MAYO COLTON

Power Farming Technical Annual GeraMond Verlag
Lewis Hamilton's record-breaking achievements in F1 are the latest successes in a glorious motor sport record for Mercedes and Benz that stretches back to the very first races in the 1890s. For the first time, this book tells the story of Mercedes in motor sport from the very beginning, with those pioneers of the 19th century, right through to today's hybrid F1 cars. It covers the triumphs and disasters, from the early Grand Prix machines and the extraordinarily advanced and massively powerful racers of the 1930s to the highs of F1, Le Mans and Mille Miglia glory and the sorrow of the 1955 Le Mans disaster. The story is brought

right up to date, tracing Mercedes victories in sports car racing, Indycar, F1 and Formula E - and this book celebrates the achievements of some of the world's greatest drivers, from Caracciola, Fangio and Moss to Hakkinen, Unser and Hamilton.

Pacific Defence Reporter Silver Arrows The story of Mercedes-Benz in motor sport

This book in four sections covers the 'Operational Milieu and Special Operations', 'Successful Special Operations', 'Failed Special Operations', and 'Implications for India'. It covers regular, irregular and mixed operations under the rubric of hybrid warfare of select foreign militaries, and Indian experience in sub-conventional operations. A myriad of successful and failed special operations covering a span of over seven decades from 1943 onwards have been analyzed in detail, drawing lessons from each. The last Section, 'Implications for India', covers lessons, challenges and recommendations in three chapters. These highlight India's adverse strategic asymmetry vis-a-vis China-Pakistan, inability of India to put in place SOF structures to optimize the considerable SF potential for employment at the strategic, operational and tactical levels, and ending up with policy recommendations.
