Learn how things get moving and what makes them stop.

Lives in Motion Simon and Schuster

Based upon the author's lifetime practices as a dancer, poet and teacher, this innovative approach to developing body awareness focuses on achieving self-discovery and well-being through movement, mindfulness and writing. Written from a holistic (rather than dualistic) view of the mind-body duality, discussion and exercises draw on dance, psychology, neuroscience and meditation to guide personal exploration and creative expression.

Cities in Motion Princeton University Press

Why do some places--the concourse of Grand Central Terminal or a small farm or even the corner of a skyscraper--affect us so mysteriously and yet so forcefully? What tiny changes in our everyday environments can radically alter the quality of our daily lives? The Experience of Place offers an innovative and delightfully readable proposal for new ways of planning, building, and managing our most immediate and overlooked surroundings.

A Goddess in Motion Farrar, Straus and Giroux

"Emotions in Motion" is ideal for parents and educators who wish to encourage conversations about feelings and emotions.

Your Life in Motion Routledge

Sarah MacNeil is about to put her heart in the hands of a beautiful woman who could be her salvation...or her ruin! Surfing high on the wave of lesbian chic, author/screenwriter Melissa Hartley is deliciously dangerous. She knows the right people, goes to all the right parties, says all the right things. When she meets the quiet, elegant Sarah MacNeil at a hotel bar, Melissa makes all the right moves to get Sarah to her bed, then makes all the right promises to convince the usually cautious young attorney to come live with her in San Francisco. Totally captivated for the first time in her life, Sarah surrenders herself completely. Blinded by the glow of Melissa's white-hot sensuality, is Sarah setting herself up for a total meltdown?

Contextual Transactional Analysis: The Inseparability of Self and World offers a novel and comprehensive reworking of key concepts in transactional analysis, offering insight into the causes of psychological distress and closing the gap between training and clinical practice. By providing a bigger picture - as much sociological as psychological - of what it means to be human, the book makes an essential contribution to current debates about how best to account for and work with the social and cultural dimensions of client experience. James M. Sedgwick captures the ongoing importance of what happens around us and the distinctive kinds of psychological distress that arise from persistent and pervasive environmental disadvantage. Beginning with a view of people as always situated and socialised, the book highlights the many ways that the world always and everywhere constrains or enables thought and action. Ranging through ideas about the kinds of contextual conditions which might make psychological distress more likely and illuminating the complex relationship between socialisation and autonomy, the book suggests what the implications of these conclusions might be for clinical understanding and practice. Sedgwick's insightful and compassionate work revises the theoretical framework, fills a current gap in the clinical literature and points the way to greater practitioner efficacy. Contextual Transactional Analysis will be an insightful addition to the literature for transactional analysts in practice and in training, for professionals interested in the theory and practice of transactional analysis and anyone seeking to understand the contribution of context to psychological distress. Literature is often assumed to be monolingual: publishing rights are sold on the basis of linguistic territories and translated books are assumed to move from one "original" language to another. Yet a wide range of contemporary literary works mix and meld two or more languages, incorporating translation into their composition. How are these multilingual works translated, and what are the cultural and political implications of doing so? In *Literature in Motion*, Ellen Jones offers a new framework for understanding literary multilingualism, emphasizing how authors and translators can use its defamiliarizing and disruptive potential to resist conventions of form and dominant narratives about language and gender. Examining the connection between translation and multilingualism in contemporary literature, she considers its significance for the theory, practice, and publishing of literature in translation. Jones argues that translation does not conflict with multilingual writing's subversive potential. Instead, we can understand multilingualism and translation as closely intertwined creative strategies through which other forms of textual and conceptual hybridity, fluidity, and disruption are explored. Jones addresses both well-known and understudied writers from across the American hemisphere who explore the spaces between languages as well as genders, genres, and textual versions, reading their work alongside their translations. She focuses on U.S. Latinx authors Susana Chávez-Silverman, Junot Díaz, and Giannina Braschi, who write in different forms of "Spanglish," as well as the Brazilian writer Wilson Bueno, who combines Portuguese and Spanish, or "Portunhol," with the indigenous language Guarani, and whose writing is rendered into "Frenghish" by Canadian translator Erin Moure.

Jo Whiley is someone millions of us recognise but very few of us know. Jo's a mother, sister, DJ, wife and music-industry insider who throughout her career - and in an age of fleeting celebrity - has earned the respect of her peers and fans by simply being herself and for her constant enthusiasm, be it for established rock 'n roll royalty or emerging talent. For Jo Whiley, it's all about the

music. My World in Motion offers a unique opportunity to get to know the real Jo Whiley. From her musical epiphany (being carried over the crowd at a Clash concert) to when she became friends with John Peel at Glastonbury (over some very short shorts - his not hers) and interviewed Bono (surviving a power-cut on vodka). My World in Motion is an honest, funny, self-deprecating account of Jo's professional coming of age, and what it means to be a private person in a very public world.

In exhilarating, transformative prose, the poet Patrick Mackie reveals a musician in dialogue with culture at its most sweepingly progressive. Mozart is one of the most familiar and beloved icons of our culture, but how much do we really understand about his music, and what can it reveal to us about the great composer? Following Mozart from his youth in Salzburg to his early death, from his close and rivalrous relationship with his father to his romantic attachments, from his hugely successful operas to intimate compositions on the keyboard, Patrick Mackie leads the reader through the major and lesser-known moments of the composer's life and brings alive the teeming, swiveling modernity of eighteenth-century Europe. In this era of rococo painting, surrealist aesthetics, and political turbulence, Mozart reckoned with a searing talent that threatened to overwhelm him, all the while pushing himself to extraordinary feats of musicianship. In *Mozart in Motion*, we are returned to the volatility of the eighteenth century and hear Mozart's music in all its audacious vividness, gaining fresh perspectives on why his works still move us so intensely today as we continue to search for a modernity he imagined into being.

