SALAZAR GRANT

Farewell, Fred Voodoo Periscope
 Two destinies intersect in this novel -- that of Gjorg, a young mountaineer who has just killed a man in order to avenge the death of his older brother, and who expects to be killed himself in keeping with the code of the highlands; and that of a young couple who have come to study the age-old customs, including the blood feud.

The History of the Worthies of England Penguin

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's

creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with

contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem. A World History of Art East African Publishers

An intimate, joy-filled portrait and New York Times bestseller, written by one of Hemingway's closest friends: "It is hard to imagine a better biography" (Life). In 1948, A. E. Hotchner went to Cuba to ask Ernest Hemingway to write an article on "The Future of Literature" for Cosmopolitan magazine. The article never materialized, but from that first meeting at the El Floridita bar in Havana until Hemingway's death in 1961, Hotchner and the Nobel and Pulitzer Prize-winning author developed a deep and abiding friendship. They caroused in New York City and Rome, ran with the bulls in Pamplona, hunted in Idaho, and fished the waters off Cuba. Every time they got together, Hemingway held forth on an astonishing variety of subjects, from the art of the perfect daiquiri to Paris in the 1920s to his boyhood in Oak Park, Illinois. Thankfully, Hotchner took it all down. Papa Hemingway provides fascinating details about Hemingway's daily routine, including the German army belt he wore and his habit of writing descriptive passages in longhand and dialogue on a typewriter, and documents his memories of Gertrude Stein, F. Scott Fitzgerald, Martha Gellhorn, Marlene Dietrich, and many of the twentieth century's most notable artists and celebrities. In the literary icon's final years, as his poor health began to affect his work, Hotchner tenderly and honestly portrays Hemingway's valiant attempts to beat back the depression that would lead him to take his own life. Deeply compassionate and highly entertaining, this "remarkable" New York Times bestseller "makes Hemingway live for us as nothing else has done" (The Wall Street Journal).

On August 26, 1835, a fledgling newspaper called the Sun brought to New

York the first accounts of remarkable lunar discoveries. A series of six articles reported the existence of life on the moon—including unicorns, beavers that walked on their hind legs, and four-foot-tall flying man-bats. In a matter of weeks it was the most broadly circulated newspaper story of the era, and the Sun, a working-class upstart, became the most widely read paper in the world. An exhilarating narrative history of a divided city on the cusp of greatness, and tale of a crew of writers, editors, and charlatans who stumbled on a new kind of journalism, *The Sun and the Moon* tells the surprisingly true story of the penny papers that made America a nation of newspaper readers.

In this lyrical, exuberant tale, acclaimed Turkish author Elif Shafak, author of *The Island of Missing Trees* (a Reese's Book Club Pick), incarnates Rumi's timeless message of love. *The Forty Rules of Love* unfolds two tantalizing parallel narratives—one contemporary and the other set in the thirteenth century, when Rumi encountered his spiritual mentor, the whirling dervish known as Shams of Tabriz—that together explore the enduring power of Rumi's work. Ella Rubenstein is forty years old and unhappily married when she takes a job as a reader for a literary agent. Her first assignment is to read and report on *Sweet Blasphemy*, a novel written by a man named Aziz Zahara. Ella is mesmerized by his tale of Shams's search for Rumi and the dervish's role in transforming the successful but unhappy cleric into a committed mystic, passionate poet, and advocate of love. She is also taken with Shams's lessons, or rules, that offer insight into an ancient philosophy based on the unity of all people and religions, and the presence of love in each and every one of us. As she reads on, she realizes that Rumi's story mirrors her own and that Zahara—like Shams—has come to set her free.

Papa Hemingway Laurence King Publishing From occult underground to superhero! Was Superman's arch nemesis Lex Luthor based on Aleister Crowley? Can Captain

Marvel be linked to the Sun gods on antiquity? In *Our Gods Wear Spandex*, Christopher Knowles answers these questions and brings to light many other intriguing links between superheroes and the enchanted world of esoterica. Occult students and comic-book fans alike will discover countless fascinating connections, from little known facts such as that DC Comics editor Julius Schwartz started his career as H.P. Lovecraft's agent, to the tantalizingly extensive influence of Madame Blavatsky's Theosophy on the birth of comics, to the mystic roots of Superman. The book also traces the rise of the comic superheroes and how they relate to several cultural trends in the late 19th century, specifically the occult explosion in Western Europe and America. Knowles reveals the four basic superhero archetypes—the Messiah, the Golem, the Amazon, and the Brotherhood—and shows how the occult Bohemian underground of the early 20th century provided the inspiration for the modern comic book hero. With the popularity of occult comics writers like *Invisibles* creator Grant Morrison and *V for Vendetta* creator Alan Moore, the vast ComiCon audience is poised for someone to seriously introduce them to the esoteric mysteries. Chris Knowles is doing just that in this epic book. Chapters include: Ancient of Days, Ascended Masters, God and Gangsters, Mad Scientists and Modern Sorcerers, and many more. From the ghettos of Prague to the halls of Valhalla to the Fortress of Solitude and the aisles of BEA and ComiCon, this is the first book to show the inextricable link between superheroes and the enchanted world of esoterica.
