Ever think of making your own beauty products -- handmade, high performance, healthy alternatives to just about every chemical laden product you currently put on your face and body? It's easier than you think! In Make It Up author Marie Rayma shares the recipes she has developed through years of trial, error, and testing to come up with the very best. This is real makeup and skincare: bright lipsticks, quality mineral powders, long-wearing eyeliners, and masks and cleansers that yield results. Rayma walks you through natural ingredients available online or at health food stores. These awesome oils, butters, clays, and minerals will replace the petroleum products, artificial colors, and lab-created mystery fragrances that have untold effects on our bodies. Products can be tailored for individual needs -- from swapping out ingredients not suitable for sensitive skin to whipping up the perfect colors suited for any complexion. With easy-to-follow instruction, Make It Up provides more than 40 essential cosmetics and skin care projects so you can make just what you want, when you need it.

The first step in picking out the correct products and in making homemade creams and a lotion is to use something that's right for you. Depending on your age, diet and genetics you will primarily fall into one of the following 5 skin types: 1. Normal Skin The simplest to maintain normal skin has little to no oily spots, maintains regular circulation with little to no trouble spots. It's fairly elastic and looks healthy with very little make-up and attention. 2. Oily Skin Most prone to breakouts, the trouble zones are usually in the T zone of your face (forehead, nose and chin); oily skin tends to have oversized pores and can look greasy or shiny. With the right creams and proper diet its oil levels can be maintained. Oily skin tends not to have much wrinkling or aging. 3. Dry Skin Most people with dry skin feel tightness after washing their face and easily flake around the mouth and nose with dry spots. Dry skin is prone to aging and wrinkling and it's important to properly moisturize and nourish it regularly. 4. Sensitive Skin The sensitive skin type becomes irritated easily, gets red and dry spots and breaks out easily. This skin type is like a historical map - it tends to wear all of its battles for all to see. The type of creams and lotions applied on sensitive skin is extremely important as an irritation or reaction can occur with certain ingredients and chemicals. 5. Combination Skin The most common skin type in women, combination skin is both oily and dry. Combination skin tends to be dry on the cheeks and around the eyes and oily spots on the forehead and nose. IT requires more cleansing in the oily areas and sensitive creams without too much oil in the dry areas. In this guide we focus on the three extreme skin cases grouping normal, combination and sensitive into a Sensitive Category. Because combination and normal skin is the most adaptable to most products, anything created for sensitive skin will only promote health and the look of younger,

suppler skin with a clear complexion. The other two are oily and dry skin types.

Homemade Organic Lotion: 39 Best Natural Lotions Recipes For All Skin Types I would like to thank and congratulate you for downloading "Homemade Organic Lotion". You are certainly going to learn that. The skin is the largest organ and it requires a lot of attention in order to stay healthy. One of the biggest threats is represented by dehydration, which becomes an even bigger issue to consider during the cold winter season. When the skin suffers from dehydration, it becomes dry and has an aged aspect. Preparing homemade lotions and body butters is not as complicated as you might expect. All homemade lotions & body butters recipes have a basic pattern and, once you grasp that, you can customize your recipes as you desire. First and foremost, it is highly important that you use the correct quantities, as this will ensure a stable product. The texture of the lotion/body butter depends on the quantity you have used for each of the chosen ingredients: it is also influenced by the chosen emulsifier, co-emulsifier and essential oils. In some recipes, it is possible to use a number of additional ingredients, such as glycerin or fragrances. This is what you will find in the book: Understanding Skin types Base ingredients of the lotion Lotions for Dry Skin Lotions for Normal Skin Lotions for Oily Skin Sunscreen Lotions Secrets to making natural lotions Importance of a natural skin lotion Thanks again for downloading this book. It is my sincere hope that it will answer all your questions on Homemade Organic Lotion.
