This is the story of Master Wu and the esoteric sword practice he learned at the

White Cloud Monastery in Beijing. It opens this practice to the outside world for the first time, explaining its history, theory, cosmology, and practice in great detail. The Eight Immortals' Revolving Sword goes back for seventeen generations, starting with Wang Chongyang, the founder of the Complete Reality school and martial arts champion of the Song dynasty, and actively continued through Qiu Chuji and other senior Daoist lineage holders. Practicing sword to attain immortality is a profound Daoist method. Master Wu shares his

insights and practice instructions as a way of self-cultivation, illuminating the power of the practice to drive away inauspicious energies, eliminate harmful incidents, and safeguard against ghosts. Able to harness good fortune, practice of this sword set enhances inner communication and creates an intimate connection with the universe. In traditional Chinese fashion, Master Wu guides the reader through the ins and outs of the history, folklore, and technique of this sword practice, focusing especially on the figures of the Eight Immortals and explaining their legends, practices, and feats in great detail. Along the way, he highlights the hidden jewels of training with insightful commentaries on various parables, thereby to bring out the essence of Dao.

He succeeds masterfully at braiding together his unique training history and deep Daoist insights with treasured traditional stories, creating a thrilling account and setting a palpable example of Daoism 1/2s best kept inner secrets as brought to life in actual experiences today.

In 1989, Bill Porter, having spent much of his life studying and translating Chinese religious and philosophical texts, began to wonder if the Buddhist hermit tradition still existed in China. At the time, it was believed that the Cultural Revolution had dealt a lethal blow to all religions in China, destroying countless temples and shrines, and forcibly returning thousands of monks

and nuns to a lay life. But when Porter travels to the Chungnan mountains — the historical refuge of ancient hermits — he discovers that the hermit tradition is very much alive, as dozens of monks and nuns continue to lead solitary lives in quiet contemplation of their faith deep in the mountains. Part travelogue, part history, part sociology, and part religious study, this record of extraordinary journeys to an unknown China sheds light on a phenomenon unparalleled in the West. Porter's discovery is more than a revelation, and uncovers the glimmer of hope for the future of religion in China.

Throughout the years there have been several editions of Zhuang Zi's book with

significant differences in certain parts of the text. Not every word in the book came from Zhuang Zi's pen.

Contributions were made by his disciples and there have been many changes to the original text: errors in hand copying the text, in mistaking notations for text, and in outright forgery throughout centuries. Chen Guying's 1976 edition of the book, an eclectic study of all the editions that identifies probable forgeries, is used as the text reference in the present translation.

A leading scholar feng shui master presents the great depth and diversity of Taoist philosophy, practices, and history in this accessible manual to the oft-misunderstood spiritual tradition.

Millions of readers have come to the

philosophy of Taoism thanks to the classics Tao Te Ching and the I Ching, or through the practices of t'ai chi and feng-shui, but the Tao is less known for its unique traditions of meditation, physical training, magical practice, and internal alchemy. Eva Wong, a leading Taoist practitioner and translator, provides a solid introduction to the Way. All of Taoism's most important texts, figures, and events are covered, as well as its extraordinarily rich history and remarkable variety of practice. Sections include:

- The History of Taoism traces the development of the tradition from the shamans of prehistoric China through the classical period (including the teachings of the famous sage Lao-tzu), the beginnings of Taoism as a religion, the rise of mystical and

alchemical Taoism, and the synthesis of Taoism, Buddhism, and Confucianism.

- Systems of Taoism explores magical sects, divination practices, devotional ceremonies, internal alchemy, and the way of right action.
- Taoist Practices discusses meditation, techniques of cultivating the body, and rites of purification, ceremony, and talismanic magic.

This roadmap to the spiritual landscape of Taoism not only introduces the important events in the history of Taoism, the sages who wrote the Taoist texts, and the various schools of Taoist thinking, but also gives readers a feel for what it means to practice Taoism today. A comprehensive bibliography for further study completes this valuable reference work.

