Hard Truths is a groundbreaking new work in which noted philosopher Elijah Millgram advances a new approach to truth and its role in our day-to-day reasoning. Takes up the hard truths of real reasoning and draws out their implications for logic and metaphysics. Introduces and takes issue with prevailing views of the purpose of truth and the way we reason, including deflationism about truth, possible worlds treatments of modality, and anti-psychologism in philosophy of logic. Develops philosophically ambitious ideas in a style accessible to non-specialists. Will make us rethink the place of metaphysics in our daily lives.

The former Director of National Intelligence speaks out in this New York Times bestseller. When he stepped down in January 2017 as the fourth United States Director of National Intelligence, James Clapper had been President Obama's senior intelligence advisor for six and a half years, longer than his three predecessors combined. He led the US Intelligence Community through a period that included the raid on Osama bin Laden, the Benghazi attack, the leaks of Edward Snowden, and Russia's influence operation on the 2016 U.S. election. In *Facts and Fears*, Clapper traces his career through the growing threat of cyberattacks, his relationships with Presidents and Congress, and the truth about Russia's role in the presidential election. He describes, in the wake of Snowden and WikiLeaks, his efforts to make intelligence more transparent and to push back against the suspicion that Americans' private lives are subject to surveillance. Finally, it was living through Russian interference in the 2016 presidential election and seeing how the foundations of American democracy were—and continue to be—undermined by a foreign power that led him to break with his instincts grown through more than five decades in the intelligence profession, to share his inside experience. Clapper considers such controversial questions as, is intelligence ethical? Is it moral to intercept communications or to photograph closed societies from orbit? What are the limits of what we should be allowed to do? What protections should we give to the private citizens of the world, not to mention our fellow Americans? Is there a time that intelligence officers can lose credibility as unbiased reporters of hard truths by asserting themselves into policy decisions? *Facts and Fears* offers a privileged look inside the United States intelligence community and addresses with the frankness and professionalism for which James Clapper is known some of the most difficult challenges in our nation's history.

Having outlined a theory of bullshit and falsehood, Harry G. Frankfurt turns to what lies beyond them: the truth, a concept not as obvious as some might expect. Our culture's devotion to bullshit may seem much stronger than our apparently halfhearted attachment to truth. Some people (professional thinkers) won't even acknowledge "true" and "false" as meaningful categories, and

even those who claim to love truth cause the rest of us to wonder whether they, too, aren't simply full of it. Practically speaking, many of us deploy the truth only when absolutely necessary, often finding alternatives to be more saleable, and yet somehow civilization seems to be muddling along. But where are we headed? Is our fast and easy way with the facts actually crippling us? Or is it "all good"? Really, what's the use of truth, anyway? With the same leavening wit and commonsense wisdom that animates his pathbreaking work *On Bullshit*, Frankfurt encourages us to take another look at the truth: there may be something there that is perhaps too plain to notice but for which we have a mostly unacknowledged yet deep-seated passion. His book will have sentient beings across America asking, "The truth—why didn't I think of that?"

There were three possible reasons given for the disappearance of the two hikers on Mount Nyangani: the treacherous terrain and climate; the banditos armados; the unforgiving spirit called Chirikuzi. In David's case there was a fourth—that Clare might have killed him. Unable to remember exactly what happened on the mountain in Zimbabwe and trying to come to terms with the loss of her hand in the accident, Clare is taken home to Scotland where her large, loving, questioning, and uncomfortably acute family become almost unbearable. She had wanted David dead, but did that mean she had killed him? Her mother's High Church concern, Anni's sharp-tongued radicalism, Aunt Felicity's internal fury, and her deaf niece Alice's fascination with the prosthetic hand seem at first to distract from Clare's problems, until the aristocratic family's pieties pierce her cocoon of post-traumatic amnesia. Family resentments flare and fade, divisions fester and heal, and as Clare uncovers buried fears, she comes to understand that the real question about the accident on Mount Nyangani is less what she has forgotten than why. Intricate in design, disturbing in its explorations of mind and spirit, and with a surprising twist at the end, *Ancestral Truths* employs a striking narrative voice to explore the shifting relations between belief and truth, love and desire, to reveal that beauty and danger walk hand in hand. Sara Maitland summons her knowledge of theology, mysticism, mathematics, and human nature to give this deeply perceptive novel its wit and cohesive richness. As Ms. Maitland's characters gradually recognize the inseparability of their strengths and weaknesses, the author of *Three Times Table* raises her art to a new pitch of excitement and originality.

Set in Europe in the aftermath of the Second World War, the nine stories in this glittering collection reflect on the foibles and dilemmas of human relationships. An English family goes to the south of France for the sake of the father's health, and to get away from an England of rationing and poverty. A displaced person turned French soldier in Algeria now makes a living as an actor in Paris. A group of selfish English expatriates on the Italian Riviera are incredulous that Mussolini and the Germans may affect their lives. A great writer's quiet widow blossoms in widowhood, to the surprise and alarm of her children, who send a ten-year-old grandson to Switzerland to keep her company one Christmas. Full of wry humour and penetrating insights, this is Mavis Gallant at her most

unforgettable.

As a young boy in the late 1950s, Jimmy O'Farrell emigrates with his family from Ireland to Manhattan to bask in the dawn of a new life. Thousands of miles away, the family of Jaylen Jackson seeks to build a life amid Jim Crow culture in Mississippi. As teenagers, both boys struggle to come of age in a racially divisive world, suffering horrific tragedies that shape their characters and life missions. Jimmy seeks to define what it means to stand for someone when the chips are down, while Jaylen embarks on a journey to gain respect beyond the color of his skin. Fleeing the past, both families land in neighboring Bronx communities in the 1960s, where Jimmy and Jaylen's lives first intersect, on the basketball courts and then in the Vietnam jungle. Repeatedly tested as men of different races, their friendship faces its toughest challenge outside a Bronx bar-with fatal consequences. *Truth Is in the House* is an epic and provocative tale that plumbs historical and modern racial themes and explores redemption, forgiveness, and the power of connecting through the human spirit.

Homes are powerfully defined by smells, sounds, textures and objects, all of which reflect how people live their everyday lives. From spray-painting the toilet wall to relaxing in the bath, the products we use speak volumes about who we are, how we relate to others and who we want to be. Based on extensive fieldwork, this fascinating book explores the intimate, material and sensory spaces of the home to uncover how gender roles are performed within our personal, private worlds.

Pink shows how everyday items ranging from perfumes to soap powder imprint and reinforce daily experiences and a sense of identity. How has the home been affected by the fact that more and more women now go to work and increasingly more men spend time engaged in domestic tasks? How do more traditional family-centred homes compare with those belonging to diverse family forms and people living alone? What does a study of domestic gender tell us about how change occurs? Answering these questions and many more, Pink combines the most recent approaches in gender studies and material culture to show how everyday activities can be deeply revealing of gender roles in the 21st century.
