Ideal for residents, practicing radiologists, and fellows alike, this updated reference offers easy-to-understand guidance on how to approach musculoskeletal MRI and recognize abnormalities. Concise, to-the-point text covers MRI for the entire musculoskeletal system, presented in a highly templated format. Thoroughly revised and enhanced with full-color artwork throughout, this resource provides just the information you need to perform and interpret quality musculoskeletal MRI. Includes the latest protocols, practical advice, tips, and pearls for diagnosing conditions impacting the temporomandibular joint, shoulder, elbow, wrist/hand, spine, hips and pelvis, knee, and foot and ankle. Follows a quick-reference format throughout, beginning with basic technical information on how to obtain a quality examination, followed by a discussion of the normal appearance and the abnormal appearance for each small unit that composes a joint. Depicts both normal and abnormal anatomy, as well as disease progression, through more than 600 detailed, high-quality images, most of which are new to this edition. Features key information boxes throughout for a quick review of pertinent material.

Orchids of Europe, North Africa and the Middle East De Boeck Superieur

Bernie Little and his canine companion, Chet, are private investigators. Both have had some setbacks in life - Bernie in combat, Chet in K-9 dog-training school - but together they make up a team like no other. In *Thereby Hangs a Tail*, Bernie and Chet are hired to investigate threats made against an unlikely target - a pretty, pampered show dog named Princess. What seems like a joke turns serious when Princess and her owner are abducted. And to make matters worse, Bernie's on-again, off-again girlfriend, reporter Susie Sanchez, disappears too. When Chet gets separated from Bernie, he tries to put the pieces together, find his way home, and save the day. With genuine suspense and

intrigue, combined with humour and insight into the special bond between man and dog, *Thereby Hangs a Tail* is the much awaited sequel to the fantastic, funny, New York Times bestselling *Dog On It*. It will keep everyone talking - and chuckling.

The Voyage of the Challenger Humanoids Inc

For the first time, this extraordinary compilation showcases weird, mysterious and bizarre plants from around the world. Plants trick, kill, steal and kidnap, and this unique book explores a fascinating world in which plants have turned the tables on animals. Author Chris Thorogood showcases these plant behaviours, the interrelationships among plants, the interdependencies between plants and animals, and the intrigue of plant evolution. All types of weird and sinister are featured in this book, from carnivorous plants that drug, drown and consume unsuspecting insect prey; giant pitcher plants that have evolved toilets for tree shrews; flowers that mimic rotting flesh to attract pollinating flies, and orchids that duplicitously look, feel and even smell like a female insect to bamboozle sex-crazed male bees.

Gaston Grummer Madison

Covering over 400 species, this work presents all of the terrestrial mammal species of the Western Palearctic, serving as an excellent guide to the great wealth of fauna in this region. Species accounts are concise and authoritative, giving information on size, distribution, habitat, behaviour, reproduction and feeding. Each account is supported by distribution maps and superb illustrations. The book features over 100 plates, comprising of over 600 colour species artworks. Variation between the sexes is illustrated and anatomical diagrams are provided to assist identification.

Shipbuilders of the Thames and Medway Bloomsbury Wildlife

A unique global survey that touches on all butterfly families and subfamilies while celebrating their immense beauty and great diversity, *Butterflies of the World* is an essential reference and the best book of its kind.

The Venice InsideOut Guide is a pocket-size travel tool. This guidebook comes complete with two PopOut maps, itinerary suggestions, places to see, shop, play, eat, as well as insider

information on getting around town.

Back to School Botanical Magazine Monograph

Following the format of the successful 'Sasol Birds of Southern Africa', this is an identification guide to the birds of Madagascar and the other Indian Ocean islands.

Plant Relationships Penguin Random House South Africa

The years between the two World Wars was an extraordinary period for the French luxury car trade and during this time, Carrosserie Gaston Grümmer was one of the leading coach building houses in Paris. Descended from a long line of coach builders, Gaston Grümmer was the son of Antoine-Joseph whose company, J. Grümmer formerly V. Morel, produced first, from 1845, exceptional horse-drawn carriages and from the 1890s automotive bodies. Trained in the family business before World War I, Gaston Grümmer, spent the war as a soldier, first on horseback and in the trenches and then in the air as a pilot. At the end of hostilities, he brilliantly re-launched the family business transforming it into the Société Anonyme des Etablissements Grümmer. As the company moved towards the production of series bodywork for various manufacturers, Gaston decided that he wanted to break away to build custom cars and in 1924 he created his own company under the name of Carrosserie Gaston Grümmer. For the next ten years he achieved great success on both aesthetic and technical levels. Thanks to recently discovered and previously unpublished archives, his son, Philippe Grümmer, in association with one of the best French automotive historians, Laurent Friry, takes us back to this glorious period during the "Roaring Twenties" recalling the major events of the Concours d'Elégance and Les Salons de l'Auto, and describes the bodies that Gaston Grümmer produced for the chassis of around 54 manufacturers and the hundred or so prizes which he won. Illustrated with photographs, press articles and period documents, including the reproduction of a series of design drawings, this reference book on bodywork of the time is a must for any student of the period.

