The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions

for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Medical interviews have changed a lot with time; in the last two decades, multiple mini interviews (MMIs) have revolutionized the assessment strategies for entrance to medical schools. MMIs usually consist of 6-10 stations of independent assessments done in a timed circuit so that the same examiner evaluates a specific skill for a station among the candidates. Many of these stations assess a candidate's soft skills, including critical thinking, problem solving, team working, leadership and professional attitudes in addition to their knowledge, skills and motivation towards choosing medicine as a career. MMIs are not just a test of a candidate's

knowledge or skills, but their ability to use it appropriately at the right time. Aristotle said, 'we are what we repeatedly do. Excellence, then, is not an act, but a habit'. Candidates wishing to succeed in medical MMI interviews need repetitive practice in the various stations. These stations usually include assessments on communication skills, medical ethics, recent medical facts, role play with an empathetic approach, data interpretation and calculations, scenario-based situations, personal character, motivation and judgment. This book will provide an excellent variety of opportunities to practice these stations and guide the candidate with a framework of answers. This book can be used for various medical university entrance exams, including those in the

United Kingdom via the Universities and Colleges Admissions Service (UCAS), the United States via the American Medical College Application Service (AMCA), Canada via the respective Medical School Applications Service, Australia via the specific state Tertiary Admissions Centre and many other countries via their specific admission pathways. Dr. Thanthullu Vasu has previously published four medical books alongside many chapters and articles in leading international journals. He has founded, organized and directed many teaching courses that have received excellent feedback. He regularly organizes national MMI courses for candidates applying to medical schools; these courses are in high demand and have consistently produced a successful

outcome. Many of the contributors in the book are team members from the RISE Foundation Leicestershire, a charity based in Leicestershire (<https://risefoundationuk.com/>). All the contributors have extensive experience as examiners in many interviews and courses. The royalties from the sale of this book will be donated to the RISE Foundation Leicestershire. Thank you for buying this book, as the money will go towards helping various causes supported by this charity. We wish you much success in your interviews and your future medical career.

In recent years retrieval practice has continued to grow in prominence and interest – an evidence-informed effective teaching and learning strategy that supports all learners. After extensive reading, engaging with research and working with schools, Kate Jones has written a guide that explores how retrieval practice can work in a primary school context. The book begins with research then focuses on classroom application, covering curriculum design, task and question design with retrieval

practice and how to embed retrieval practice as part of the language of learning across the wider school community. This is an essential read for teachers and leaders at all levels looking to effectively embed retrieval practice in their primary classroom.
