing and industrial economies. Second, it provides information on the contribution of the SME sector using a uniform definition of SMEs across different countries, allowing for consistent cross-country comparisons. Third, while we follow the traditional definition of the SME sector as being part of the formal sector, the new database also includes the size of the SME sector relative to the informal sector. This paper describes the sources and the construction of the different indicators, presents descriptive statistics, and explores correlations with other socioeconomic variables. This paper--a product of Finance, Development Research Group--is part of a larger effort in the group to study SME-related issues.

*Modern Treaty Law and Practice* ITBM

On the publication of its first edition, this textbook was welcomed as the definitive study of treaty law written from the viewpoint of an experienced practitioner. As with the first, this edition aims to provide the student and practitioner with a full understanding of the law and updates existing information and refines previous arguments. New to its scope of examination is the study of the use of memorandums of understanding (MOUs) in litigation, the treaty-making capacity of entities such as the Vatican, Taiwan and Palestine, and the effect of hostilities on treaties. Given their increasing importance, there is also a new chapter on international organisations, including an attempt to explain the sometimes baffling roles in treaty-making played by the European Community and European Union. Students and practitioners alike will find this an invaluable guide to this increasingly important subject.

Globalization and the Harmonization of Law Grasindo

Social Control Through Law is remarkable in manner and style. Roscoe Pound shows himself to be a jurist, philosopher, and

scientist. For Pound, the subject matter of law involves examining manifestations of human nature which require social control to assert or realize individual expectations. Pound formulates a list of social-ethical principles, with a three-fold purpose. First, they are meant to identify and explain human claims, demands, or interests of a given social order. Second, they express what the majority of individuals in a given society want the law to do. Third, they are meant to guide the courts in applying the law. Pound distinguishes between individual interests, public interests, and social interests. He warns that these three types of interests are overlapping and interdependent and that most claims, demands, and desires can be placed in all three categories. Pound's theory of social interests is crucial to his thinking about law and lies at the conceptual core of sociological jurisprudence. Pound explains that rights unlike interests, are plagued with a multiplicity of meanings. He rejects the idea of rights as being natural or inalienable, and argues that to the contrary, interests are natural. The contemporary significance of the book is aptly demonstrated by the skyrocketing rate of litigation in our postmodern society. As the influence of familial and religious institutions declines, the courts exert an unprecedented degree of control over the public and private lives of most Americans. Law is now the paramount agency of social control. In the new introduction, A. Javier Treviño outlines the principal aspects of Roscoe Pound's legal philosophy as it is conveyed in several of his books, articles, and addresses, and shows their relationship to Social Control Through Law. This book is an insightful, concise summary of Pound's ideas that, after more than half a century, remains surprisingly fresh and relevant. It will doubtlessly continue to engage jurists, legal theorists, and sociologists for many years to come.

The publication contains an explanation of Most Favored Nation (MFN) treatment and some of the key issues that arise in its negotiation, particularly the scope and application of MFN treatment to the liberalization and protection of foreign investors in recent treaty practice. The paper provides policy options as regards the traditional application of MFN treatment and identifies reactions by States to the unexpected broad use of MFN treatment, and provides several drafting options, such as specifying or narrowing down the scope of application of MFN treatment to certain types of activities, clarifying the nature of "treatment" under the IIA, clarifying the comparison that an arbitral tribunal needs to undertake as well as a qualification of the comparison "in like circumstances" or excluding its use in investor-State cases.

This book brings together the many different institutions and ideas to be found under the label of 'regionalism'; it places the revival of regionalism in a broader historical perspective; it asks whether there are common factors behind the revival of regionalism in so many different parts of the world; and it analyzes the cumulative impact of different brands of regionalism on international order. Leading specialists examine recent developments in regional cooperation in different parts of the

world. They take a critical look at recent trends towards the new regionalism and regionalization, assessing their origins, their present and future prospects, and their place in the evolving international order. As well as concentrating on specific regions, including Pacific-Asia, the Americas, Europe and the Middle East, the book looks at theories of regionalism, the balance between regionalization and globalization in the world economy, the relation between regional organizations and the United Nations, and the relationship between the revival of regionalism and questions of identity and nationalism.

**A Manual of International Law** Institute of Southeast Asian Studies

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.
