How Venture Capital Works GRIN Verlag

Cofounder of Fast Company magazine and bestselling author of *Mavericks at Work* and *Practically Radical* shows how true business innovation can spring from the unlikeliest places. Far away from Silicon Valley, in familiar, traditional, even unglamorous fields, ordinary people are unleashing extraordinary advances that amaze customers, energize employees, and create huge economic value. Their secret? They understand that the work of inventing the future doesn't just belong to geeks designing mobile apps and virtual-reality headsets, or to social-media entrepreneurs hoping to launch the next Facebook. Some of today's most compelling organizations are doing brilliant things in simple settings such as retail banks, office cleaning companies, department stores, small hospitals, and auto dealerships. William C. Taylor, cofounder of Fast Company and best-selling author of *Practically Radical*, traveled thousands of miles to visit these hotbeds of simple brilliance and unearth the principles and practices behind their success. He offers fascinating case studies and powerful lessons that you can apply to do ordinary things in extraordinary ways, regardless of your industry or profession. Consider, for instance, how... ·Miami Beach's dazzling 1111 Lincoln Road reimaged the humble parking garage as a high-profile public space that hosts weddings, yoga classes, and celebrity gatherings. ·USAA, the financial-services giant that provides soldiers and their families with insurance and banking products, inspires frontline employees to deliver legendary service by immersing them in military culture. ·Pal's Sudden Service, a fast-food chain with a cult following, serves up burgers and fries with such speed and accuracy that companies from other industries pay to learn from its astonishing discipline. ·Lincoln Electric, a manufacturer based in Euclid, Ohio, dominates its ultracompetitive markets with a fierce devotion to quality and productivity. But the key to its prosperity is a share-the-wealth model that gives everybody a sense of security and a piece of the action. It has maintained a strict no-layoff pledge since 1958. As Taylor writes: "The story of this book, its message for leaders who aim to do something important and build something great, is both simple and subversive: In a time of wrenching disruptions and exhilarating advances, of unrelenting turmoil and unlimited promise, the future is open to everybody. The thrill of breakthrough creativity and breakaway performance . . . can be summoned in all sorts of industries and all walks of life, if leaders can reimagine what's possible in their fields." Simply Brilliant shows you how.

Teaching and the Case Method Harvard Business Press

Seminar paper from the year 2015 in the subject Business economics - Business Management, Corporate Governance, grade: 1,00, University of

Applied Sciences Vorarlberg, language: English, abstract: Change is the norm and flexibility is a requirement, so be prepared to deal with it. A very meaningful sentence nowadays. Organizations and companies all over the world are confronted with change and the question, how to manage it. Threatening external influences force organizational culture to arrange themselves with permanent change processes. Even if there are no evident problems brewing. Imminent external disruptions, like new competitors or technology, the own cost structure or economy depression, can take the organization by surprise too fast. One way to deal with change is to prevent problems that weren't tangible but could arise from different change processes in- and outside the organization. This individual seminar paper is structured in by comparing the academically approach from well-known economics literature with an actual case study with a practical approach. In this context it is about a Harvard Business Review article of November 20th 2015 called "Getting Employees Excited About a New Direction" by Douglas A. Ready. The main goal will be to analyse the change process with a reference to different theories and perspectives following by a practical transfer with possible suggestions or solutions.
