The second edition of this user-friendly text for students taking introductory courses in politics builds on the success of the first edition. It provides completely updated and stimulating coverage of topics essential to the understanding of contemporary politics. Ideal for students taking combined degrees at introductory level in politics and the social sciences, it emphasises the individual and social dimension of politics and covers theories and concepts in an accessible way. New features in the second edition include: * new examples drawn from Western democracies and other political systems * expanded sections on nationalism, religion, alternative politics, globalisation and ethnic conflict * updated examples from the most contemporary political events * biographies of key political thinkers and figures.

This book argues that laws spread around the world not through elite networks of technocrats, but through domestic democracy. It combines public opinion experiments, election campaign data, legislative debates, and policy adoption patterns to document how international models generated domestic support for health, family, and employment law reforms across rich democracies.

Controversies in Innocence Cases in America brings together leading experts on the investigation, litigation, and scholarly analysis of innocence cases in America, from legal, political and ethical perspectives. The contributors, many of whom work on these cases daily, investigate contemporary issues presented by

innocence cases and the exoneration movement as a whole. These issues include the challenges faced by the movement, causes of wrongful convictions, problems associated with investigating, proving, and defining 'innocence', and theories of reform. Each issue is placed within a multi-disciplinary perspective to provide cogent observations and recommendations for the effective handling of these cases, and for what changes should be adopted in order to improve the American criminal justice system when it is faced with its most harrowing sight: an innocent defendant.

A political science text for the 21st Century, *DEMOCRACY UNDER PRESSURE ALTERNATE*, with no policy chapters, has provided well over a million students with a comprehensive look at the fundamentals of American Government. Milton Cummings, a respected scholar and academic, and David Wise, a best selling author and political analyst, bring their talents to bear on a text that conveys a balanced, realistic guide to American politics while describing the institutions of American government. In this edition, the theme of "democracy under pressure" is highlighted more fully in the narrative and in the boxed features that focus students on the way democracy responds to needs and demands of various groups over time. The text includes a discussion of the systems approach - a framework of analysis that discusses the political process in terms of inputs and outputs - as well as a key question and related questions to consider in each chapter. *DEMOCRACY UNDER PRESSURE* focuses throughout on the gap that exists between rhetoric and reality in government today. Streamlined content in this edition makes the book even more accessible and appealing to students and instructors alike.

Sometimes, the maelstrom of a crisis can be captured in a single image. The image of the mundane, barely noticeable movement of an urban dweller as they go about their everyday life. Athens and the War on Public Space commences from images just like this one, collected over a two-year period of research (2012-2014)

in Athens during a time of severe financial and political crisis. For the author-curators of this volume, public space became a light-sensitive surface upon which they could begin to map the material imprints of the most structural and violent characteristics of the crisis, and their research spread in different directions, tracking the role of infrastructure and the shifts the financial crisis brought about upon built environments, the violent manifestations of the official anti-migrant policy, the rise of racism, the imposition of the emergency upon public space, and the phenomenology of mass transit.

Think/Point/Shoot gives students a thorough overview of the role of ethics in modern media creation. Case studies emphasize the critical issues in global media ethics today in all stages of media creation from preproduction research and development, to production and post production. This volume features practicing filmmakers, journalists, and media creators who provide insight into dealing with real-world ethical dilemmas. For this era, digital imagery, sounds, and web communication have opened doors to sharing thoughts and ideas instantaneously to potentially vast audiences. This presents exciting opportunities, but also serious ethical, legal, and social challenges. The cases and exercises found in this book are applicable to the current media field while still remaining grounded in strong ethical theory.

Think/Point/Shoot explains the challenge of communicating a story to a worldwide audience while maintaining ethical standards. A companion website provides additional resources for students and instructors: media ethics game chapter summaries and case studies important forms Instructors will also find: classroom exercises PowerPoints video from the "Global Media Ethics" Conference from March 2013

The Routledge Handbook of Taxation and Philanthropy ventures into a territory that is still widely unexplored. It contains 30 academic contributions that aim to provide a better understanding of whether, why, and how philanthropic initiatives, understood as voluntary contributions for the common good, can and should be fostered by states through tax incentives. The topic has been addressed from a multidisciplinary and multicultural perspective – covering neuroeconomics, sociology, political science, psychology, affective sciences, philosophy, behavioral economy, and law – because of its global and multifaceted nature. It also contains the OECD report on Taxation and Philanthropy released in November 2020, which was prepared in this context as a result of a collaboration with the Geneva Centre for Philanthropy of the University of Geneva. The book is divided into four sections, exploring, respectively, the justification of tax incentives for philanthropy, theoretical and empirical insights about taxes, efficiency and donor behavior in that context, and tax incentives for cross-border philanthropy and for hybrid

entities and social entrepreneurship. It is believed that this volume will be a landmark yet only the beginning of a journey in which a lot remains to be studied, learned, and said.

Social accounting as a discipline has challenged the methodology and focus of the larger field of accounting over the last 50 years. More recently it has taken on greater significance for other subjects as well, addressing issues for public policy and management more broadly. These include the issues of the nature of accountability in the contemporary plural state, environmental and societal sustainability, the ethical management and governance of public services and resources, and the creation and sustenance of social capital as an essential element of the modern plural state. Social Accounting and Public Management brings together for the first time researchers from a range of disciplines including accounting, political science, management, sociology and policy studies to discuss and develop our knowledge and theory of the nature of ‘accountability’ in contemporary global society and the challenges it may pose for public policy and management. This book addresses this nexus of

all of these issues and disciplines, and through this, makes a contribution to the development of the disciplines of both social accounting and public policy and management.
