This book includes Study Material & Previous Papers for the purpose of practice of questions based on the latest pattern of the examination. Detailed Explanatory Answers have also been provided for the selected questions for Better Understanding of the Candidates

Introduction To Statistics S. Chand Publishing

"I am inclined to call this the last chapter, but how can an autobiography have a final chapter? At best, it can only be a penultimate one; nor can it be given a rounded-off conclusion, as is possible in a work of fiction." So begins the last chapter of My Days, the only memoir from R. K. Narayan, hailed as "India's most notable novelist and short-story writer" by the New York Times Book Review. In his usual winning, humorous style, R. K. Narayan shares his life story, beginning in his grandmother's garden in Madras with his ferocious pet peacock. As a young boy with no interest in school, he trains grasshoppers, scouts, and generally takes part in life's excitements. Against the advice of all, especially his commanding headmaster father, the dreaming Narayan takes to writing fiction, and one of his pieces is accepted by Punch magazine (his "first prestige publication"). Soon his life includes bumbling British diplomats, curious movie moguls, evasive Indian officials, eccentric journalists, and "the blind urge" to fall in love. R. K. Narayan's larger-than-life perception of the human comedy is at once acute and forgiving, and always true to it.

Skill in Mathematics - Algebra for JEE Main and Advanced Chanda Jaiswar and Madhurima Modak

The general approach and aim of this book is to provide a brief comprehensive study of elementary nuclear physics in a coherent, simple and lucid manner. The book contains eight chapters covering topics which are generally common for undergraduate students. SI systems of units have been use in this book.

"Our Friendship Is Our Biggest Manifestation" What is this book about? What do we actually wanna say through these Pages ? How is "SOUL SISTER" benefiting you? If we have to say, so we can say Soul Sister is about two late-teenager's journey from troubling to learning, from confusion to clarity, from human body to soul, from lust to tantra, from nothing to everything, from money to universal abundance, from non awakened to enlightenment, from long distance online friends to SOUL SISTERS. It's a testimony of becoming LOVE. Finding your own way to meet yourself. Leading your reality, living best life that exists in this vast multiverse. How mobile phones and social media, if used correctly can become your way to your higher self too. We used this medium to not only get connected with each other but also we write this entire book over the phone.

A towering figure in twentieth-century theatre in India, Habib Tanvir was an actor, director and playwright, working in Hindi and Urdu. He founded Naya Theatre in 1959, through which he created remarkable works, drawing on the history and traditions of the tribal folk of Chhattisgarh. This book brings together four of his most significant plays. Agra Bazar (1954), set amid the bustle of a colourful street market, is woven together by the wonderfully human voice of the poet Nazir, and examines important cultural and socioeconomic issues of the period. Charandas Chor (1975), Tanvir's most famous work, is about a folk hero who robs the rich and evades the law until he comes up against one wall he cannot scale--his own commitment to the truth. In Bahadur the Wine-Seller (1978), Tanvir reinvents a nearly forgotten Chhattisgarh folk tale about a mother-son relationship in which he finds a echoes of Oedipus, while in The Living Tale of Hirma (1985), he dramatizes a historical event in which a headstrong ruler of an Indian tribe clashes with a

population who want to replace the tribal way of life with newfound ideals of democracy. Enriched by introductory texts and an intensive interview with Tanvir that covers the milestones of his illustrious career, the book will be the perfect introduction to Tanvir's work for English-language theatre fans and scholars--back cover.

West Bengal General Knowledge Ramesh Publishing House

The purpose of the volume is to provide a support for a first course in Mathematics. The contents are organised to appeal especially to Engineering, Physics and Computer Science students, all areas in which mathematical tools play a crucial role. Basic notions and methods of differential and integral calculus for functions of one real variable are presented in a manner that elicits critical reading and prompts a hands-on approach to concrete applications. The layout has a specifically-designed modular nature, allowing the instructor to make flexible didactical choices when planning an introductory lecture course. The book may in fact be employed at three levels of depth. At the elementary level the student is supposed to grasp the very essential ideas and familiarise with the corresponding key techniques. Proofs to the main results befit the intermediate level, together with several remarks and complementary notes enhancing the treatise. The last, and farthest-reaching, level requires the additional study of the material contained in the appendices, which enable the strongly motivated reader to explore further into the subject. Definitions and properties are furnished with substantial examples to stimulate the learning process. Over 350 solved exercises complete the text, at least half of which guide the reader to the solution. This new edition features additional material with the aim of matching the widest range of educational choices for a first course of Mathematics.
