The Street Photographer's Manual Aperture

"The Suffering of Light" is the first comprehensive monograph charting the career of acclaimed American photographer Alex Webb. Gathering some of his most iconic images, many of which were taken in the far corners of the earth, this exquisite book brings a fresh perspective to his extensive catalog. Recognized as a pioneer of American color photography since the 1970s, Webb has consistently created photographs characterized by intense color and light. His work, with its richly layered and complex composition, touches on multiple genres, including street photography, photojournalism, and fine art, but as Webb claims, "to me it all is photography. You have to go out and explore the world with a camera." Webb's ability to distill gesture, color and contrasting cultural tensions into single, beguiling frames results in evocative images that convey a sense of enigma, irony and humor. Featuring key works alongside previously unpublished photographs, "The Suffering of Light" provides the most thorough examination to date of this modern master's prolific, 30-year career. The photographs of Alex Webb (born 1952) have appeared in a wide range of publications, including "The New York Times Magazine," "Life," "Stern" and "National Geographic," and have been exhibited at the International Center of Photography, New York; Walker Art Center, Minneapolis; and the Whitney Museum of American Art, New York. He is a recipient of the Leica

Medal of Excellence (2000) and the Premio Internacional de Fotografía Alcobendas (2009). A member of Magnum Photos since 1976, Webb lives in New York City.

Alex Webb and Rebecca Norris Webb have been photographing Brooklyn, one of the most dynamic and ethnically diverse places on the planet, for the past five years. While Alex Webb has traversed every corner of the borough, Rebecca Norris Webb photographed "the city within the city within the city," the green heart of Brooklyn. Together, their photographs of Brooklyn tell a larger American story, one that touches on immigration, identity, and home.

With a rising number of women throughout the world picking up their cameras and capturing their surroundings, this book explores the work of 100 women and the experiences behind their greatest images. Traditionally a male-dominated field, street photography is increasingly becoming the domain of women. This fantastic collection of images reflects that shift, showcasing 100 contemporary women street photographers working around the world today, accompanied by personal statements about their work. Various joyful, unsettling and unexpected, the photographs capture a wide range of extraordinary moments. The volume is curated by Gulnara Samoilova, founder of the Women Street Photographers project: a website, social media platform and annual exhibition. Photographer Melissa Breyer's introductory essay explores how the genre has intersected with gender

throughout history, looking at how cultural changes in gender roles have overlapped with technological developments in the camera to allow key historical figures to emerge. Her text is complemented by a foreword by renowned photojournalist Ami Vitale, whose career as a war photographer and, later, global travels with National Geographic have allowed a unique insight into the realities of working as a woman photographer in different countries. In turns intimate and candid, the photographs featured in this book offer a kaleidoscopic glimpse of what happens when women across the world are behind the camera.

This is the first book of Sternfeld's largely unseen early colour photographs. In 1969 Sternfeld began working with a 35 mm camera and Kodachrome film, and First Pictures contains works from this time until 1980. Here Sternfeld develops traits that appear in his mature work: irony, a politicised view of America, concern for the social condition. But there are also pictures that bear little relation to his later work: colour arrangements that parallel those of Eggleston, as well as street photography which Sternfeld ceased making in 1976. The photographs in First Pictures were made at a time when colour photography was struggling to assert itself against the authoritative black and white tradition, making this book a revelation both in Sternfeld's oeuvre and in the history of contemporary photography.

Art Deco architecture. These vivid and compelling images question the nature of our assumptions about the world of Florida. Webb's Florida seems at once so familiar and yet so strange. His ironic, impressionistic record of the passage of life sweeps the state from Fort Pierce and Daytona Beach to Key Largo, Suwanee and Apalachicola to Disney World. Among the photographs that reveal the texture of life in this beachfront state are unique juxtapositions: a Key deer walking.

