 There is no shortage of African talent in European Football. In fact, a definitive list of the continent's finest players in England's top flight alone, for example, is extremely difficult to compile. Considering that talents such as Michael Essien, Didier

Drogba, Kolo Toure, Benni McCarthy, El-Hadji Diouf and Yakubu are all regularly on display week-in, week-out, African football fans have a multitude of riches to admire. Notwithstanding, Africa's main concern must be towards capturing the coveted FIFA World Cup. THE BIG QUESTION IS: If Africa were that good in football why are they not showing it at the FIFA World Cup? So far no African team (country) has gone beyond the FIFA World Cup quarter final. Ghana and Cameroon have shown class at one time and once made it to the 8th stage though. Senegal and Nigeria have also once made it past the first 16th stage. No doubt, Africa has the football talents; let's pray and hope her officials live up to the challenge in shaping their national team's spirit to tangible results. Just getting to the 16th stage is not good enough for the euphoria. Africa can do

better than merely showing up. I predict a great showing in South Africa 2010, at least to 8th stage, (the semi-finals) and winning in Brazil in 2014. The question then is: Which African country is ready to meet this challenge? The truth of the matter is any of the African teams is capable. This book looks at the history of the Confederation of African Football (CAF) and goes on to feature Africa's great footballers Yesterday, Today and Tomorrow.

Global eSports explores the recent surge of eSports in the global scene and comprehensively discusses people's understanding of this spectacle. By historicizing and institutionalizing eSports,

the contributors analyze the rapid growth of eSports and its implications in culture and digital economy. Dal Yong Jin curates a discussion as to why eSports has become a global phenomenon. From games such as Spacewar to Starcraft to Overwatch, a key theme, distinguishing this collection from others, is a potential shift of eSports from online to mobile gaming. The book addresses why many global game players and fans play and enjoy online and mobile games in professional game competitions, and therefore, they investigate the manner in which the transfer to, from and between online and mobile gaming culture is occurring in a specific subset of global youth. The remaining focus identifies the major platforms used to enjoy eSports, including broadcasting and smartphones. By analyzing these unexamined or less-discussed agendas, this book sheds light on the current debates on the growth of global eSports culture.
