Hachette UK
Charcoal Foundry, the first book in the "Metal Working Shop From Scrap Series", gives you plans for building a metal melting furnace and instructions on basic

pattern making and molding. All the information needed to set up a foundry in your work shop can be found in this book. Simply stated, if you can build a sand castle or make a mud pie, you can make a sand mold to produce castings for your metal shop projects. The main ingredient in these projects is scrap

aluminum and pot metal. The only tools you need to get started are ordinary home shop hand tools, many of which are probably already in your possession. Much of the remainder is found as salvage or cast-off and little expense need be involved. The charcoal foundry is simple to build and operate and the initial cost is so low that it can

be in the reach of nearly anyone. And the fundamentals of pattern-making and molding are easily understood and mastered. Once you have built the charcoal foundry and the metal lathe in book 2, there is little beyond your reach by way of shop equipment. Build as large or small as you wish and you are your own parts supply company. If you already have some machine shop equipment, you will find that adding a foundry to your shop greatly expands your capacity.

Being able to produce your own castings for accessories and equipment is a great advantage. Design your own, make a copy or follow a plan. It's easy when you're in control and can produce your own castings.

The Course of Empire

InterVarsity Press
 WOULD THEY DESTROY
 EARTH IN ORDER TO SAVE
 IT Conquered by the Jao
 twenty years ago, the

Earth is shackled under alien tyranny^{3/4}and threatened by the even more dangerous Ekhat, who are sending a genocidal extermination fleet to the solar system. Humanity's only chance rests with an unusual pair of allies: a young Jao prince, newly arrived to Terra to assume his duties, and a young human woman brought up amongst the Jao occupiers. But both are under pressure from the opposing forces^{3/4}a cruel Jao viceroy on one side, determined to drown all

opposition in blood; a reckless human resistance on the other, perfectly prepared to shed it. Added to the mix is the fact that only by adopting some portions of human technology and using human sepoy troops can the haughty Jao hope to defeat the oncoming Ekhat attack^{3/4}and then only by fighting the battle within the Sun itself. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Into the Forge BRILL

In the final Avatar Series

adventure, an ordinary mortal is chosen as the champion of Cyric the Mad and joins the battle of the gods When Malik, an ordinary mortal, is mysteriously chosen as the champion of Cyric—the Lord of Murder and the Prince of Lies—and imbued with divine powers, he has no idea of the epic struggle that awaits him. Malik is drawn deeper and deeper into the immortal conflict between Cyric and Mystra, the mother of all magic and a former ally. As Cyric's champion,

Malik gets a front row seat in the age-old battle of the gods, meeting such heroes as Adon and Kelemvors—and bearing witness to the final struggle between good and evil.

Urban Green Wizards of the Coast

Illustrated throughout, this book presents a summary of the Sheffield metal trades including a description of the processes involved and the special environment produced by the buildings of the industry. It also describes conservation

issues.

Gas Burners for Forges, Furnaces, & Kilns Inner City Books

In this landmark book the renowned scholar of religion Mircea Eliade lays the groundwork for a Western understanding of Yoga, exploring how its guiding principle, that of freedom, involves remaining in the world without letting oneself be exhausted by such "conditionings" as time and history. Drawing on years of study and experience in India, Eliade provides a comprehensive

survey of Yoga in theory and practice from its earliest foreshadowings in the Vedas through the twentieth century. The subjects discussed include Patañjali, author of the Yoga-sutras; yogic techniques, such as concentration "on a Single Point," postures, and respiratory discipline; and Yoga in relation to Brahmanism, Buddhism, Tantrism, Oriental alchemy, mystical eroticism, and shamanism. The Third to Die Chicago : University of Chicago Press

The sword was the most important of weapons, but relatively little has been written about its metallurgy. The results of the microscopic examination of over a hundred swords are used to tell the story of the making of swords from the first examples through the Middle Ages to the 16th century.

Yoga Simon & Schuster
 Tip and Beau and their allies--elves, dwarves, mages, Silver Wolves and their warrior maidens-- contend with the powers of darkness in their battle to save Mithgar.

