FRIDA ARMSTRONG

Sämtliche Werke und Briefe Gunter Narr Verlag

This book, originally published in 1952, describes and explains the stage of the decline of the Russian Empire between the Crimean and First World Wars. The book is divided up by period: the reign of Alexander II (1855-81), the period of reaction (1881-1905) and the 'Revolution' of 1905 and its aftermath (1905-14) and also into three sections: the structure of state and society, political movements and foreign relations.

Philosophie et science au Moyen Age / Philosophy and Science in the Middle Ages SUNY Press

On a cold and rainy Stockholm night, nine bus riders are gunned down by an unknown assassin. The press, anxious for an explanation for the seemingly random crime, quickly dubs him a madman. But Superintendent Martin Beck of the Stockholm Homicide Squad suspects otherwise. This apparently motiveless killer has managed to target one of Beck's best detectives--and he, surely, would not have been riding that lethal bus without a reason. Beck retraces his steps and chases year-old clues to a crime long thought unsolvable.

Outside the Cabinet-Maker's (+Biography and Bibliography) (6X9po Glossy Cover Finish): The automobile stopped at the corner of Sixteenth and some dingy-looking street. The lady got out. The man and the little girl stayed in the car. "I'm going to tell him it can't cost more than twenty dollars," said the lady. "All right. Have you the plans?" "Oh, yes" she reached for her bag in the back seat "at least I have now." "Dites qu'il ne faut pas avoir les forts placards," said the man. "Ni le bon bois." "All right." "I wish you wouldn't talk French," said the little girl. "Et il faut avoir un bon 'height.' L'un des Murphys

A comprehensive study of German materialism in the second half of the nineteenth century is long overdue. Among contemporary historians the mere passing references to Karl Vogt, Jacob Moleschott, and Ludwig Buchner as materialists and popularizers of science are hardly sufficient, for few individuals influenced public opinion in nineteenth-century Germany more than these men. Buchner, for example, revealed his awareness of the historical significance of his *Kraft und Stoff* in comments made in 1872, just seventeen years after its original appearance. A philosophical book which has undergone twelve big German editions in the short span of seventeen years, which further has been issued in non-German countries and languages about fifteen to sixteen times in the same period, and whose appearance (although its author was entirely unknown up to then) has called forth an almost unprecedented storm in the press, . . . such a book can be nothing ordinary; the world-calling it enjoys at present must be justified through its wholly special characteristics or by the merits of its form and content. 'Vogt, Moleschott and Buchner explicitly held that their materialism was founded on natural science. But other materialists of the nineteenth century also

laid claim to the scientific character of their own thought. It is likely that Marx and Engels would have permitted their brand of materialism to have been called scientific, provided, of course, that 'scientific' was understood in their dialectical meaning of the term. Socialism, Engels maintained, had become a science with Marx.

A bestseller in 1941, selected by the Book of the Month Club for a special edition and described by Book of the Month Club News as: "...full of sensational revelations and interspersed with episodes of daring, of desperate conflict, of torture, and of ruthless conspiracy...It is, first of all, an autobiography the like of which has seldom been." The son of a seafaring father, Richard Julius Herman Krebs, a.k.a. Jan Valtin, came of age as a bicycle messenger during a maritime rebellion. His life as an intimate insider account of the dramatic events of 1920's and 1930s, where he rose both within the ranks of the Communist Party and on the Gestapo hit list. Known for his honesty and incredible memory, Krebs dedicated his life to the Communist Party, rising to a position as head of maritime, organizing worldwide for the Comintern, only to flee the Party and Europe to evade his own comrade's attempts to kill him. As a professional revolutionary, agitator, spy and would-be assassin, Krebs traveled the globe from Germany to China, India to Sierra Leon, Moscow to the United States where a botched assassination attempt landed him a stint in San Quentin. From his spellbinding account of artful deception to gain release from a Nazi prison and his work as a double-agent within the Gestapo, to his vivid depiction of a Communist Party fraught with intrigue and subterfuge, Krebs gives an unflinching portrayal of the internal machinations of both parties.

Neoplatonism has sometimes been seen as a species of mysticism. This volume shows that Neoplatonism has, on the contrary, a characteristic and definable structure. It presents the logic of Neoplatonism and carefully distinguishes it from the logic of other forms of philosophy.

Fauna und Flora des Golfes von Neapel Orion

This is the fifth revised edition of the best-selling *A Practical Guide for Translators*. It looks at the profession of translator on the basis of developments over the last few years and encourages both practitioners and buyers of translation services to view translation as a highly-qualified, skilled profession and not just a cost-led word mill. The book is intended principally for those who have little or no practical experience of translation in a commercial environment. It offers comprehensive advice on all aspects relevant to the would-be translator and, whilst intended mainly for those who wish to go freelance, it is also relevant to the staff translator as a guide to organisation of work and

time. Advice is given on how to set up as a translator, from the purchase of equipment to the acquisition of clients. The process of translation is discussed from initial enquiry to delivery of the finished product. Hints are given on how to assess requirements, how to charge for work, how to research and use source material, and how to present the finished product. Guidance is given on where to obtain further advice and professional contacts. This revised edition updates practices in the translation profession and considers the impact of web-based translation offerings. Industry and commerce rely heavily on the skills of the human translator and his ability to make intellectual decisions that is, as yet, beyond the capacity of computer-aided translation.

Trennung der Schule von der Kirche? Multilingual Matters

This book has two related purposes. The first is to demonstrate the extent and importance of language play in human life; the second is to draw out the implications for applied linguistics and language teaching. Language play should not be thought of as a trivial or peripheral activity, but as central to human thought and culture, to learning, creativity, and intellectual enquiry. It fulfils a major function of language, underpinning the human capacity to adapt: as individuals, as societies, and as a species.