Fields in Motion: Ethnography in the Worlds of Dance examines the deeper meanings and resonances of artistic dance in contemporary culture. The book comprises four sections: methods and methodologies, autoethnography, pedagogies and creative processes, and choreographies as cultural and spiritual representations. The contributors bring an insiders insight to their

accounts of the nature and function of these artistic practices, giving voice to dancers, dance teachers, creators, programmers, spectators, students, and scholars. International and intergenerational, this collection of groundbreaking scholarly research points to a new direction for both dance studies and dance anthropology. Traditionally the exclusive domain of aesthetic philosophers, the art of dance is here reframed as cultural practice, and its significance is revealed through a chorus of voices from practitioners and insider ethnographers.

Travis Campbell has been at this hockey thing for a while. He knows his days on the ice are numbered, but he's happy with the Moncton Ice Cats and he's still got some time to figure out what comes next. He's been taking college classes online and thought he knew what he was doing, but then he made the ultimate rookie mistake. It turns out the poetry class is not the easier way to get his required English credits. Barnaby Birtwistle has exiled himself to the wilds of New Brunswick, leaving London, his so-called friends, and his cheating ex behind. His life is finally getting back on track, and he's going to keep it that way, even if it means living like a monk. Travis is expecting a bookish nerd to help him pass his staggeringly boring class; Barnaby is expecting a meathead hockey player who struggles to string two words together, let alone appreciate poetry. Turns out that they both have something to learn.

Italia '90 was the best and worst of World Cups. It made a global star of England's inspirational Paul Gascoigne and gave fresh confidence to English football but it was also the lowest-scoring of all World Cups, leading directly to the back-pass ban that transformed the sport. *World In Motion* travels from Africa to South America, via Europe and the Middle East, to hear from the protagonists of Italia '90 and find out why it is still seen as a special and transformative moment, not just in English eyes but in other countries far and wide. It was a World Cup of firsts - from Cameroon's quarter-final trail-blazers via the feats of newcomers

like the Republic of Ireland and Costa Rica - but a tournament too which marked the last hurrah of the old footballing powers of the Eastern Bloc amid the collapse of the Iron Curtain. It began with the biggest shock of any opening game, as nine-man Cameroon beat Argentina, and it ended with the worst final of all, as West Germany beat nine-man Argentina with a much-disputed penalty. In between it gave us a big spectacle, a winning soundtrack and some unforgettable storylines. *World In Motion* speaks to players and coaches, referees and administrators, reporters and fans to gauge the full impact of football's dramatic Italian summer - including meeting Roger Milla at his home in Cameroon and Totò Schillaci at his football school in Sicily. In the process it rediscovers a time when the game stood on the brink of change, with the Premier League and Champions League on the horizon, yet the World Cup remained a thrilling voyage of discovery - a land of novelties, from Fair Play flags to fan embassies to that first-ever penalty shoot-out heartbreak for England ...

Lives in Motion celebrates dance in Thailand, focusing on the diversity of Thailand's dance cultures and their place in today's world. Giving voice to eminent artists and scholars on the complex roles that Thailand is pursuing for artful movement at home and abroad, the book provides key perspectives on Thai dance traditions and practitioners. It explores the many forms and meanings in contemporary dance, changing local traditions in the country, the evolution of Thai dance on the global stage, and hybrid features of the Thai dance world. The book examines how hybridity has been integral to dance cultures in Thailand and discusses how they have actively adapted and negotiated their knowledge in relation to modernity and globalization. Developing new models, standards and sites for dance, movement and theater, dance in Thai has been advancing in innovative ways, whether it is to include fresh forms of skilled bodily movement or to expand in new arenas like tourism and online platforms. Similarly, old systems of training, which included artists' homes, palaces, and temples, have been adapted into the new world of modern education, media, home schooling, and new community rituals. A pioneering contribution on Thai performing arts, this volume examines contemporary Thai dance cultures in the local, national, regional, and global contexts. It will be of great interest

to scholars and researchers of dance and performance studies, cultural studies, Southeast Asia studies, and art.

Emotion in Motion Farrar, Straus and Giroux

By the turn of the twentieth century, Japan's military and economic successes made it the dominant power in East Asia, drawing hundreds of thousands of Chinese, Korean, and Taiwanese students to the metropole and sending thousands of Japanese to other parts of East Asia. The constant movement of peoples, ideas, and texts in the Japanese empire created numerous literary contact nebulae, fluid spaces of diminished hierarchies where writers grapple with and transculture one another's creative output. Drawing extensively on vernacular sources in Japanese, Chinese, and Korean, this book analyzes the most active of these contact nebulae: semicolonial Chinese,

occupied Manchurian, and colonial Korean and Taiwanese transculturations of Japanese literature. It explores how colonial and semicolonial writers discussed, adapted, translated, and recast thousands of Japanese creative works, both affirming and challenging Japan's cultural authority. Such efforts not only blurred distinctions among resistance, acquiescence, and collaboration but also shattered cultural and national barriers central to the discourse of empire. In this context, twentieth-century East Asian literatures can no longer be understood in isolation from one another, linked only by their encounters with the West, but instead must be seen in constant interaction throughout the Japanese empire and beyond.

This enjoyable book first introduces sign language and communication, follows with a history of sign languages in general, then delves into the structure of American Sign Language (ASL). Later chapters outline the special skills of fingerspelling and assess artificial sign systems and their net worth. *Language in Motion* also describes the process required to learn sign language, then explains how to use it to communicate in the Deaf community. Appendices featuring the manual alphabets of three countries complete this enriching book.
