The College Instructor's Guide to Writing Test Items: Measuring

Student Learning addresses the need for direct and clear guidance on item writing for assessing broad ranges of content in many fields. By focusing on multiple-choice response items, this book provides college instructors the tools to understand, develop, and use assessment activities in classrooms in a way that consistently supports learning. Including dozens of example items and additional resources to support the item development process, this volume is unique in its practical-focus, and is essential reading for instructors and soon-to-be educators, professional development specialists, and higher education researchers. As teaching, assessment, and learning are inherently intertwined, *The College Instructor's Guide to Writing Test Items* both facilitates the development of instructors' own practice and improves the learning outcomes and success of students.

Biology E/M Subject Test 2011-2012 Princeton Review Education in the responsible conduct of research typically takes the form of online instructions about rules, regulations, and policies. Research Ethics takes a novel approach and emphasizes the art of philosophical decision-making. Part A introduces egoism and explains that it is in the individual's own interest to avoid misconduct, fabrication of data, plagiarism and bias. Part B explains contractualism and covers issues of authorship, peer review and responsible use of statistics. Part C introduces moral rights as the basis of informed consent, the use of humans in research, mentoring, intellectual property and conflicts of interests. Part D uses two-level utilitarianism to explore the possibilities and limits of the experimental use of animals, duties to the environment and future generations, and the social

responsibilities of researchers. This book brings a fresh perspective to research ethics and will engage the moral imaginations of graduate students in all disciplines.

6th Grade STAAR Math Exercise Book Princeton Review
