A public restroom even more horrific than most, with a stained toilet that can swallow a man whole, sending him to a sewage-filled hell. A riverbank lined with swaying mops given faces and philosophies. A secondary school that seems to waver in and out of reality not only in dreams, but also upon wakeful visitation. An isolated grotto, home to trolls and the posthumous shadow form of Elvis Presley. These are all settings of peculiar, often unnerving events in *How Not to Kill Yourself* author Set Sytes's collection of short bizarro fiction. It features the longer story "The School of Necromancy," in which a school buried deep in the Catacombs of York teaches subjects much less innocent than math or language arts.

In 1947, 4,000 motorcycle hobbyists converged on Hollister, California. As images of dissolute bikers graced the pages of newspapers and magazines, the three-day gathering sparked the growth of a new subculture while also touching off national alarm. In the years that followed, the stereotypical leather-clad biker emerged in the American consciousness as a menace to law-abiding motorists and small towns. Yet a few short decades later, the motorcyclist, once menacing, became mainstream. To understand this shift, Randy D. McBee narrates the evolution of motorcycle culture since World War II. Along the way he examines the rebelliousness of early riders of the 1940s and 1950s, riders' increasing connection to violence and the counterculture in the 1960s and 1970s, the rich urban bikers of the 1990s and 2000s, and the factors that gave rise to a motorcycle rights movement. McBee's fascinating narrative of motorcycling's past and present reveals the biker as a crucial character in twentieth-century American life.

A groundbreaking, research-based guide that sheds new light on why young people make dangerous choices--and offers solutions that work Texting while driving. Binge-drinking. Unprotected sex. There are plenty of reasons for parents to worry about getting a late-night call about their teen. But most of the advice parents and educators hear about teens is outdated and unscientific--and simply doesn't work. Acclaimed adolescent psychiatrist and educator Jess Shatkin brings more than two decades' worth of research and clinical experience to the subject, along with cutting-edge findings from brain science, evolutionary psychology, game theory, and other disciplines -- plus a widely curious mind and the perspective of a concerned dad himself. Using science and stories, fresh analogies, clinical anecdotes, and research-based observations, Shatkin explains:

- * Why "scared straight," adult logic, and draconian punishment don't work
- * Why the teen brain is "born to be wild"--shaped by evolution to explore and take risks
- * The surprising role of brain development, hormones, peer pressure, screen time, and other key factors
- * What parents and teachers can do--in everyday interactions, teachable moments, and specially chosen activities and outings--to work with teens' need for risk, rewards and social acceptance, not against it.

"Presents new research, as well as insights as a clinician and a father....This book is a clear argument to stop putting ourselves in our children's shoes, and to try putting ourselves in their minds, instead." --The Washington Post

"With stories (personal and professional), neuroscience and cognition, psychology and clinical experience Dr. Shatkin offers an abundance of understandable, engaging and actionable information. He explains why and shows how. We can reduce risk in the adolescents we love and teach, but only if we know to how to do so and then do it. Born To Be Wild shows us the way to succeed." --Psychology Today Winner, National Parenting Product Award 2017