Daoyin, the traditional Chinese practice of guiding the qi and stretching the body is the forerunner of Qigong, the modern form of exercise that has swept through China and is making increasing inroads in the West. Like other Asian body practices, Daoyin focuses on the body as the main vehicle of attainment; sees health and spiritual transformation as one continuum leading to perfection or self-realization; and works intensely and consciously with the breath and with the conscious guiding of internal energies. This book explores the different forms of Daoyin in historical sequence, beginning with the early medical manuscripts of the Han dynasty, then moving into its religious adaptation in Highest Clarity Daoism. After examining the medieval Daoyin Scripture and ways of integrating

the practice into Tang Daoist immortality, the work outlines late imperial forms and describes the transformation of the practice in the modern world. Presenting a rich crop of specific exercises together with historical context and comparative insights, *Chinese Healing Exercises* is valuable for both specialists and general readers. It provides historical depth and opens concrete details of an important but as yet little-known health practice. *Chronicles of Tao* Simon and Schuster Previous translations and descriptions of Li Qingzhao are molded by an image of her as lonely wife and bereft widow formed by centuries of manipulation of her work and legacy by scholars and critics (all of them male) to fit their idea of a what a talented woman writer would

sound like. The true voice of Li Qingzhao is very different. A new translation and presentation of her is needed to appreciate her genius and to account for the sense that Chinese readers have always had, despite what scholars and critics were saying, about the boldness and originality of her work. The introduction will lay out the problems of critical refashioning and conventionalization of her carried out in the centuries after her death, thus preparing the reader for a new reading. Her songs and poetry will then be presented in a way that breaks free of a narrow autobiographical reading of them, distinguishes between reliable and unreliable attributions, and also shows the great range of her talent by including important prose pieces and

seldom read poems. In this way, the standard image of Li Qingzhao, exemplified by a handful of her best known and largely misunderstood works, will be challenged and replaced by a new understanding. The volume will present a literary portrait of Li Qingzhao radically unlike the one in conventional anthologies and literary histories, allowing English readers for the first time to appreciate her distinctiveness as a writer and to properly gauge her achievement as a female alternative, as poet and essayist, to the male literary culture of her day.

In this seventeenth-century Chinese novel, Han Xiangzi, best known as one of the Eight Immortals, seeks and achieves immortality and then devotes himself to converting his materialistic, politically ambitious Confucian uncle—Han Yu, a real historical figure—to Daoism. Written in lively vernacular prose interspersed with poems and songs, the novel takes its readers across China, to the heavens, and into the underworld. Readers listen to debates among Confucians, Daoists, and Buddhists and witness trials of faith and the performance of magical feats. In the mode of the famous religious novel

Journey to the West, The Story of Han Xiangzi uses colorful characters, twists of plot, witty dialogue, and action suitable for a superhero comic book to convey its religious message—that worldly life is ephemeral and that true contentment can be found only through Daoist cultivation. This is the first translation into any Western language of Han Xiangzi quanzhuan (literally, The Complete Story of Han Xiangzi). On one level, the novel is a delightful adventure; on another, it is serious theology. Although The Story of Han Xiangzi's irreverent attitude toward the Confucian establishment prevented its acceptance by literary critics in imperial China, it has remained popular among Chinese readers for four centuries. Philip Clart's introduction outlines the Han Xiangzi

story cycle, presents Yang Erzeng in his social context, assesses the literary merits and religious significance of the text, and explores the theory and practice of inner alchemy. This unabridged translation will appeal to students of Chinese literature and to general readers who enjoy international fiction, as well as to readers with an interest in Daoism.