Equine Fluid Therapy Walter de Gruyter GmbH & Co KG

The phenomenal New York Times bestseller that "explores the upstairs-downstairs goings-on of a posh Parisian apartment

building” (Publishers Weekly). In an elegant hôtel particulier in Paris, Renée, the concierge, is all but invisible—short, plump, middle-aged, with bunions on her feet and an addiction to television soaps. Her only genuine attachment is to her cat, Leo. In short, she’s everything society expects from a concierge at a bourgeois building in an upscale neighborhood. But Renée has a secret: She furtively, ferociously devours art, philosophy, music, and Japanese culture. With biting humor, she scrutinizes the lives of the tenants—her inferiors in every way except that of material wealth. Paloma is a twelve-year-old who lives on the fifth floor. Talented and precocious, she’s come to terms with life’s seeming futility and decided to end her own on her thirteenth birthday. Until then, she will continue hiding her extraordinary intelligence behind a mask of mediocrity, acting the part of an average pre-teen high on pop culture, a good but not outstanding student, an obedient if obstinate daughter. Paloma and Renée hide their true talents and finest qualities from a world they believe cannot or will not appreciate them. But after a wealthy Japanese man named Ozu arrives in the building, they will begin to recognize each other as kindred souls, in a novel that exalts the quiet victories of the inconspicuous among us, and “teaches philosophical lessons by shrewdly exposing rich secret lives hidden beneath conventional exteriors” (Kirkus Reviews). “The narrators’ kinetic minds and engaging voices (in Alison Anderson’s fluent translation) propel us ahead.” —The New York Times Book Review “Barbery’s sly wit . . . bestows lightness on the most ponderous cogitations.” —The New Yorker
Proceedings of the First International Congress of Radiation Protection Univ of California Press

With more than 100 photographs, this book tells the story of a place, a work, and the way it is done. It is a kind of diary of the spirit, in which stage and back-stage and secret images mix together.

The Genus Lavandula Elsevier Health Sciences

The hardcover edition of volume 8 was published in 1994. This paperback edition is the eighth and final volume to be published in the UNESCO General History of Africa. Volume 8 examines the period from 1935 to the present, and details the role of African states in the Second World War and the rise of postwar Africa. This is one of the most important books in the entire series, and as such, it is an unabridged paperback.

Equine Fluid Therapy is the first reference to draw equine-specific fluid therapy information together into a single, comprehensive resource. Offering current information unique to horses on the research and practice of fluid, electrolyte, and acid-base disorders, the book is designed to be clinically oriented yet thorough, providing detailed strategies tailored to equine practice. With information ranging from physiology and acid-base balance to fluid therapy for specific conditions, Equine Fluid Therapy covers fluid treatments in both adult horses and foals, highlighting the unique physiologic features, conditions, and differences in foals. Well-illustrated throughout, the book begins with an overview of the physiology of fluids, electrolytes, and acid-base, then moves into practical information including equipment, monitoring techniques, fluid choices, and potential complications. A final section offers chapters on blood transfusions, colloids, parenteral nutrition, and hemodynamic monitoring. Equine Fluid Therapy is an essential reference for equine practitioners, specialists, and researchers.

Biochimie W. W. Norton & Company

A thorough introduction to the Lightweight Directory Access Protocol (LDAP) technology. The first part of this book offers a detailed overview of the real world applications of the technology. This is followed by an explanation of the technical details of LDAP and a step-by-step demonstration of how to implement an LDAP directory. The book's structure is designed to span the project manager and the specialist IT team and provide each with an understanding of the other's position. Proposes a methodology to help you implement this technology Includes a detailed case study: a global enterprise directory for an extranet Covers all compatible LDAP tools and explores the development of LDAP applications

Musculoskeletal MRI E-Book 5Continents

Orchids have long held a fascination, both for keen botanists and the general public. From the mania of Victorian collectors to the enthusiasm of modern photographers, this family of flowering plants has a strange and exotic appeal. Many orchids are beautiful, and some are rare. This complete reference guide covers the identification, biology and conservation of more than 520 species of orchid found in Europe, North Africa and the Middle

East. The detailed text, 1,270 colour photographs and line drawings all allow the specialist, as well as the avid botanist, to identify the wild orchids of the region with precision. 'This guide is a must for everyone with a passing interest in orchids. I wouldn't go anywhere without mine now.' Birdwatch (August 2007)