In 2005, Rebecca Norris Webb set out to photograph her home state of South Dakota, a sparsely populated frontier state on the Great Plains with more buffalo, pronghorn, mule deer and prairie dogs than people. South Dakota is a land of powwows and rodeos, corn palaces and buffalo roundups; a harsh and beautiful landscape dominated by space, silence, brutal wind and extreme weather. The next year, however, everything changed for Norris Webb, when her brother died unexpectedly of heart failure. "For months," she writes in the introduction to this volume, "one of the few things that eased my unsettled heart was the landscape of South Dakota. For each of us, does loss have its own geography?" My Dakota is a small intimate book about the west and its weathers, and an elegy for a lost brother.

"[Richard Misrach] saw the border, [Guillermo Galindo] heard it, and by coming together across that line of artistic practice, they've now created these 'border cantos.' Misrach has been using the canto literary structure, borrowed from Dante and Ezra Pound, as a way of organizing his long-term

photographic project, Desert cantos (1979 to present). But here the canto also moves off the page and into sound, opening up into Galindo's practice. In Italian, canto means 'song'; in Spanish, 'singing' and 'chant.' In this sense, all cantos are part eye and part ear, able to be seen and heard at once."--Page 10.

"Since 2007, Richard Renaldi has been working on a series of photographs that involve approaching and asking complete strangers to physically interact while posing together for a portrait. Working on the street with a large format eight-by-ten-inch view camera, Renaldi encounters the subjects for his photographs in towns and cities all over the United States. He pairs them up and invites them to pose together, intimately, in ways that people are usually taught to reserve for their close friends and loved ones. Renaldi creates spontaneous and fleeting relationships between strangers, for the camera, often pushing his subjects beyond their comfort levels. These relationships may only last for the moment the shutter is released, but the resulting photographs are moving and provocative, and raise profound questions about the possibilities for positive human connection in a diverse society. -- Provided by publisher."--Publisher's description.

This updated edition profiles twenty of the world's leading street photographers and teaches readers how to capture profound urban moments. In recent years, photo sharing on social media has rejuvenated street photography, and its spirit has been reborn. The Street Photographer's Manual is about the possibilities of street photography as a medium, and how it can be approached in an accessible way. The book begins with an overview of street photography, examining its past, present, and future, and looking at how the genre has changed over time. The reader is then introduced to twenty of the most acclaimed international street photographers. This new, revised edition features six new photographers: Troy Holden, Merel Schoneveld, Melissa Breyer, David Gaberle, Michelle Groskopf, and Craig Whitehead. Integrated within the profiles are twenty fully illustrated tutorials, including how to shoot a face in a crowd and how to train your eye to observe and capture the unexpected. The Street Photographer's Manual shows you that being a street photographer is partly about looking for luck. But luck requires inspiration—and that is where this book is indispensable.

This National Book Award finalist is a revealing and beautifully written memoir and family history from acclaimed photographer Sally Mann. In this groundbreaking book, a unique interplay of narrative and image, Mann's preoccupation with family, race, mortality, and the storied landscape of the American South are revealed as almost genetically predetermined, written into her DNA by the family history that precedes her. Sorting through boxes of family papers and yellowed photographs she finds more than she bargained for: "deceit and scandal, alcohol, domestic abuse, car crashes, bogeymen, clandestine affairs, dearly loved and disputed family land . . . racial complications, vast sums of money made and lost, the return of the prodigal son, and maybe even bloody murder." In lyrical prose and startlingly revealing photographs, she crafts a totally original form of personal history that has the page-turning drama of a great novel but is firmly rooted in the fertile soil of her own life.

Where I Find Myself is the first major single book retrospective of one of America's leading photographers. It is organized in inverse chronological order and spans the photographer's whole career to date: from Joel Meyerowitz's most recent picture all the way back to the first photograph he ever took. The book covers all of Joel Meyerowitz's great projects: his work inspired by the artist Morandi, his work on trees, his exclusive coverage of Ground Zero, his trips in the footsteps of Robert Frank across the US, his experiments comparing color and black and white pictures, and of course his iconic street photography work. Joel Meyerovitz is incredibly eloquent and candid about how photography works or doesn't, and this should be an inspiration to anyone interested in photography.
