Discover easy ways to control your home with the powerful new Raspberry Pi hardware. Program short Python scripts that will detect changes in your home and react with the instructions you code. Use new add-on accessories to monitor a variety of measurements, from light intensity and temperature to motion detection and water leakage. Expand the base projects with your own custom additions to perfectly match your own home setup. Most projects in the book

can be completed in under an hour, giving you more time to enjoy and tweak your autonomous creations. No breadboard or electronics knowledge required! Get to know the latest Raspberry Pi hardware, and create awesome automation solutions for home or work that don't require an electronics degree, cumbersome add-ons, or expensive third-party subscription services. Create easy to run Python scripts on your own that make your Pi do things that would have required a team of automation experts to build only a few years ago. Connect to and control popular home automation lighting systems from a Raspberry Pi. Trigger autonomous actions based on movement, temperature, and timer events. Power on your own computer

and appliances using your voice. Remotely control infrared-enabled consumer electronics, create chatbots to retrieve personalized items of interest, and implement a temperature-monitoring room fan. These are just some of the projects that the book will show you how to make. Most projects can be completed and operational in under an hour, and do not require any messy schematics or a spaghetti bowl of wires and breadboard-attached circuits to operate. Control your home or office exactly the way you want instead of relying on an expensive mysterious box of third-party technology to do it for you. What You Need: Raspberry Pi (Pi 4 Model B or higher recommended) running Raspberry Pi OS

Smartphones sollen unser Leben vereinfachen und bereichern – funktioniert oft, aber nicht immer. Hier setzt unser Sonderheft an, eine Auswahl von aktualisierten Artikeln zum Thema Android, die in c't erschienen sind. Zu Recht haben Handys vielerorts die Kompaktkameras abgelöst. Wir testen Apps, die noch mehr aus den Smartphone-Kameras herausholen, die Fotos in schicke Schwarzweiß-Aufnahmen verwandeln und mit denen Sie Ihre Werke direkt als Postkarte verschicken. Unter dem Schlagwort „Digital Detox“ zeigen wir, wie Sie die Zeithoheit über alle Stören - friede im Smartphone behalten, ohne es auszuschalten. Die gewonnene Zeit

können Sie zum Meditieren oder für Hörbücher nutzen – wir haben die passenden Apps getestet. Oder Sie entspannen sich bei den Lieblingsspielen der Redaktion; vielleicht probieren Sie auch Spielestreaming etwa per Stadia aus. Im Test: das erste faltbare Smartphone, die besten Kamera-Handys, Smartphones um 300 Euro – und Öko-Handys. Zudem haben wir fast alle In-Ear-Kopfhörer einem ausführlichen Hörtest unterzogen. Schließlich zeigen wir Ihnen, wie Sie das neue Smartphone perfekt einrichten – inklusive eines Schwerpunktes speziell zum Kinderschutz. Sie lernen, wie Sie Android-Updates, Tracker in Apps und generell Traffic von Apps prüfen. [App Storm: Best Kindle Fire Apps, a Torrent of Games, Tools, and Learning](#)