Venice Insideout Johns Hopkins University Press

Cet ouvrage offre une revue actualisée des thèmes essentiels de la biochimie pour acquérir un socle initial de connaissances, consolidée par de nombreux exercices d'application. Cette nouvelle édition couvre de façon simple et synthétique les notions de biochimie fondamentales abordées au cours des études du premier cycle universitaire. - Après avoir abordé les notions de chimie de base nécessaires à la compréhension des réactions biochimiques, la première partie présente ensuite les biomolécules, leur nature polymérique et leurs fonctions biologiques. - La deuxième partie concerne les grandes fonctions métaboliques et les réactions impliquées. - La troisième partie aborde les trois thèmes de base de la biologie moléculaire d'un point de vue biochimique, à savoir : la réplication et la réparation de l'ADN, sa transcription en ARN puis sa traduction en protéine. Son approche progressive et enrichie d'exemples pratiques permet à l'étudiant de mieux intégrer les processus biochimiques. L'ouvrage réserve une place importante aux dernières recherches et applications en biochimie : l'acidification des océans, l'empreinte ADN, le pyroséquençage de l'ADN, le processus de développement des médicaments. Des outils d'entraînement et de révision Chaque chapitre se termine par une série d'exercices corrigés. De nombreux exercices sont des études de cas basées sur des données de publications scientifiques ou sur des rapports médicaux. Les séries d'exercices peuvent ainsi servir au travail en classe ou être proposées pour un devoir à la maison. Les résumés et glossaires à la fin de chaque chapitre aident le lecteur à extraire l'essentiel et à contrôler l'acquisition des notions développées. Pour aider les étudiants à utiliser le texte comme livre de référence, chaque partie de chapitre commence par une série de Concepts Fondamentaux et se termine par une Révision des Concepts, pour l'autoévaluation. Cet ouvrage est destiné aux étudiants en 1er cycle de biochimie et de biologie, aux étudiants en sciences médicales, et à ceux préparant les concours de l'enseignement (Capes en particulier).

The Elegance of the Hedgehog John Wiley & Sons

"Why has the valley of Kashmir, famed for its beauty and tranquillity, become a major flashpoint, threatening the stability of a region of great strategic importance and challenging the integrity of the Indian state? This book examines the Kashmir conflict in its historical context, from the period when the valley was an independent kingdom right up to the struggles of the present day. Located on the borders of China, Central Asia and the Sub-Continent, the insurgency in the valley has also created serious tensions between India and Pakistan. Drawing upon research in India and Pakistan, as well as historical sources, this book traces the origins of the state in the 19th century and the controversial "sale" by the British of the predominantly Muslim valley to a Hindu Maharaja in 1846. Through an exploration of the implications for Kashmir of independence in 1947, it gives a critical account of why, for Kashmir, self-determination may seem a more attractive option than affiliation to a larger multi-racial whole."--Bloomsbury Publishing.

The Comparative Imagination Christopher Helm Publishers, Incorporated

The definitive, fully-illustrated guide to the trees of Britain and non-Mediterranean Europe.

Field Guide to the Wild Flowers of the Western Mediterranean Bloomsbury Publishing

New York Times best-selling author and primatologist Frans de Waal explores the fascinating world of animal and human

emotions. Frans de Waal has spent four decades at the forefront of animal research. Following up on the best-selling *Are We Smart Enough to Know How Smart Animals Are?*, which investigated animal intelligence, *Mama's Last Hug* delivers a fascinating exploration of the rich emotional lives of animals. *Mama's Last Hug* begins with the death of Mama, a chimpanzee matriarch who formed a deep bond with biologist Jan van Hooff. When Mama was dying, van Hooff took the unusual step of visiting her in her night cage for a last hug. Their goodbyes were filmed and went viral. Millions of people were deeply moved by the way Mama embraced the professor, welcoming him with a big smile while reassuring him by patting his neck, in a gesture often considered typically human but that is in fact common to all primates. This story and others like it form the core of de Waal's argument, showing that humans are not the only species with the capacity for love, hate, fear, shame, guilt, joy, disgust, and empathy. De Waal discusses facial expressions, the emotions behind human politics, the illusion of free will, animal sentience, and, of course, Mama's life and death. The message is one of continuity between us and other species, such as the radical proposal that emotions are like organs: we don't have a single organ that other animals don't have, and the same is true for our emotions. *Mama's Last Hug* opens our hearts and minds to the many ways in which humans and other animals are connected, transforming how we view the living world around us.

Plantes turbo Newton Abbot : David and Charles

From the award-winning author of the Native American classic *Fools Crow*, James Welch gives us a richly crafted novel of cultural crossing that is a triumph of storytelling and the historical imagination. *Charging Elk*, an Oglala Sioux, joins Buffalo Bill's Wild West Show and journeys from the Black Hills of South Dakota to the back streets of nineteenth-century Marseille. Left behind in a Marseille hospital after a serious injury while the show travels on, he is forced to remake his life alone in a strange land. He struggles to adapt as well as he can, while holding on to the memories and traditions of life on the Plains and eventually falling in love. But none of the worlds the Indian has known can prepare him for the betrayal that follows. This is a story of the American Indian that we have seldom seen: a stranger in a strange land, often an invisible man, loving, violent, trusting, wary, protective, and defenseless against a society that excludes him but judges him by its rules. At once epic and intimate, *The Heartsong of Charging Elk* echoes across time, geography, and cultures.

LDAP Directories Europa Editions

This volume examines for the first time the most important methodological issues concerning Christian poetry - i.e. biblical and theological poetry in classical meters - from a diachronic perspective. Thus, it is possible to evaluate the doctrinal significance of these compositions and the role that they play in the development of Christian theological ideas and biblical exegesis.
