This book, about international contracting and contract management, is written from the angle of the contractor and discussed from an international perspective. It comments on real-life cases, taken from various kinds of projects: infrastructural

works (roads, bridges, tunnels, rail roads), wind- and sunfarms, oil and gas installations, such as platforms, pipe lines, power generating works, and large buildings. The book is structured around the contracting cycle. Chapters include dealing with the role of the contractor in international contracting, the tender process, landing and negotiating the contract, types of contract, problems that may occur during project execution, project delivery, and handling guarantee claims. Written primarily for business practitioners operating in the international contracting industry, the title assumes that the reader will have a basic understanding and knowledge of theories related to project management, construction engineering, business law and economics. Though not an academic book, due to its unique blend of practitioners' insight and academic theory, it can be taught in courses at institutes at the master level. As most engineers are going to deal with contracts, this book is specifically recommended for engineering programs both at the graduate and postgraduate level. Lawyers will find the book useful to understand the business context in which their customers and/or colleagues work.

The Legal Status of Migrants Admitted for Employment Jones & Bartlett Learning

What happens when local unions begin to advocate for the rights of temporary migrant workers, asks Michele Ford in her sweeping study of seven Asian countries? Until recently unions in Hong Kong, Japan, Malaysia, Singapore, South Korea, Taiwan, and Thailand were uniformly hostile towards foreign workers, but Ford deftly shows how times and attitudes have begun to change. Now, she argues, NGOs and the Global Union Federations are encouraging local unions to represent and advocate for these peripheral workers, and in some cases succeeding. From Migrant to Worker builds our understanding of the role the international labor movement and local unions have had in developing a movement for migrant workers' labor rights. Ford examines the relationship between different kinds of labor movement actors and the constraints imposed on those actors by resource flows, contingency, and local context. Her conclusions show that in countries—Hong Kong, Malaysia, and Thailand—where resource flows and local factors give the Global Union Federations more influence local unions have become much more engaged with migrant workers. But in countries—Japan and Taiwan, for example—where they have little effect there has been little progress. While much has changed, Ford forces us to see that labor migration in Asia is still fraught with complications and hardships, and that local unions are not always able or willing to act.
