"This is History Book. It explored the grand scheme of world history as a product of real-life human beings pursuing their individual and collective interests. It also offered a global perspective on the past by focusing on both the distinctive characteristics of individual societies and the connections that have

linked the fortunes of different societies. It has combined a clear chronological framework with the twin themes of traditions and encounters, which help to make the unwieldy story of world history both more manageable and more engaging. From the beginning, Traditions & Encounters offered an inclusive vision of the global past—one that is meaningful and

appropriate for the interdependent world of contemporary times"--

How to Design and Evaluate Research in Education

The Evolution of Affordable Content Efforts in the Higher Education Environment: Programs, Case Studies, and Examples provides both inspiration and guidance for those beginning work on

affordable content and evidence of the growth that has occurred in this arena over the last decade. While some institutions have been providing students affordable content options for over 100 years, many others have found the need to launch new programs in response to the escalating costs of higher education and the impact that has on student learning. This

book provides examples from different types and sizes of institutions and includes voices from a wide range of contributors including faculty, instructional designers, academic technologists, librarians, bookstore staff, and more. The Evolution of Affordable Content demonstrates the range of affordable content options that are possible today-from openly licensed

content to library licensed materials and all inclusive purchase models to institution- wide student textbook	rental models. <i>E-book</i> <i>Platforms for</i> <i>Libraries</i> E-book vendors continue to experiment: adjustments	to business models, consolidation of content, and mergers with competitors mean constant change.
