*Leaving Lucy Pear* Crown

A New York Times bestseller from the author of *Band of Brothers*: The biography of two fighters forever linked by history and the battle at Little Bighorn. On the sparkling morning of June 25, 1876, 611 men of the United States 7th Cavalry rode toward the banks of Little Bighorn in the Montana Territory, where three thousand Indians stood waiting for battle. The lives of two great warriors would soon be forever linked throughout history: Crazy Horse, leader of the Oglala Sioux, and General George Armstrong Custer. Both were men of aggression and supreme courage. Both became leaders in their societies at very early ages. Both were stripped of power, in disgrace, and worked to earn back the respect of their people. And to both of them, the unspoiled grandeur of the Great Plains of North America was an irresistible challenge. Their parallel lives would pave the way, in a manner unknown to either, for an inevitable clash between two nations fighting for

possession of the open prairie.

Acclaimed independent filmmaker Ed Burns shares the story of his remarkable career and offers a candid, instructive account of the ins-and-outs of making great movies without the backing of Hollywood. As the second of three children from a working-class Long Island family, Ed Burns thought a career in filmmaking was a pipe dream. When his first film, *The Brothers McMullen*, won the Grand Jury Prize at the Sundance Film Festival, he proved himself to be one of the most distinctive and tenacious filmmakers of our time. Since then he has gone on to star in major Hollywood films while remaining dedicated to his true passion: making small films that he believes in. Sharing the lengths he's gone to in order to write, direct, cast, produce, shoot, and edit films on a shoestring budget, Burns uses stories from his life and career to illustrate what it takes to make it as an indie filmmaker. His extreme focus and drive prove that passion and hard work can pay off, and he urges students and aspiring filmmakers to embrace and learn from their failures—and continue to pursue their goals. A gripping, inspirational story about forging your own path,

Independent Ed is a must-read for casual movie fans, serious film students, and any creative person searching for a bit of inspiration.

6 June 1944: the day Allied forces crossed the Channel and began fighting their way into Nazi-occupied Northwest Europe. Initiated by airborne units and covered by air and naval bombardment, the Normandy landings were the most ambitious combined airborne and amphibious assault ever attempted. Their success marked the beginning of the end for Nazi Germany. Drawing on thousands of hours of eyewitness testimony recorded by the Imperial War Museum, *Forgotten Voices of D-Day* tells the compelling story of this turning point in World War 2. Hearing from paratroopers and commandos, glider pilots and landing craft crewmen, airmen and naval personnel, we learn first-hand what it was like as men waited to go in, as they neared the beaches and drop zones, and as they landed and met the enemy. Accounts range from memories of the daring capture of 'Pegasus' bridge by British glider-bourn troops to recollections of brutal fighting as the assault forces stormed the beaches. Featuring a mass of previously unpublished

material, *Forgotten Voices of D-Day* is a powerful and important new record of a defining moment in modern history.

The Battle of Stalingrad was not only the psychological turning point of World War II: it also changed the face of modern warfare. From Antony Beevor, the internationally bestselling author of *D-Day* and *The Battle of Arnhem*. In August 1942, Hitler's huge Sixth Army reached the city that bore Stalin's name. In the five-month siege that followed, the Russians fought to hold Stalingrad at any cost; then, in an astonishing reversal, encircled and trapped their Nazi enemy. This battle for the ruins of a city cost more than a million lives. Stalingrad conveys the experience of soldiers on both sides, fighting in inhuman conditions, and of civilians trapped on an urban battlefield. Antony Beevor has interviewed survivors and discovered completely new material in a wide range of German and Soviet archives, including prisoner interrogations and reports of desertions and executions. As a story of cruelty, courage, and human suffering, Stalingrad is unprecedented and unforgettable. Historians and reviewers worldwide have hailed Antony Beevor's magisterial *Stalingrad* as the definitive account of World War II's most harrowing battle.

