Make instant, meaningful connections. For interviewing, selling, managing, pitching an idea, applying to college—or looking for a soulmate—the secret of success is based on connecting with other people. And you can do it in 90 seconds or less through Nicholas Boothman's program of establishing face-to-face communication. A master of Neuro-Linguistic Programming (NLP), Boothman teaches us the concept of synchrony—how to synchronize our attitudes, body language, and voice tone in a way that instantly and imperceptibly makes us irresistibly likable to another person. He explains the different between open and closed body language. The power of communicating with what he calls a Really Useful Attitude. How to be an active listener. And how to identify and read the three most important sensory preferences. Step by step, it shows how to make the very best of any relationship's most critical moment—those first 90 seconds.

Married couples know that making time for each other is a must for keeping their connection strong. Just look at the exclusive Redbookmag.com poll for proof: half of the magazine's readers make it a habit to "date" their husbands regularly, and another 25 percent go out together at least once a

month. Fortunately, it doesn't matter if the date's fancy, expensive or elaborate: just getting a chance to be together, catch up, and shut out the noise of everyday life works its magic. And that's where this imaginative guide comes in. It's got an incredible 500 ideas that go way beyond the usual dinner-and-a-movie outing. Written in a down-to-earth style, it features fun advice, super-helpful checklists, and even date "ratings" (from "D" for down-and-dirty to "S" for sweetly romantic. Real couples weigh in with their own stories and experiences, too. From moonlit canoe rides to romantic poetry readings, from dual massages during an elaborate spa weekend to last-minute activities that don't cost a penny, these think-out-of-the-box ideas will heat up any marriage!

A writer-musician examines how the switch from analog to digital audio is changing our perceptions of time, space, love, money, and power. Our voices carry farther than ever before, thanks to digital media. But how are they being heard? In this book, Damon Krukowski examines how the switch from analog to digital audio is changing our perceptions of time, space, love, money, and power. In *Ways of Hearing*—modeled on *Ways of Seeing*, John Berger's influential 1972 book on visual culture—Krukowski offers readers a set of tools for critical listening in the digital age. Just as *Ways of Seeing* began as a BBC television series, *Ways of Hearing* is based on a six-part podcast produced for the groundbreaking public radio podcast network Radiotopia. Inventive uses of text and design help bring the message beyond the range of earbuds. Each chapter of *Ways of Hearing* explores a different aspect of listening in the digital age: time, space, love, money, and power. Digital time, for example, is designed for machines. When we trade broadcast for podcast, or analog for digital in the recording studio, we give up the opportunity to perceive time together through our media. On the street, we experience public space privately, as our headphones allow us to avoid "ear contact" with the city. Heard on a cell phone, our loved ones' voices are compressed, stripped of context by digital technology. Music has been dematerialized, no longer an object to be bought and sold. With recommendation algorithms and playlists, digital corporations have created a media universe that adapts to us, eliminating the pleasures of brick-and-mortar browsing. Krukowski lays out a choice: do we want a world enriched by the messiness of noise, or one that strives toward the purity of signal only?

NATIONAL BESTSELLER • Based on the celebrated PBS television series, the complete text of an engrossing history of America's least-understood conflict, "a significant milestone [that] will no doubt do much to determine how the war is understood for years to come." —The Washington Post More than forty years have passed since the end of the Vietnam War, but its memory continues to loom large in the national psyche. In this intimate history, Geoffrey C. Ward and Ken Burns have crafted a fresh and insightful account of the long and brutal conflict that reunited Vietnam while dividing the United States as nothing else had since the Civil War. From the Gulf of Tonkin and the Tet Offensive to Hamburger Hill and the fall of Saigon, Ward and Burns trace the conflict that dogged three American presidents and their advisers. But most of the voices that echo from these pages belong to less exalted men and women—those who fought in the war as well as those who fought against it, both victims and victors—willing for the first time to share their memories of Vietnam as it really was. A magisterial tour de force, *The Vietnam War* is an engrossing history of America's least-understood conflict.

