Introduction Salutations young reader!
Today we are going to embark on a
journey back to the age of the dinosaurs.
The dinosaurs are some of the most
incredible animals that ever lived on our
planet. They lived nearly 200 million
years ago and thrived for about 165
million years. We humans have only
been around for about 60,000 years and

we have only been using computers for about 75 years. The dinosaurs mysteriously became extinct and disappeared from our earth, but left their fossilized remains behind. Dinosaur fossils have been constantly discovered in human history; the Chinese thought they were dragon bones and Europeans thought they were the bones of biblical monsters. Luckily, the scientific study of dinosaurs began between 1815-1824 with the discovery of an Iguanodon fossil. Since then dinosaurs have been discovered all over the world. Their immense size, strange shapes, and wonderful natures make them inherently worthy of interest. The study of dinosaurs requires depth of imagination, analytical skills, and thought. The many unanswered questions about their lives,

behavior, and disappearance provoke the curious to seek answers and ask even more questions. I hope this book fuels your imagination and makes you want to learn even more about dinosaurs. I hope you learn to appreciate the value of the dinosaurs and that you bring a spirit of openness and wonder on your journey back to the age of the dinosaurs.

Triceratops Capstone

This clever retelling of a tried-and-true tale has a paleontological twist! Three

Triceratops brothers by the name of Tuff are on a mission to find some grub. There's just one thing standing in their way: a Tyrannosaurus Rex who has a very different idea of what's for dinner! The Tuff brothers must find a way to outsmart this bossy beast, for their very lives—and a bounty of delicious

greens—hang in the balance. This vividly illustrated story transplants the classic tale of “The Three Billy Goats Gruff” into the Cretaceous period, where dino fans of all ages will enjoy seeing their favorite subjects use their smarts to battle it out for dinner.