The *Computer Culture Reader* brings together a multi-disciplinary group of scholars to probe the underlying structures and overarching implications of the ways in which people and computers collaborate in the production of meaning. The contributors navigate the heady and sometimes terrifying atmosphere surrounding the digital revolution in an attempt to take its measure through

examinations of community and modes of communication, representation, information-production, learning, work, and play. The authors address questions of art, reality, literacy, history, heroism, commerce, crime, and death, as well as specific technologies ranging from corporate web portals and computer games to social networking applications and virtual museums. In all, the essayists work around and through the notion that the desire to communicate is at the heart of the digital age, and that the opportunity for private and public expression has taken a commanding hold on the modern imagination. The contributors argue, ultimately, that the reference field for the technological and cultural changes at the root of the digital revolution extends well beyond any specific locality, nationality, discourse, or discipline. Consequently, this volume advocates for an adaptable perspective that delivers new insights about the robust and fragile relationships between computers and people.

With the same style and insight he brought to his previous studies of American cinema, acclaimed critic David Thomson masterfully evokes the history of America's love affair with the movies and the tangled history of Hollywood in *The Whole Equation*. Thomson takes us from D.W. Griffith, Charlie Chaplin, and the first movies of mass appeal to Louis B. Mayer, who understood what movies meant to America—and reaped the profits. From Capra to Kidman and Hitchcock to Nicholson, Thomson examines the passion, vanity, calculation and gossip of Hollywood and the films it has given us. This one-volume history is a brilliant and illuminating overview of “the wonder in the dark”—and the staggering impact Hollywood and its films has had on American culture.

How, as historians, should we 'read' a film? *Histories on Screen* answers this and other questions in a crucial volume for any history student keen to master source use. The book begins with a theoretical 'Thinking about Film' section that explores the ways in which films can be analyzed and interrogated as either primary sources, secondary sources or indeed as both. The much larger 'Using Film' segment of the book then offers engaging case studies which put this theory into practice. Topics including gender, class, race, war, propaganda, national identity and memory all receive good coverage in what is an eclectic multi-contributor volume. Documentaries, films and television from Britain and the United States are examined and there is a jargon-free emphasis on the skills and methods needed to analyze films in historical study featuring prominently throughout the text. *Histories on Screen* is a vital resource for all history students as it enables them to understand film as a source and empowers them with the analytical tools needed to use that knowledge in their own work.

A remarkable eyewitness account of the most brutal combat of the Pacific War, from Peleliu to Okinawa, this is the true story of R.V. Burgin, the real-life World War II Marine Corps hero featured in HBO's *The Pacific*. "Read his story and marvel at the man...and those like him."—Tom Hanks When a young Texan named R.V. Burgin joined the Marines 1942, he never imagined what was waiting for him a world away in the Pacific. There, amid steamy jungles, he encountered a ferocious and desperate enemy in the Japanese, engaging them in some of the most grueling and deadly fights of the war. In this remarkable memoir, Burgin reveals his life as a special breed of Marine. Schooled by veterans who had endured the cauldron of Guadalcanal, Burgin's company soon confronted snipers, repulsed jungle ambushes, encountered abandoned corpses of hara-kiri victims, and warded off howling banzai attacks as they island-hopped from one bloody battle to the next. In his two years at war, Burgin rose from a green private to a seasoned sergeant, fighting from New Britain through Peleliu and on to Okinawa, where he earned a Bronze Star for valor. With unforgettable drama and an understated elegance, Burgin's gripping narrative stands alongside those of classic Pacific chroniclers like Robert Leckie and Eugene Sledge—indeed, Burgin was even Sledge's platoon sergeant. Here is a deeply moving account of World War II, bringing to life the hell that was the Pacific War.

NEW YORK TIMES BESTSELLER • “Comprehensive, enlightening, and terrifyingly timely.”—The New York Times Book Review (Editors' Choice) WINNER OF THE GOLDSMITH BOOK PRIZE • SHORTLISTED FOR THE LIONEL GELBER PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY

The Washington Post • Time • Foreign Affairs • WBUR • Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking: Is our democracy in danger? Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die* “What we desperately need is a sober, dispassionate look at the current state of

affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that.”—The Washington Post “Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of American democracy and politics.”—Ezra Klein, Vox “If you only read one book for the rest of the year, read *How Democracies Die*. . . . This is not a book for just Democrats or Republicans. It is a book for all Americans. It is nonpartisan. It is fact based. It is deeply rooted in history. . . . The best commentary on our politics, no contest.”—Michael Morrell, former Acting Director of the Central Intelligence Agency (via Twitter) “A smart and deeply informed book about the ways in which democracy is being undermined in dozens of countries around the world, and in ways that are perfectly legal.”—Fareed Zakaria, CNN
