Basic Engineering
Technology covers various
topics related to
engineering, from safety
procedures and
movement of loads to
measurement and
dimensional control.
Marking out, workholding,

and toolholding are also discussed, along with joining, assembly, and dismantling. The interpretation of technical drawings, specifications, and data is considered as well. Comprised of 10 chapters, this book begins with a historical overview of the development of the engineering industry, followed by a discussion on the academic qualifications and training of the various categories of technical personnel employed in the industry. The reader is then introduced to safe practices observed in the engineering industry, with emphasis on health and safety legislation, causes of accidents, and accident prevention. Subsequent chapters focus on safety considerations in the movement of loads; measurement and control of dimensional properties; advantages and disadvantages of marking out; workholding and toolholding applications; and assembly and dismantling. This monograph is intended for undergraduate students and those enrolled in training centers and in industrial apprentice training schemes.

First published in 1972, this second edition of Further Education in England and Wales was written to provide a comprehensive account of the character and extent of further education in England and Wales. The book critically analyses the major features of further education at the time of publication, and suggests ways in which it might profitably develop in the years ahead. It provides an important account of the post-war historical background to further education, and examines in detail topics such as the role of polytechnics and the work of the Council for National Academic Awards; the educational implications of the Industrial Training Act; developments in education for business and management; and, the changing pattern of education for art and design. The book also considers the training of teachers for further education, and further education in Wales.
