HERRERA NOELLE

Activities for Primary Teachers

Routledge
Now reissued and retypeset, this canonical book

explores the role of language and images in newspaper, radio, online and television news. The authors introduce useful frameworks for analysing language, image and the interaction between the two, and illustrate

these with authentic news stories from around the English-speaking world, ranging from the Oktoberfest to environmental disasters to the killing of Osama bin Laden. This analysis persuasively illustrates how events are retold in the news and made 'newsworthy' through both language and image. This clearly written and accessible introduction to news discourse is essential reading for students, lecturers and researchers in linguistics, media and journalism studies and semiotics.

The Routledge Handbook of English for Academic Purposes provides an accessible, authoritative and comprehensive introduction to English for Academic Purposes (EAP), covering the main theories, concepts, contexts and applications of this fast growing area of applied linguistics. Forty-four chapters are organised into eight sections

covering: Conceptions of EAP Contexts for EAP EAP and language skills Research perspectives Pedagogic genres Research genres Pedagogic contexts Managing learning Authored by specialists from around the world, each chapter focuses on a different area of EAP and provides a state-of-the-art review of the key ideas and concepts. Illustrative case studies are included wherever possible, setting out in an accessible way the pitfalls, challenges and opportunities of research or practice in that area. Suggestions for further reading are included with each chapter. The Routledge Handbook of English for Academic Purposes is an essential reference for advanced

undergraduate and postgraduate students of EAP within English, Applied Linguistics and TESOL.

Advances in Corpus-based Contrastive Linguistics Heinemann

To test whether the writing style in "up-market" English language newspaper editorials has become less formal over the past century as in many other genres, Westin studied language trends in three major British papers. After overviewing previous research on newspaper language, the author discusses methodological issues in using machine-readable corpora for analyzing linguistic change over time, and her multi-feature/multi-dimensional approach extending Biber's work on markers of personal involvement to include narrative and other forms of discourse. Charted results reveal both linguistic change and continuity. Appends the frequency

counts for each of the study's linguistic features. Lacks an index. It is unclear whether Westin is currently affiliated with Uppsala U. or U. College of Gavle, Sweden. Annotation copyrighted by Book News, Inc., Portland, OR

Composition is designed to foster reflection on how theory impacts practice, allowing prospective teachers to assume the dual role of both teacher and student as they enter the discipline of Writing Studies and become familiar with some of its critical conversations. Now in its third edition, the volume offers up-to-date scholarship and a deeper focus on diversity, both in the classroom and in relation to Writing Studies and literacy more broadly. This text continues to offer a wealth of practical assignments, classroom activities, and readings in each chapter. It is the ideal resource for the undergraduate or graduate student

looking to pursue a career in writing instruction.

Multilingual Matters
Teachers in any subject area must have a basic understanding of how language is learned and used in educational contexts

because language impacts teaching and learning across all subjects. This book is written specifically for those teachers and teacher trainees learning to teach who want to know more about language learning and use in educational contexts and, especially, those who care about the social implications of language in education. Chapters address crucial questions that teachers must address: How is language structured? How is language learned at home and in school, by first, second and bilingual language learners? How is language used in classrooms to shape learning? How does language vary in different regions and

due to social characteristics of users? How can language be used to make meaning in different modes (oral/written) and contexts? How do language policies intersect with education policies, and how do these impact teachers? The chapters are full of examples of language use in educational contexts to help readers understand language in action. The examples not only highlight key points, they also provide opportunities for readers to deepen their understanding by experiencing analysis of language. Each chapter closes with a discussion of relevance to educational settings and questions which can be used for in-class

discussion or personal reflection. Suggestions for further readings and online viewing are included, and a comprehensive companion website is available

2 Routledge Comprehensive student-friendly resources designed for teaching Cambridge International AS and A Level English Language (syllabus 9093 for first examination in 2015). The core aim of this Coursebook is to help students to develop and apply the key skills they need to achieve in AS and A Level English Language. They will build the skills needed for assessment through frequent activities. Divided into two distinct parts for AS and A Level studies, the book covers a wide range of reading skills,

such as understanding aspects of style, voice and tone. It also addresses the conventions of key kinds of writing and spoken language, from scripted speeches to travel articles, and looks at how they can capture these conventions in their own work.

Corwin Press

This text tackles the Media and Moving Images requirements of the new National Curriculum at Key Stage 3. The book lays the ground rules for analysis of the key media codes of Written Language, Graphic Images, Film, and Sound, in separate easy-to-use sections. Step-by-step units, featuring a wealth of media materials, show

students how language, images and sound are combined to make media texts. Activities move from looking at a single graphic image or news headline to analyzing much larger media texts.

The Language of Everyday Life Nelson Thornes

The Handbooks of Applied Linguistics provide a state-of-the-art description of established and emerging areas of Applied Linguistics. Each volume gives an overview of the field, explains the most important traditions and their findings, identifies the gaps in current research, and gives perspectives for future directions.

Cambridge University Press

This is a lively, practical guide that provides a fascinating linguistic description of six familiar text and discourse types, showing how language works in everyday life to perform its particular purpose.

Through original examples, students are introduced to a wide-ranging repertoire of analytical concepts and techniques, described in basic, clear terms, and drawn from a broad range of areas of linguistics and language study. The aim of the book is to enable students to discover for themselves what is interesting about different language

situations, and to begin to interrogate the relationship between language, society, and ideology. The Language of Everyday Life includes: topics for discussion; exercises, and; further readings; extensive glossary of technical terms; a practical guide to project work.

Mixed Media Blake Education

Here, at last, is every K-8 teacher's playbook on the critical role academic language plays in content learning and student achievement. What exactly is so different? Margo Gottlieb and Mariana Castro distill the complexities of language learning into four key uses through which students can probe the interplay between language and content, then

demonstrate their knowledge and understanding. It's as straight-forward as that.

Routledge
Northern English has

been the object of much attention linguistically over the last thirty years but scholars have had a tendency to focus on the phonology of the dialects and varieties encountered. The purpose of the present volume is to complement and enrich the existing studies by providing readers with a kaleidoscopic perspective, allowing for a holistic interpretation and understanding of Northern English. It includes studies not only on phonology but also on semantics, syntax and sociolinguistics from a synchronic and diachronic point of view, with a special emphasis on the process of enregisterment. The

varieties covered include Scottish Standard English, Shetland and Northern Ireland as well as varieties from the North of England. The Routledge Handbook of English for Academic Purposes Hodder Education This book is a discourse-pragmatic study of media language in news headlines and leads. News is viewed as discourse in action largely influenced by some unique sociolinguistic and cultural constraints. The period between 1996 and 2002 viewed in this book as very crucial in the political development of Nigeria provided an environment that made highly critical and sensational news reports inevitable. The

three most prominent Nigerian urban newsmagazines namely <Newswatch, <Tell and <TheNews referred to as 'radical press, ' are viewed as adopting a people-oriented approach to confront perpetrators of social unrests and political scandals in Nigeria, especially military dictators and corrupt politicians. In a wide range of stylistic

variations, lexicosemantic and grammatical strategies that produced highly sensational headlines and overlines, the news conveyed clearly marked ideologically significant representations of people and situations. Thus, in the context of Nigerian English, certain culture-specific items of discourse are foregrounded in the news to resist corruption and political power abuse.