Crucible of Command

MIRA

Organizing data from cultures the world over, Mircea Eliade, one of the preeminent interpreters of world religion in the

twentieth century, lays out the basic patterns of initiation: group puberty rites, entrance into secret cults, shamanic instruction, individual visions, and heroic rites of passage. The vast information assembled here transcends usual scholarship. Eliade always affirms the greater experience in all initiation - the indissoluble tie between humans and the cosmos of gods, spirits, animals, ancestors, and nature. As Michael Meade writes in his foreword, Eliade "fervently worked at

keeping the doors of perception open to the world of sacred symbols and creative ritual. Through his insistence that we are each the necessary inheritors of a vast sacred heritage, he has acted as a spiritual elder and distant mentor to me and many students of myth and ritual. Like an archeologist of symbols, he has unearthed, preserved, and found new meanings in the rites of our ancestors."
Valley Forge Spring Publications

'A lovely debut from a gifted young author. Violet Moller brings to life the ways in which knowledge reached us from antiquity to the present day in a book that is as delightful as it is readable.' Peter Frankopan, author of *The Silk Roads In The Map of Knowledge* Violet Moller traces the journey taken by the ideas of three of the greatest scientists of antiquity – Euclid, Galen and Ptolemy – through seven cities and over a thousand years. In it, we follow them from sixth-

century Alexandria to ninth-century Baghdad, from Muslim Cordoba to Catholic Toledo, from Salerno's medieval medical school to Palermo, capital of Sicily's vibrant mix of cultures, and – finally – to Venice, where that great merchant city's printing presses would enable Euclid's geometry, Ptolemy's system of the stars and Galen's vast body of writings on medicine to spread even more widely. In tracing these fragile strands of knowledge from century

to century, from east to west and north to south, Moller also reveals the web of connections between the Islamic world and Christendom, connections that would both preserve and transform astronomy, mathematics and medicine from the early Middle Ages to the Renaissance. Vividly told and with a dazzling cast of characters, *The Map of Knowledge* is an evocative, nuanced and vibrant account of our common intellectual heritage. 'An endlessly

fascinating book, rich in detail, capacious and humane in vision.'

Stephen Greenblatt, author of *The Swerve: How the World Became Modern*

Valley Forge Simon and Schuster

This book is the first to trace the fortunes of the earliest large free black community in the U.S. Nash shows how black Philadelphians struggled to shape a family life, gain occupational competence, organize churches, establish social networks, advance cultural

institutions, educate their children, and train leaders who would help abolish slavery.

Rites and Symbols of Initiation: The Mysteries of Birth and Rebirth Aconyte

From the New York Times bestselling author of *A Deadly Education* comes the seventh volume of the *Temeraire* series, as the Napoleonic Wars bring Will Laurence and Temeraire to South America. "An absorbing adventure." —Publishers Weekly (starred review) The French have invaded

Spain, forged an alliance with Africa's powerful Tswana empire, and brought revolution to Brazil. Captain Will Laurence and his indefatigable fighting dragon, Temeraire, must travel to South America to negotiate with the Incas, who are also being wooed by the French. If they fail, Napoleon may conquer yet another continent in his campaign for world domination, and the tide of the war may prove impossible to stop. Don't miss any of Naomi Novik's magical *Temeraire* series

 teams up with the editors
 of Popular Science to offer
 detailed instruction on

everything from basic wood- and metalworking skills to 3D printing and laser-cutting wizardry. Hackett also explains the entrepreneurial and crowd-sourcing tactics needed to transform your back-of-the-envelope idea into a gleaming finished product. In *The Big Book of Maker Skills*, readers learn tried-and-true techniques from the shop classes of yore—how to use a metal lathe, or pick the perfect drill bit or saw—and get introduced to a whole new world of modern manufacturing

technologies, like using CAD software, printing circuits, and more. Step-by-step illustrations, helpful diagrams, and exceptional photography make this book an easy-to-follow guide to getting your project done. *The Qubit Zirconium* Infobase Publishing Journey into a world in the height of magic, before the great empires fell and before the elven nations split into light and dark. Forging Freedom David J. Gingery Publishing, LLC In a series of interviews, the distinguished scholar,

Mircea Eliade, discusses his life, his literary career, and the development of his theories of the history of religion KeyForge: Tales From the Crucible Historic England A riveting, personal look at one of our country's first heroes in the second captivating novel of the George Washington series by Newt Gingrich and William R. Forstchen, the New York Times bestselling authors of *To Try Men's Souls* It's the winter of 1777, a year after Washington's triumphant surprise

attack on Trenton, and the battered, demoralized Continental Army retreats from Philadelphia. At Valley Forge, they discover that their requests for supplies have been ignored by Congress. With no other options, for weeks the army freezes under tents in the bitter cold. The men are on the point of collapse, while in Philadelphia the British live in luxury. In spite of

the suffering, Washington endures, joined by a volunteer from Germany, Baron Friederich von Steuben. With precious little time, von Steuben begins recasting the army as a professional corps capable of facing the British head-on—something it has never accomplished before—in the process changing the course of history. Valley Forge is a compelling, painstakingly

researched tour-de-force novel about survival, transformation, and rebirth. It chronicles the unique crucible of time and place where Washington and his army, against all odds, were forged into the force that would win a revolution and found the United States of America. Alchemy Harvard University Press Six essays on a variety of interrelated subjects.
