"Akashvani" (English) is a programme journal of ALL INDIA RADIO, it was formerly known as The Indian Listener. It used to serve the listener as a bradshaw of broadcasting ,and give listener the useful information in an interesting manner about programmes, who writes them, take part in them and produce them along with photographs of

performing artists. It also contains the information of major changes in the policy and service of the organisation. The Indian Listener (fortnightly programme journal of AIR in English) published by The Indian State Broadcasting Service, Bombay, started on 22 December, 1935 and was the successor to the Indian Radio Times in English, which was published beginning in July 16 of 1927. From 22 August ,1937 onwards, it used to published by All India Radio, New Delhi. From 1950,it was turned into a weekly journal. Later, The Indian listener became "Akashvani" (English) w.e.f. January 5, 1958. It was made fortnightly journal again w.e.f July 1,1983. NAME OF THE JOURNAL: AKASHVANI LANGUAGE OF THE JOURNAL: English DATE, MONTH & YEAR

earthquake prediction more accurate than weather forecast

Science Press USA Inc.

This book is Course 15 in the 21 Brotherhood of Light Course series by C. C. Zain on the Hermetic Sciences, Astrology, Alchemy, Tarot, Kabbalah and the Occult. In this book, the author provides a rare and detailed study on astrometeorology, the science of astrological weather predicting. The books demonstrates how studying the art of weather predicting using astrological methods provides a valuable tool particularly useful for those involved

in agriculture, aviation, travel and even planning. Weather charts may be used to determine variations from normal weather patterns by comparing Temperature, Wind and Moisture charts for a given location and time.

Astrological weather predicting uses the cycles of the Sun, Moon, and Mercury to draw correlations between astral and physical weather conditions. It is one of the few texts available entirely devoted to astrological influences on the weather.

Average Monthly Weather Outlook

"Torrential rains over south and southeast Texas during the weekend of October 17-18, 1998, led to widespread and deadly flooding. A total of 31 people died during this event, and property damage estimates approached three quarters of a billion dollars. The event occurred within areas served by three National Oceanic and Atmospheric Administration (NOAA), National Weather Service (NWS) field forecast offices and by one NOAA/NWS River Forecast Center. Due to the magnitude of this flood event, a Service Assessment Team was assembled to examine all aspects of the warning services provided by NWS offices to the citizens and public officials of the areas affected. This Service

Assessment highlights successful operational procedures and identifies shortcomings noted during this event. Findings and recommendations are presented which will be used in our ongoing efforts to continually improve NWS services for the citizens of this country"--Preface.
