The seventh volume in the Institute of Classical Archaeology's series on the rural countryside (chora) of Metaponto is a study of the Greek sanctuary at Pantanello. The site is the first Greek rural sanctuary in southern Italy that has been fully excavated and exhaustively documented. Its evidence—a massive array of distinctive structural remains and 30,000-plus artifacts and ecofacts—offers unparalleled insights into the development of extra-urban cults in Magna Graecia from the seventh to the fourth centuries BC and the initiation rites that took place within the cults. Of particular interest are the analyses of the well-preserved botanical and faunal material, which present the fullest record yet of Greek rural sacrificial offerings, crops, and the natural

environment of southern Italy and the Greek world. Excavations from 1974 to 2008 revealed three major phases of the sanctuary, ranging from the Archaic to Early Hellenistic periods. The structures include a natural spring as the earliest locus of the cult, an artificial stream (collecting basin) for the spring's outflow, Archaic and fourth-century BC structures for ritual dining and other cult activities, tantalizing evidence of a Late Archaic Doric temple atop the hill, and a farmhouse and tile factory that postdate the sanctuary's destruction. The extensive catalogs of material and special studies provide an invaluable opportunity to study the development of Greek material culture between the seventh and third centuries BC, with particular emphasis on votive pottery and figurative terracotta plaques.

This first study in English of the complete writings of Italo Calvino (1923-85) offers new interpretations of Calvino's main works, taking into account some important unpublished material, and analyses Calvino's intertextual links with major writers of world literature (Conrad, Stevenson, Hemingway and Borges). Postmodern elements in his texts are assessed, and a chapter on Calvino's critical essays shed important light on his creative process.

Willow Chance is a twelve-year-old genius, obsessed with nature and diagnosing medical conditions, who finds it comforting to count by 7s. It has never been easy for her to connect with anyone other than her adoptive parents, but that hasn't kept her from leading a quietly happy life . . . until now. Suddenly Willow's world is tragically changed when her parents both die in a car crash, leaving her alone in a baffling world. The triumph of this book is that it is not a tragedy. This extraordinarily odd, but extraordinarily endearing, girl manages to push through her grief. Her journey to find a fascinatingly diverse and fully believable surrogate family is a joy and a revelation to read. * "Willow's story is one of renewal, and her journey of rebuilding the ties that unite people as a family will stay in readers' hearts long after the last page."—School Library Journal starred review * "A graceful, meaningful tale featuring a cast of charming, well-rounded characters who learn sweet—but never cloying—lessons about resourcefulness, community, and true resilience in the face of loss."—Booklist starred review * "What sets this novel apart from the average orphan-finds-a-home book is its lack of sentimentality, its truly multicultural cast (Willow describes herself as a "person of color"; Mai and Quang-ha are of mixed Vietnamese, African American, and Mexican ancestry), and its tone. . . . Storia universale della Chiesa cattolica dal principio del mondo fino ai di nostri dell'ab. Rohrbacher BRILL

Celebrated at the heart of a notoriously unstable period, the Vacant See, papal funerals in early modern Rome easily fell prey to ceremonial chaos and disorder. Charged with maintaining decorum, papal Masters of Ceremonies supervised all aspects of the funeral, from the correct handling of the papal body to the construction of the funeral apparatus: the temporary decorations used during the funeral masses in St Peter's. The visual and liturgical centre of this apparatus was the *chappelle ardente* or *castrum doloris*: a baldachin-like structure standing over the body of the deceased, decorated with coats of arms, precious textiles and hundreds of burning candles. Drawing from printed festival books and previously unpublished sources, such as ceremonial diaries and diplomatic correspondence, this book offers the first comprehensive overview of the development of early modern funeral apparatus. What was their function in funeral liturgy and early modern festival culture at large? How did the papal funeral apparatus compare to those of cardinals, the Spanish and French monarchy, and the Medici court in Florence? And most importantly, how did contemporaries perceive and judge them? By the late sixteenth century, new trends in conspicuous commemoration had rendered the traditional papal funeral apparatus in St Peter's obsolete. The author shows how papal families wishing to honor their uncles according to the new standards needed to invent ceremonial opportunities from scratch, showing off dynastic resilience, while modelling the deceased's memoria after carefully constructed ideals of post-Tridentine sainthood.

'Rewriting' is one of the most crucial but at the same time one of the most elusive concepts of literary scholarship. In order to contribute to a further reassessment of such a notion, this volume investigates a wide range of medieval and early modern literary transformations, especially focusing on texts (and contexts) of Italian and French Renaissance literature. The first section of the book, "Rewriting", gathers essays which examine medieval and early modern rewritings while also pointing out the theoretical implications raised by such texts. The second part, "Rewritings in

Early Modern Literature", collects contributions which account for different practices of rewriting in the Italian and French Renaissance, for instance by analysing dynamics of repetition and duplication, verbatim reproduction and free reworking, textual production and authorial self-fashioning, alterity and identity, replication and multiplication. The volume strives at shedding light on the complexity of the relationship between early modern and ancient literature, perfectly summed up in the motto written by Pietro Aretino in a letter to his friend the painter Giulio Romano in 1542: "Essere modernamente antichi e anticamente moderni".

The Power of Necessity John Wiley & Sons

Exploring reason of state in a global monarchy, *The Power of Necessity* examines how thinkers and agents in the Spanish monarchy navigated the tension between political pragmatism and moral-religious principle. This tension lies at the very heart of Counter-Reformation reason of state. Nowhere was the need for pragmatic state management greater than in the overstretched Spanish Empire of the seventeenth century. However, pragmatic politics were problematic for a Catholic monarchy steeped in ideals of justice and divine justifications of power and kingship. Presenting a broad cast of characters from across Europe, and uniting published sources with a wide range of archival material, Lisa Kattenberg shows how non-canonical thinkers and agents confronted the political-moral dilemmas of their age by creatively employing the legitimizing power of necessity. Pioneering new ways of bridging the persistent gap between theory and practice in the history of political thought, *The Power of Necessity* casts fresh light on the struggle to preserve the monarchy in a modernizing world.

"Wonderful . . . offers and provokes meditation on the timeless nature of censorship, its practices, its intentions and . . . its (unintended) outcomes." —Times Higher Education
Forbidden Knowledge explores the censorship of medical books from their proliferation in print through the prohibitions placed on them during the Counter-Reformation. How and why did books banned in Italy in the sixteenth century end up back on library shelves in the seventeenth? Historian Hannah Marcus uncovers how early

modern physicians evaluated the utility of banned books and facilitated their continued circulation in conversation with Catholic authorities. Through extensive archival research, Marcus highlights how talk of scientific utility, once thought to have begun during the Scientific Revolution, in fact began earlier, emerging from ecclesiastical censorship and the desire to continue to use banned medical books. What's more, this censorship in medicine, which preceded the Copernican debate in astronomy by sixty years, has had a lasting impact on how we talk about new and controversial developments in scientific knowledge. Beautiful illustrations accompany this masterful, timely book about the interplay between efforts at intellectual control and the utility of knowledge. "Marcus deftly explains the various contradictions that shaped the interactions between Catholic authorities and the medical and scientific communities of early modern Italy, showing how these dynamics defined the role of outside expertise in creating 'Catholic Knowledge' for centuries to come." —Annals of Science "An important study that all scholars and advanced students of early modern Europe will want to read, especially those interested in early modern medicine, religion, and the history of the book. . . . Highly recommended." —Choice