From the author of the New York Times bestseller that defined nature-deficit disorder and launched the international children-and-nature movement, Vitamin N (for "nature") is a complete prescription for connecting with the power and joy of the natural world right now, with 500 activities for children and adults Dozens of inspiring and thought-provoking essays Scores of informational websites Down-to-earth advice In his landmark work *Last Child in the Woods*, Richard Louv was the first to bring widespread attention to the alienation of children from the natural world, coining the term nature-deficit disorder and outlining the benefits of a strong nature connection—from boosting mental acuity and creativity to reducing obesity and

depression, from promoting health and wellness to simply having fun. That book "rivalled Rachel Carson's *Silent Spring*" (the *Cincinnati Enquirer*), was "an absolute must-read for parents" (the *Boston Globe*), and "an inch-thick caution against raising the fully automated child" (the *New York Times*). His follow-up book, *The Nature Principle*, addressed the needs of adults and outlined a "new nature movement and its potential to improve the lives of all people no matter where they live" (*McClatchy Newspapers*). Vitamin N is a one-of-a-kind, comprehensive, and practical guidebook for the whole family and the wider community, including tips not only for parents eager to share nature with their kids but also for those seeking nature-smart schools, medical professionals, and even careers. It is a dose of pure inspiration, reminding us that looking up at the stars or taking a walk in the woods is as exhilarating as it is essential, at any age.

Five Hundred of the Most Important Ways to Stay Younger Longer Turtleback

NEW YORK TIMES BESTSELLER • "The single most important explanation, and the fullest explanation, of how Donald Trump became president of the United States . . . nothing less than the most important book that I have read this year."—Lawrence O'Donnell How did we get here? In this sweeping, eloquent history of America, Kurt Andersen shows that what's happening in our country today—this post-factual, "fake news" moment we're all living through—is not something new, but rather the ultimate expression of our national character. America was founded by wishful dreamers, magical thinkers, and true believers, by hucksters and their suckers. Fantasy is deeply embedded in our DNA. Over the course of five centuries—from the Salem witch trials to Scientology to the Satanic Panic of the 1980s, from P. T. Barnum to Hollywood and the anything-goes, wild-and-crazy sixties, from conspiracy theories to our fetish for guns and obsession with extraterrestrials—our love of the fantastic has made America exceptional in a way that we've never fully acknowledged. From the start, our ultra-individualism was attached to epic dreams and epic fantasies—every citizen was free to believe absolutely anything, or to pretend to be absolutely anybody. With the gleeful erudition and tell-it-like-it-is ferocity of a Christopher Hitchens, Andersen explores whether the great American experiment in liberty has gone off the rails. Fantasyland could not appear at a more perfect moment. If you want to understand Donald Trump and the culture of twenty-first-century America, if you want to know how the lines between reality and illusion have become dangerously blurred, you must read this book. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE SAN FRANCISCO CHRONICLE "This is a blockbuster of a book. Take a deep breath and dive in."—Tom Brokaw "[An] absorbing, must-read polemic . . . a provocative new study of America's cultural history."—Newsday "Compelling and totally unnerving."—The Village Voice "A frighteningly convincing and sometimes uproarious picture of a country in steep, perhaps terminal decline that would have the founding fathers weeping into their beards."—The Guardian "This is an important book—the indispensable book—for understanding America in the age of Trump."—Walter Isaacson, #1 New York Times bestselling author of *Leonardo da Vinci*

The Vietnam War Simon and Schuster

Eating. Sleeping. Bathing. Chores. These are the things we do every day, yet few of us stop to consider how we perform the routines that occupy 95 percent of our lives: in chaos or serenity, with irritation or with joy. Here, in one elegant, copious and forever rereadable book, Alexandra Stoddard shows how to live a more beautiful, more ordered life, every single day. Drawing on the wisdom of Emerson, Samuel Johnson, Rilke and many others and warmed by Alexandra Stoddard's personal anecdotes, this book deals with life both philosophically and practically -- from discovering the sources of your well-being to buying the right stationery or sheets; from using solitude to replenish your spirit to using fabrics, ribbon, paper and your own five senses to transform your daily life. Living a Beautiful Life demonstrates how to use the ordinary in extraordinary ways, suggesting hundreds of techniques for turning dull, irritating routines into life-enhancing rituals; hundreds of simple ways to transform your days -- or your bedroom, kitchen, bathroom and desk -- into delights of beauty and efficiency. There's a marvelous trick for locating the perfect psychological spot for your bed, a quick way to use "remembrance of things past" to choose color schemes that suit you, suggestions for how to turn a fifteen-minute lunch break into a restorative experience. And throughout, Alexandra Stoddard shows how taking care of "the little things" can ultimately add up to a change in the big things. Most of all, *Living a Beautiful Life* reveals how a beautiful life can be achieved; how daily motions become truly satisfying patterns of pleasure; and how these patterns of pleasure can add up to a lifelived deeply and well, transforming even the most cluttered and hectic existence.