The I Ching , or "Book of Change," is considered the oldest of the Chinese classics and has throughout history commanded unsurpassed prestige and popularity. Containing several layers of text and given numerous levels of interpretation, it has captured continuous attention for well over two thousand years. It has been considered a book of fundamental principles by philosophers, politicians, mystics, alchemists, yogins, diviners, sorcerers,

and more recently by scientists and mathematicians. This first part of the present volume is the text of the I Ching proper—the sixty-four hexagrams plus sayings on the hexagrams and their lines—with the commentary composed by Liu I-ming, a Taoist adept, in 1796. The second part is Liu I-ming's commentary on the two sections added to the I Ching by earlier commentators, believed to be members of the original Confucian school; these two sections are known as the Overall Images and the Mixed Hexagrams. In total, the book illuminates the Taoist inner teachings as practiced in the School of Complete Reality. Well versed in Buddhism and Confucianism as well as Taoism, Liu I-ming intended his work to be read as a guide to comprehensive self-realization

while living an ordinary life in the world. In his attempt to lift the veil of mystery from the esoteric language of the I Ching, he employs the terminology of psychology, sociology, history, myth, and religion. This commentary on the I Ching stands as a major contribution to the elucidation of Chinese spiritual genius.

The Fengdao kejie or "Rules and Precepts for Worshipping the Dao" dates from the early seventh century and is a key text of medieval Daoist priesthood and monasticism, which was first formally organized in the sixth century. Compiled to serve the needs of both monastic practitioners and priests in training it describes the fundamental rules, organizational principles, and

concrete establishments of Daoist institutions. Speaking in their own voices and presenting the ideal Daoist life of their time, priests and recluses come to life in this fascinating ancient document. Livia Kohn here offers the first complete annotated translation of the Fengdao kejie. She begins with three introductory chapters that outline the development of Daoist organizations and institutions, discuss the date and compilation of the work, and present key issues of terminology and worldview. The text itself contains eighteen sections that address the importance of karma and retribution, the creation of buildings, sacred statues, and scriptures, the design of sacred utensils and ritual clothing, the organization and structure of the ordination hierarchy, as well as a

number of essential rituals, from the recitation of the scriptures to the daily devotions and the ordination ceremony. The Daoist Monastic Manual offers a clear and vibrant description of the lifestyle and organizational structures of medieval Daoism, rooting the religion in the concrete reality of daily activities.

"The Tao that can be spoken of is not the real Way," reads a famous line from the Tao-te-ching. But although the Tao cannot be described by words, words can allow us to catch a fleeting glimpse of that mysterious energy of the universe which is the source of life. The readings in this book are a beginner's entrée into the vast treasury of writings from the sacred Chinese tradition, consisting of original translations of excerpts from the Taoist canon. Brief introductions and notes on the translation accompany the selections

from the classics; books of devotional and mystical Taoism; texts of internal alchemy; stories of Taoist immortals, magicians, and sorcerers; ethical tracts; chants and rituals; and teachings on meditation and methods of longevity.

This important work focuses on early Quanzhen (Complete Perfection) Daoism, a twelfth-century Daoist religious movement and subsequent monastic order. Emphasis in this first study to approach Quanzhen from a comparative religious studies perspective is placed on the complex interplay among views of self, specific training regimens, and the types of experiences that were expected to follow from dedicated praxis. On the basis of

historical contextualization and textual analysis it is demonstrated that in its formative and incipient organized phases Quanzhen was a Daoist religious community consisting of a few renunciants dedicated to religious praxis. The study proper is followed by a complete annotated translation of a text attributed to the founder, which represents one of only two early Quanzhen texts translated to date. Subsequent appendices address issues of dating and contents of the early textual corpus as well as technical Quanzhen religious terminology. *Catalogues of Sales Asiapac Books Pte Ltd*  
The Mandate of Heaven was originally given to King Wen in the 11th century BC. King Wen is credited with founding

the Zhou dynasty after he received the Mandate from Heaven to attack and overthrow the Shang dynasty. King Wen is also credited with creating the ancient oracle known as the Yijing or Book of Changes. This book validates King Wen's association with the Changes. It uncovers in the Changes a record of a total solar eclipse that was witnessed at King Wen's capital of Feng by his son King Wu, shortly after King Wen had died

(before he had a chance to launch the full invasion). The sense of this eclipse as an actual event has been overlooked for three millennia. It provides an account of the events surrounding the conquest of the Shang and founding of the Zhou dynasty that has never been told. It shows how the earliest layer of the Book of Changes (the Zhouyi) has preserved a hidden history of the Conquest.
