Why are so many of the superhero myths tied up with loss, often violent, of parents or parental figures? What is the significance of the dual identity? What makes some superhuman figures "good" and others "evil"? Why are so many of the prime superheroes white and male? How has the superhero evolved over the course of the 20th and early 21st centuries? And how might the myths be changing? Why is it that the key superhero archetypes - Superman, Batman, Wonder Woman, Spider-Man, the X-Men - touch primal needs and experiences in everyone? Why has the superhero moved beyond the pages of comics into other media? All these topics, and more, are covered in this lively and original exploration of the reasons why the superhero - in comic books, films, and TV - is such a potent myth

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this

motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

#### *Luthor DC*

There is a place in the Nevada desert the size of Belgium that doesn't officially exist. It is the airbase where test flights of our top-secret experimental military aircraft are conducted and --not coincidentally-- where the conspiracy theorists insist the Pentagon is hiding UFOs and aliens. This is Dreamland--or Area 51. For Phil Patton, the idea of writing a travel account of a place he couldn't actually visit was irresistible. What he found was a world where Chick Yeager and the secret planes of the Cold War converged with the Nevada Test Site and alien landings at Roswell. A think tank for aviation engineering, Dreamland can be seen from a summit outside the base's perimeter, a hundred miles north of Las Vegas. On Freedom Ridge,

groups of airplane buffs gather with their camouflage outfits and binoculars. These are the Stealth chasers, the Skunkers, guys with code names like Agent X and Zero, hoping for a glimpse of the rumored raylike shapes of planes like Black Manta and "the mother ship." The most mysterious craft is Aurora, the successor to the legendary U-2, said to run on methane and fly as fast as Mach 6. Scanning the same horizon, the UFO buffs are looking for the hovering lights and doughnut-shaped contrails of alien aircraft. Are they looking at something sinister and mysterious? Imagined? Or more terrestrial than they think? Dreamland shows how much we need mystery in the information age, and how the cultures of nuclear power and airpower merge with the folklores of extraterrestrials and earthly conspiracies. Patton found people who found themselves in the mysteries of the place. John Lear, the son of aviation pioneer Bill Lear--who gave his name to the jet--served as a pilot for the CIA's Air America, but back home, he became fascinated by UFOs and eventually believed in it

all: the underground bases, the alien-human hybrids, the secret treaties. But was he a true believer, or part of a disinformation campaign? Bob Lazar seems to know when the saucers will come, and has made three clear sightings at night along Dreamland's perimeter, but is his story real, or a vision of what's possible? Dreamland is an exploration of America's most secret place: the base for our experimental airplanes, the fount of UFO rumors, an offshoot of the Nevada Test Site. How this "blackspot" came to exist--its history, its creators, its spies and counterspies--is Phil Patton's tale. He tunnels into the subcultures of the conspiracy buffs, the true believers, and the aeronautic geniuses, creating a novelistic tour de force destined to make us all rethink our convictions about American know-how--and alien inventiveness.
