Academies Press

Includes Part 1A: Books and Part 1B: Pamphlets, Serials and Contributions to Periodicals

Federal Register National Academies Press

Many Christians believe and have been taught that the bride of Christ is the church, and this presupposition is widely held by scholars, ministers, and laity alike as though it were a biblical precept. Yet this view actually owes its origins to pagan heresy and mysticism that infiltrated the church over the centuries. In fact, the scriptures tell us who Jesus will marry and it is neither the Christian church nor Israel. *Shekinah Unveiled* examines and irrevocably dismantles the ages-old traditions that maintain that the church is the bride of Christ and that Israel was Yahweh's wife. Author and

theologian John Whitman proves, from scripture, who the true bride of Christ and the wives of Yahweh are, and he explains why it matters to know the identity of the bride of Christ. Knowledge of the true identity of the bride of Christ affects multiple core doctrines of faith: the imago Dei, marriage, sexuality and the family, sin, Christology, ecclesiology, eschatology, judgment, bridal theology, and theology proper. And because the latter is itself the bedrock upon which not only systematic theology but each of these other attendant doctrines are founded, the very heart of Christianity is affected by knowing the identity of Christ's bride.

WestBow Press

This volume is the newest release in the

authoritative series of quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy people. Dietary Reference Intakes (DRIs) is the newest framework for an expanded approach developed by U.S. and Canadian scientists. This book discusses in detail the role of vitamin C, vitamin E, selenium, and the carotenoids in human physiology and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for different groups

based on age and gender, along with a new reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is "too much" of a nutrient.

Nuclear Science Abstracts

Cities and Their Vital Systems asks basic questions about the longevity, utility, and nature of urban infrastructures; analyzes how they grow, interact, and change; and asks how, when, and at what cost they should be replaced. Among the topics discussed are problems arising from increasing air travel and airport congestion; the adequacy of water supplies and waste treatment; the impact of new technologies on construction; urban real estate values; and the field of "telematics," the combination of

computers and telecommunications that makes money machines and national newspapers possible.

Monthly Catalog of United States Government Publications

The Code of federal regulations is the codification of the general and permanent rules published in the Federal register by the executive departments and agencies of the federal government.

Edwin I. Hatch Nuclear Plant Unit 2, Operation

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this

volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.
